i newton education center: *Choice and Competition in American Education* Paul E. Peterson, 2006 Local school boards have traditionally assigned the school that a child is to attend. Only by selecting their neighborhoods have parents exercised their choice of school. In recent years, this tradition has slowly given way to magnet schools, inter-district choice programs, charter schools, voucher programs, and many other forms of choice, creating a new environment for school decision making. At the same time, market concepts are under consideration for the recruitment and compensation of teachers and principals. As a result, the world of education is becoming more competitive. In a group of essays originally published in *Education Next: A Journal of Opinion and Research*, this book examines the likely promise and pitfalls of these changes in American education. Overall, these essays paint the picture of an education landscape that will be greatly shaped by choice and competition in the 21st century.

i newton education center: African American Army Officers of World War I Adam P. Wilson, 2015-04-29 In April 1917, Congress approved President Woodrow Wilson's request to declare war on the Central Powers, thrusting the United States into World War I with the rallying cry, The world must be made safe for democracy. Two months later 1,250 African American men--college graduates, businessmen, doctors, lawyers, reverends and non-commissioned officers--volunteered to become the first blacks to receive officer training at Fort Des Moines, Iowa. Denied the full privileges and protections of democracy at home, they prepared to defend it abroad in hopes that their service would be rewarded with equal citizenship at war's end. This book tells the stories of these black American soldiers' lives during training, in combat and after their return home. The author addresses issues of national and international racism and equality and discusses the Army's use of African American troops, the creation of a segregated officer training camp, the war's implications for civil rights in America, and military duty as an obligation of citizenship.

i newton education center: The Alchemist's Daughter Katharine McMahon, 2006-01-31 Secrets abound in this gripping tale of a young woman cloistered since birth who discovers that knowledge is no substitute for experience when she chooses to follow her heart over science. Raised by her father in near isolation in the English countryside, Emilie Selden is trained as a brilliant natural philosopher and alchemist. In the spring of 1725, during the English Age of Reason, father and daughter embark upon their most daring alchemical experiment to date--attempting to breathe life into dead matter. But when Emilie--against her father's wishes--experiences the passion of first love, she decides to listen to her heart over her head. Banished to London and plunged headlong into a society that is both glamorous and ruthless, Emilie discovers that for all her extraordinary education she has no insight into the workings of the human heart. When she tries to return to the world of books and study, she instead unravels a shocking secret that sets her on her true journey to enlightenment.
