Program Overview and Mission

The Icahn Mount Sinai Internal Medicine Residency program is dedicated to delivering comprehensive education and clinical training to develop expert internists. Situated in New York City, the program leverages the diversity of the patient population to expose residents to a wide range of medical conditions and social determinants of health. The mission centers on fostering clinical excellence, professionalism, and lifelong learning. It aims to produce physicians who are not only skilled clinicians but also leaders in healthcare innovation and advocacy. The program encourages a multidisciplinary approach, integrating evidence-based medicine with compassionate patient care.

Curriculum and Clinical Training

The curriculum of the Icahn Mount Sinai Internal Medicine Residency is carefully structured to provide progressive responsibility and diverse clinical experiences.

Residents rotate through various inpatient and outpatient settings, including general medicine wards, intensive care units, subspecialty clinics, and ambulatory care centers. This broad exposure ensures well-rounded clinical competence.

Core Rotations

Residents participate in core rotations that cover essential areas of internal medicine, such as cardiology, endocrinology, gastroenterology, infectious diseases, pulmonology, nephrology, and rheumatology. Each rotation is designed to enhance diagnostic skills, clinical reasoning, and procedural proficiency.

Ambulatory Training

The program emphasizes outpatient care through dedicated ambulatory blocks. This training focuses on preventive medicine, chronic disease management, and patient communication skills, preparing residents for primary care roles or subspecialty fellowships.

Procedural Skills Development

Hands-on procedural training is an integral part of the residency, covering skills such as central line placement, lumbar puncture, thoracentesis, paracentesis, and arterial blood gas sampling. Procedural competence is assessed regularly to ensure readiness for independent practice.

Faculty and Mentorship

The Icahn Mount Sinai Internal Medicine Residency boasts a distinguished faculty comprising experienced clinicians, researchers, and educators. Faculty members are committed to resident development through personalized mentorship and career guidance. This supportive environment fosters professional growth and academic success.

Mentorship Programs

Residents are paired with faculty mentors who provide ongoing support in clinical training, research activities, and career planning. Mentors assist with goal setting, skill development, and networking opportunities within the medical community.

Leadership and Teaching Opportunities

Senior residents are encouraged to take on leadership roles within the program, including teaching responsibilities for junior residents and medical students. This cultivates skills in education, administration, and collaboration.

Research Opportunities

Research is a cornerstone of the Icahn Mount Sinai Internal Medicine Residency, reflecting the institution's commitment to advancing medical knowledge. Residents are encouraged to engage in clinical, translational, and basic science research projects under the guidance of expert faculty.

Research Tracks and Resources

The program offers structured research tracks that allow residents to tailor their scholarly activities according to their interests. Access to Mount Sinai's extensive research infrastructure, including laboratories and clinical trial networks, enhances the research experience.

Presentations and Publications

Residents have opportunities to present their findings at national conferences and contribute to peer-reviewed publications. This engagement fosters academic development and enhances competitiveness for fellowship applications.

Resident Life and Support

Recognizing the demands of residency training, the Icahn Mount Sinai Internal Medicine Residency prioritizes resident well-being and work-life balance. Comprehensive support services and wellness initiatives are integrated into the program to promote resilience and professional fulfillment.

Wellness Programs

The program offers wellness resources, including counseling services, stress reduction workshops, and peer support groups. These initiatives aim to mitigate burnout and foster a positive training environment.

Community and Diversity

Residents benefit from a culturally diverse community that values inclusivity and equity. The program supports activities and organizations that celebrate diversity and encourage cultural competency in patient care.

Housing and Lifestyle

Although located in a bustling urban area, the residency program provides guidance on housing options, commuting, and local amenities to help residents maintain a balanced

lifestyle during their training.

Application Process and Requirements

The application process for the Icahn Mount Sinai Internal Medicine Residency is highly competitive, reflecting the program's esteemed reputation. Prospective applicants should prepare thoroughly to meet all requirements and present a compelling candidacy.

Eligibility Criteria

Applicants must have graduated from an accredited medical school and possess the necessary certifications, including USMLE or COMLEX scores. International medical graduates are welcome but must meet additional visa and credentialing standards.

Application Components

The application includes submission of a curriculum vitae, personal statement, letters of recommendation, and academic transcripts. Strong clinical performance and demonstrated interest in internal medicine enhance the likelihood of selection.

Interview and Selection

Selected candidates are invited for interviews, which assess clinical knowledge, communication skills, and alignment with the program's values. The residency employs a holistic review process to identify individuals with the potential to thrive in its rigorous environment.

