**free court ordered mental health evaluation: Torture in a Civilised Way: My Own Real Case History** Dr. Sammy Khan, 2014-10-23 My book describe my own real legal mental case which took place when I was working as not-ethnic medical doctor/ general practitioner for the NHS in a small town in a civilized western European country. The Book describe how the legal part of my case was fabricated and run for several years by a single arrogant and dishonest local police officer with the help from few arrogant and racists social workers from the local welfare and a biased police court magistrate after 10 years of my practice because of my disagreements, disputes and quarrels with them defending the equal legal and social rights of large number my patients from the Middle East and Turkey and large number of ethnics from street gangs who were poor needy social clients of the welfare with very hard complicated psycho-social legal problems . Also my Book describes how the mental part of my case was created, describing how my mental evaluations were made by biased, incompetent, racist and dishonest evaluators using shockingly wrong methods and procedures which totally deviated from all known international guidelines and recommendations for making proper and fair mental assessment of a defendant for court. I explain my case and my claims reference to published international methods and standards. My Book shows how my incorrectly obtained mental findings were presented and explained in courts only by the police prosecutor where the judging people and the prosecutor were totally blank even in basal psychology and psychiatry and mental evaluations, when the evaluators were absent during the trials . My case

shows, that even in a civilized European democratic country corruption and racial behaviors are found and practiced by the authorities and the common public towards the minorities or specific types of people and their social and legal rights. My case shows how mental evaluations and their findings can be abused by all parts involved in a legal mental case to achieve specific purposes. My case shows how the bias, the incompetence and the dishonest behaviors of the mental evaluators are added to the unreliability, invalidity and the inaccuracies found in present time psychological tests and the mental diagnostic systems can magnify the harmful consequences on the evaluated when mental evaluations are abused to achieve specific purposes. **free court ordered mental health evaluation: *THE REFUGEE AND THE GHOST*** Renee M. Preston, On a quiet summer night in Charlotte, North Carolina, a young woman boarded a train expecting nothing more than a safe ride home. Minutes later, Iryna Zarutska—a 23-year-old Ukrainian refugee who had fled the horrors of war—was brutally stabbed in the back car of the Lynx Blue Line. The attack, captured on surveillance footage, shocked the city, rippled across the nation, and drew headlines around the world. This book takes readers beyond the headlines and into the heart of the story: who Iryna was, the life she was building in America, and the tragic way her dreams were cut short. It also follows the man accused of her murder—a figure known to courts, jails, and hospitals, yet never stopped before he became lethal. Through court records, eyewitness

It asks: What does justice mean for a grieving family? Can reform prevent another tragedy? And how do cities heal when public trust is shattered? Gripping, meticulous, and deeply human, this book is for readers who want more than crime details—they want truth, accountability, and a voice for the silenced. Step onto the platform. Watch the doors close. And follow the story of a young woman whose life demands we pay attention. □ Read now and uncover the powerful true story behind one of 2025's most shocking crimes.
