**free irrigation technician certification: Meaning and Method** Isaac Reed, Jeffrey C. Alexander, 2015-11-17 Culture is increasingly important to American social science, but in what way? This book addresses the core issues of the sociology of culture-questions about the social role of meaning, along with those about the methods sociologists use to study culture and society-in a manner that makes clear their relevance to sociology as a whole. Part I consists of essays by leading cultural sociologists on how the turn to culture has changed the sociological study of organizations, economic action, and television, and concludes with Georgina Born's methodological statement on the sociology of art and cultural production. Part II contains a highly original, and at times heated, debate between Richard Biernacki and John H. Evans on the appropriateness of abstract and quantifiable coding schemes for the sociological study of culture. Ranging from the philosophy of science to the concrete, practical problems of interpreting masses of cultural data, the debate raises the controversy over the interpretation of culture and the explanation of social action to a new level of sophistication.

**free irrigation technician certification: Urban Water Security** Robert C. Brears, 2017-01-17 In the 21st Century, the world will see an unprecedented migration of people moving from rural to urban areas. With global demand for water projected to outstrip supply in the coming decades, cities will likely face water insecurity as a result of climate change and the various impacts of urbanisation. Traditionally, urban water managers have relied on large-scale, supply-side infrastructural projects to meet increased demands for water; however, these projects are environmentally, economically and politically costly. Urban Water Security argues that cities need to transition from supply-side to demand-side management to achieve urban water security. This book provides readers with a series of in-depth case studies of leading developed cities, of differing climates, incomes and lifestyles from around the world, that have used demand management tools to modify the attitudes and behaviour of water users in an attempt to achieve urban water security. Urban Water Security will be of particular interest to town and regional planners, water conservation managers and policymakers, international companies and organisations with large water footprints, environmental and water NGOs, researchers, graduate and undergraduate students.

This leads to a discussion of the private extension with respect to its relevance, efficiency, effectiveness, equity, sustainability and impact. Following that, comparison with public extension, the uniqueness of the knowledge intensification model, and lessons for its replication and scaling up are elaborated.
