i practice in spanish: Putting Critical Language Pedagogy into Practice Barbara Muszyńska, Holly Hansen-Thomas, 2023-07-07 Putting Critical Language Pedagogy into Practice explores the practice of language teaching through the lens of critical pedagogy, reflexivity, and the importance of reflexivity for teacher development. It also shows how these reflexive practices can contribute to more inclusivity and decolonization of the curriculum. A range of experts argue persuasively for epistemological reflexivity in practice and demonstrate how to implement this critical thinking into daily instructional practice. Each chapter is structured around three themes in order to help readers connect challenging theoretical ideas into day to day teaching practice: Reflection – the author's story and issue of concern; Epistemic Reflexivity – personal epistemologies reflecting on the social conditions influencing the theory underpinning that author's practices; Resolved action – how the epistemic reflexivity leads to purposeful decision-making enacted in classroom contexts. Original, thoughtful and challenging, this text is fascinating and instructional reading for language education advanced students, researchers and practitioners. The idea for this book emerged during the Fulbright scholarship at Texas Woman's University out of the mutual research interests of the editors.

i practice in spanish: Research Informing Practice - Practice Informing Research David Schwarzer, Mary Petró, Christopher Luke, 2011-04-01 "Research Informing Practice—Practice Informing Research: Innovative Teaching Methodologies for World Language Educators" is an edited volume that focuses on innovative, nontraditional methods of teaching and learning world languages. Using teacher-research projects, each author in the volume guides readers through their own personal journey and exploration of teaching methods, novelty, risk-taking, and reflection. Chapters include guiding questions, vignettes, and thick descriptions of classroom-based research in an assortment of instructional settings. Theoretical issues and an array of practical applications are presented, as well as additional research opportunities and guidelines for implementation in a variety of teaching and learning venues. While not professing to be a panacea for world language learning, this book provides various lines of theory, research, and practice as they interact with each other through teacher-research narratives. As a well-known African proverb asserts, "It takes a village to raise a child." Similarly, it takes a village to develop a master teacher, and it takes a community to create an exceptional classroom. Throughout this volume, authors share their voices, experiences, and expertise as a means of strengthening the village. They then invite readers to embark on their own methodological journeys. The text thus serves as a stimulus for further discussion and pedagogical development in world language settings. Teachers and researchers are challenged to think critically and reflectively about world language education, encouraged to design innovative methods, approaches, and techniques for their world language classes, and ultimately asked to share their findings with students, parents, peers, communities, and the village.
