iams diet dog food: One Nation Under Dog Michael Schaffer, 2025-08-22 A witty, insightful, and affectionate examination of how and why we spend billions on our pets, and what this tells us about ourselves In 2003, Michael Schaffer and his wife drove to a rural shelter and adopted an emaciated, dreadlocked Saint Bernard who they named Murphy. They vowed that they'd never become the kind of people who send dogs named Baxter and Sonoma out to get facials, or shell out for \$12,000 hip replacements. But then they started to get weird looks from the in-laws: You hired a trainer? Your vet prescribed antidepressants? So Schaffer started poking around and before long happened on an astonishing statistic: the pet industry, estimated at \$43 billion this year, was just \$17 billion barely a decade earlier. *One Nation Under Dog* is about America's pet obsession—the explosion, over the past generation, of an industry full of pet masseuses, professional dog-walkers, organic kibble, leash-law militants, luxury pet spas, veterinary grief counselors, upscale dog shampoos, and the like: a booming economy that is evidence of tremendous and rapid change in the status of America's pets. Schaffer provides a surprising and lively portrait of our country—as how we treat our pets reflects evolving ideas about domesticity, consumerism, politics, and family—through this fabulously reported and sympathetic look at both us and our dogs.

iams diet dog food: Dog Food Logic Linda P. Case, M.S., 2014-02-12 Choosing the right dog food in a world with too many choices
 Walking down the dog food aisle in a pet supply superstore can present you with an overwhelming number of choices. Reading about dog food on the internet can make your head spin with so many opinions and stories. And judging the content that you find on dog food packaging can be confusing and misleading. How can the average dog owner make an informed choice in accordance with her dog's age, size and condition? In her latest book, author Linda Case describes how to make logical, evidence-based decisions for what to feed your dog amid all the options available.

 You will learn
 • How pet food marketers appeal to your emotions to persuade you to buy a particular type of dog food.
 • To distinguish between scientific, evidence-based information and the anecdotal evidence which is so pervasive—and often misleading—in the dog food arena.
 • Is there a scientific basis for dog foods designed specifically for puppies, senior dogs, canine athletes—even various breeds of dogs?
 • How to read and evaluate all of the material included on a typical package of dog food from the ingredients and label claims (“Natural,” “Anti-Oxidant,” “Low Fat”), to the Nutrient Analysis and Nutritional Adequacy statements.
 • How to avoid choice paralysis and the cognitive traps that can interfere with clear decision making.

 What experts are saying about <I>Dog Food Logic</I>
 Pet food is like a religion for many—but now those strong emotional ties can be backed up with fact. Linda Case separates fact from fiction, explains the complex terms and offers a guide to pet nutrition in simple to comprehend language. Unlike other books on this topic, there is no agenda here—except to present facts and then allow pet owners to make their own logical conclusions, letting the kibble drop where it may.
 Steve Dale, CABC, columnist Tribune Content Agency; radio host Black Dog Radio Productions and WGN Radio (Chicago); contributing editor USA Weekend; special correspondent Cat Fancy; author Good Cat!