1. Graduate from an accredited medical school
2. Submit USMLE or COMLEX scores
3. Provide letters of recommendation
4. Complete a personal statement detailing career goals
5. Participate in the interview process

icahn mount sinai internal medicine residency: *Integrating Lifestyle Medicine for Prediabetes, Type 2 Diabetes, and Cardiometabolic Disease* Michael Via, Jeffrey Mechanick, 2023-05-12 Lifestyle change is universally recommended for patients with type 2 diabetes and cardiometabolic disease, yet, the majority of clinical practice, educational programs, and clinical trials within these chronic disease spaces focus on medication use and procedures, with insufficient emphasis on lifestyle medicine. The concept of lifestyle medicine can serve as a countermeasure, acting through aspects of personal choice, natural and built environments, cultural traditions, and socioeconomic influences that affect the metabolic health of an individual. Integrating Lifestyle Medicine for Prediabetes, Type 2 Diabetes, and Cardiometabolic Disease provides clinical evidence for and a mechanistic understanding of the six pillars of lifestyle medicine. It guides the reader to identify opportunities for early intervention rather than focus on the diagnosis and treatment of the established disease. Interventions at earlier points have the potential to mitigate progression, prevent complications, reduce costs, and improve a patient's overall health at all points in their lifetime. Key Features Provides mechanistic, epidemiological, and clinical understanding of all pillars of lifestyle medicine Presents information on mechanisms for lifestyle medicine in cardiometabolic disease Features a unique model that includes recognition of predisease and even pre-predisease with rationale for intervention Promotes evidence-based recommendations for all stages of cardiometabolic disease This volume in the Lifestyle Medicine series is an essential resource for clinicians and students, providing them with information to help them to prevent complications, reduce costs, and improve a patient's overall health at all points in their lifetime.

icahn mount sinai internal medicine residency: *Management of Pancreatic Diseases, An*

Issue of Gastroenterology Clinics of North America Nuzhat A. Ahmad, 2016-02-19 This issue details the latest knowledge of early diagnosis, risk factors, limited surgical treatments, and novel therapies for pancreatic diseases. Clinicians will learn the most prognostic scoring systems for acute pancreatitis, review the basics for early management of the disease, and see how current practice guidelines have evolved. Advances in radiological imaging when applied to the pancreas have resulted in enhanced staging and improved selection for surgical intervention. Endoscopy of the pancreas via both ERCP and endoscopic ultrasound has led to unprecedented access and potential for non-operative intervention. Pancreatic surgery now takes advantage of both minimally invasive approaches and techniques learned from organ transplantation. These latest advances are addressed in this issue by key opinion leaders.

icahn mount sinai internal medicine residency: Lifestyle Medicine Jeffrey I. Mechanick, Robert F. Kushner, 2025-05-26 This book represents the third in a series of Springer textbooks on Lifestyle Medicine by Dr. Mechanick and Dr. Kushner. The first book focused on theory and practice concepts. The second book focused on implementation with a specific tactic of building a lifestyle medicine center. This third book focuses on scientific evidence to close research gaps, knowledge gaps, and practice gaps. The general intent is to imbue the field of lifestyle medicine with scientific evidence. The other intent is to continue advancing a culture of preventive care for chronic disease using lifestyle medicine, but again through a tactic of emphasizing science, evidence, and critical thinking. Lifestyle Medicine: Closing Research, Practice, and Knowledge Gaps is organized into three sections. In the first section, driver-based chronic disease models and other elements that pertain to lifestyle medicine are explored in terms of current levels of scientific substantiation. In the second section, educational modalities are presented that can improve awareness of scientific and experiential knowledge by healthcare professionals. Topics include innovative teaching models, web-based activities, training and accreditation programs, and certification exams. In the third section, a variety of clinical scenarios are presented to highlight practice gaps - implementation issues where there is inadequate clinical action despite an awareness of the pertinent knowledge. The topics span critical domains that must be addressed so that lifestyle medicine can lead to favorable outcomes in people and populations at risk. These domains include: alcohol and substance abuse, colitis, brain health, environmental risk, pharmacotherapy de-escalation, routine change, socioeconomic, transculturalization, advanced analytics, home cardiac rehabilitation, digital twin technology, and a highly referenced discussion of the lifestyle medicine ecosystem and infrastructure. Care is taken to provide not only theoretical foundations but also case studies, where appropriate, to emphasize critical aspects. In conclusion, this third book on Lifestyle Medicine will complement the previous two Springer books and define a compendium of resources necessary for anyone interested in this field.
