

icd 10 code for history of radiation therapy

icd 10 code for history of radiation therapy is a critical classification used in medical coding and billing to indicate a patient's prior exposure to radiation treatment. This code plays an essential role in documenting a patient's medical history, facilitating accurate diagnosis, treatment planning, and insurance claims processing. Understanding the correct ICD-10 code for history of radiation therapy helps healthcare professionals and coders maintain compliance with coding standards and optimize clinical communication. This article provides a comprehensive overview of the ICD-10 coding system related to radiation therapy history, the importance of accurate coding, and practical guidance for proper documentation. Additionally, it explores related medical concepts and common coding scenarios to ensure clarity and precision in clinical records.

- Understanding ICD-10 Codes for Radiation Therapy History
- Importance of Documenting History of Radiation Therapy
- Common ICD-10 Codes Related to Radiation Therapy
- Guidelines for Accurate Coding and Documentation
- Challenges and Tips in Coding Radiation Therapy History

Understanding ICD-10 Codes for Radiation Therapy History

The International Classification of Diseases, 10th Revision (ICD-10) is a globally recognized medical coding system used to classify diseases, symptoms, and other health conditions. Within this system, specific codes are designated to document a patient's history of certain treatments, including radiation therapy. The **icd 10 code for history of radiation therapy** enables healthcare providers to record past exposure to radiation, which is crucial for ongoing patient management and clinical decision-making.

Definition of History of Radiation Therapy

History of radiation therapy refers to a patient's previous treatment involving the use of ionizing radiation, typically to manage or cure cancerous tumors. Recording this history is important because prior radiation can influence current health status, potential side effects, and treatment options. The ICD-10 coding system includes specific codes that capture this aspect of a patient's medical background.

ICD-10 Code Designation

The primary ICD-10 code for documenting a history of radiation therapy is **Z92.3**. This code falls under the category of “Persons with potential health hazards related to family and personal history and certain conditions influencing health status.” It specifically denotes that a patient has previously undergone radiation therapy but is not currently receiving it. Proper use of this code supports continuity of care and thorough clinical documentation.

Importance of Documenting History of Radiation Therapy

Accurate documentation of a history of radiation therapy is vital for multiple reasons. It ensures that healthcare providers have a complete understanding of the patient’s treatment history, which can affect diagnostic evaluations, therapeutic decisions, and risk assessments. The **icd 10 code for history of radiation therapy** serves as a standardized way to communicate this important information across multidisciplinary teams and healthcare settings.

Impact on Treatment Planning

Previous radiation therapy can alter tissue characteristics, affect organ function, and increase susceptibility to complications. Knowing this history enables clinicians to tailor treatment plans accordingly, avoiding potential adverse effects and optimizing patient outcomes. For example, surgical approaches or chemotherapy regimens may be modified based on prior radiation exposure.

Facilitating Insurance and Reimbursement Processes

Insurance companies and payers rely on accurate ICD-10 coding to process claims and authorize coverage. Using the specific code for history of radiation therapy helps justify ongoing care, follow-up procedures, or surveillance testing related to the patient’s prior treatment. It also prevents delays in reimbursement by providing clear documentation of relevant clinical factors.

Common ICD-10 Codes Related to Radiation Therapy

In addition to the primary code for history of radiation therapy, several other ICD-10 codes may be relevant depending on the clinical scenario. These codes help capture current radiation therapy encounters, complications, or sequelae of radiation exposure. Understanding the distinctions between these codes enables more precise clinical documentation and coding accuracy.

Z92.3 - Personal history of irradiation

This code specifically indicates that a patient has a personal history of radiation therapy. It is used when the radiation treatment occurred in the past and the patient is not currently undergoing radiation. It is the most commonly used code for documenting radiation therapy history in medical

records.

Codes for Current Radiation Therapy

When a patient is actively receiving radiation therapy, different codes apply, typically found under categories related to neoplasms or treatment encounters. These include:

- Z51.0 - Encounter for antineoplastic radiation therapy
- Z51.11 - Encounter for antineoplastic chemotherapy

These codes are used to document ongoing treatment rather than historical exposure.

Codes for Radiation-Induced Conditions

Radiation therapy can sometimes cause late effects or complications. ICD-10 provides codes to capture these sequelae, such as:

- T66.XXXA - Radiation sickness, initial encounter
- T66.XXXD - Radiation sickness, subsequent encounter
- T66.XXXS - Radiation sickness, sequela

Accurate coding of these conditions is important for patient care and monitoring long-term effects of radiation.

Guidelines for Accurate Coding and Documentation

Proper usage of the **icd 10 code for history of radiation therapy** depends on detailed and clear documentation in the patient's medical record. Healthcare providers and medical coders must collaborate to ensure that the documentation supports the selected code, complies with coding standards, and reflects the patient's clinical status.

Clinical Documentation Requirements

Documentation should explicitly state the patient's history of radiation therapy, including the type, location, and timing of the treatment when possible. This information provides context and justification for using the history code.

Selecting the Appropriate Code

When coding, it is essential to distinguish between current radiation therapy, history of radiation therapy, and radiation-induced conditions. The following steps assist in correct code selection:

1. Review clinical notes to confirm the status of radiation treatment.
2. Identify whether the radiation therapy is ongoing or completed.
3. Determine if any complications or late effects are present.
4. Assign the ICD-10 code that precisely reflects the patient's condition.

Compliance with Coding Guidelines

Adherence to official ICD-10-CM coding guidelines and payer-specific requirements is mandatory. Coding professionals should stay updated on coding changes and payer policies that may affect the use of history codes and treatment encounter codes.

Challenges and Tips in Coding Radiation Therapy History

While the ICD-10 system provides clear codes for radiation therapy history, certain challenges may affect accurate coding. Awareness of these issues and applying best practices can improve coding quality and clinical communication.

Challenges in Obtaining Complete History

Patients may not always recall details of prior radiation therapy, or historical records may be incomplete. This lack of information can hinder accurate documentation and coding. Healthcare providers should actively seek comprehensive treatment histories through patient interviews, medical record requests, and coordination with other healthcare facilities.

Common Coding Mistakes

Errors such as using history codes when the patient is currently receiving radiation, or failing to document radiation-induced complications properly, are frequent pitfalls. These mistakes can lead to claim denials, inaccurate clinical data, and compromised patient care.

Tips for Accurate Coding

- Ensure detailed clinical documentation supports the selected ICD-10 code.
- Verify the patient's current treatment status before assigning a history code.
- Use specific sequela or complication codes if radiation-related conditions are present.
- Maintain updated knowledge of coding guidelines and payer policies.
- Collaborate closely with healthcare providers to clarify ambiguous information.

Frequently Asked Questions

What is the ICD-10 code for history of radiation therapy?

The ICD-10 code for history of radiation therapy is Z92.3.

How is the code Z92.3 used in medical documentation?

Code Z92.3 is used to indicate that a patient has a past history of radiation therapy, which may be relevant for their current medical treatment or diagnosis.

Can Z92.3 be used as a primary diagnosis code?

No, Z92.3 is typically used as a secondary or additional code to provide information about the patient's medical history.

Are there specific codes for radiation therapy complications in ICD-10?

Yes, complications related to radiation therapy have specific codes in ICD-10, but Z92.3 specifically denotes history of radiation therapy without complications.

Is Z92.3 applicable for patients who underwent radiation therapy years ago?

Yes, Z92.3 is used to document any past history of radiation therapy regardless of how much time has passed since the treatment.

How should Z92.3 be combined with other codes in coding practice?

Z92.3 should be combined with codes for current conditions or symptoms to provide context about the patient's prior radiation therapy history.

Does the ICD-10 code Z92.3 cover all types of radiation therapy?

Yes, Z92.3 covers history of all types of radiation therapy, including external beam radiation and brachytherapy.

Why is it important to document a history of radiation therapy using Z92.3?

Documenting history of radiation therapy is important for assessing potential late effects, treatment planning, and understanding patient risk factors.

Additional Resources

1. *Radiation Therapy Coding and Billing Guide*

This comprehensive guide covers the specifics of coding and billing for radiation therapy, including ICD-10 codes related to the history of radiation treatment. It is ideal for medical coders, billing specialists, and healthcare providers who want to ensure accurate documentation and reimbursement. The book offers detailed explanations of coding rules, case studies, and updates on the latest coding standards.

2. *ICD-10-CM for Oncology and Radiation Therapy*

Focused on oncology and radiation therapy, this book provides an in-depth look at ICD-10-CM codes relevant to cancer treatment histories, including radiation therapy. It explains how to accurately code patient histories, complications, and follow-up care. The text includes practical tips for clinical documentation improvement and compliance.

3. *Essentials of Radiation Oncology: Coding and Clinical Practice*

This book blends clinical knowledge of radiation oncology with practical coding guidelines, emphasizing ICD-10 coding for radiation therapy history. It is designed for both healthcare providers and coders, offering insights into treatment planning, patient management, and documentation requirements. The inclusion of case examples makes complex coding scenarios easier to understand.

4. *Medical Coding for Radiation Oncology: A Practical Approach*

Aimed at medical coders specializing in radiation oncology, this book breaks down the ICD-10 codes associated with radiation therapy history and related conditions. It provides step-by-step instructions for coding various radiation treatment scenarios and highlights common errors to avoid. The book also includes updates on regulatory changes affecting coding practices.

5. *Radiation Therapy Documentation and Coding Handbook*

This handbook serves as a quick reference for documenting and coding radiation therapy treatments and patient histories. It covers ICD-10 coding guidelines, including codes for the history of radiation exposure and therapy. Healthcare professionals will find checklists and coding tips to improve accuracy and compliance.

6. *Oncology Coding and Reimbursement: Navigating ICD-10 and Radiation Therapy*

This text focuses on the intersection of oncology treatment and medical coding, with a special emphasis on radiation therapy histories. It explains how to navigate ICD-10 coding for complex

oncology cases, including radiation therapy follow-ups and complications. The book also covers reimbursement strategies and payer requirements.

7. Clinical Radiation Oncology: Coding and Documentation Strategies

This resource combines clinical radiation oncology knowledge with practical documentation and coding strategies, particularly related to ICD-10 codes for radiation therapy history. It helps clinicians and coders understand the nuances of documenting radiation treatment courses and patient histories. The book includes examples of documentation best practices to support accurate coding.

8. ICD-10-CM Coding for Cancer Survivorship and Radiation Therapy History

Targeting professionals managing cancer survivors, this book details ICD-10 coding for patients with a history of radiation therapy. It emphasizes the importance of accurate coding for long-term follow-up care and surveillance. The guide offers coding tips for chronic conditions and late effects related to prior radiation treatment.

9. Radiation Oncology Coding Made Simple

Designed to simplify the complexities of radiation oncology coding, this book includes clear explanations of ICD-10 codes relevant to radiation therapy histories. It is suitable for beginners and experienced coders looking to refresh their knowledge. The book features practical examples, coding exercises, and updates on the latest coding guidelines.

icd 10 code for history of radiation therapy: ICD-10-CM/PCS Coding: Theory and Practice, 2019/2020 Edition E-Book Elsevier Inc, 2018-07-31 Learn facility-based coding by actually working with codes. ICD-10-CM/PCS Coding: Theory and Practice provides an in-depth understanding of in-patient diagnosis and procedure coding to those who are just learning to code, as well as to experienced professionals who need to solidify and expand their knowledge. Featuring basic coding principles, clear examples, and challenging exercises, this text helps explain why coding is necessary for reimbursement, the basics of the health record, and rules, guidelines, and functions of ICD-10-CM/PCS coding. - UPDATED ICD-10 codes and coding guidelines revisions ensure you have the most up-to-date information available. - 30-day access to TruCode® encoder on the Evolve companion website gives you realistic practice with using an encoder. - UPDATED codes for Pancreatitis, Diabetic Retinopathy, Fractures, GIST Tumors, Hypertension and Myocardial Infarctions. - ICD-10-CM and ICD-10-PCS Official Guidelines for Coding and Reporting provide fast, easy access instruction on proper application of codes. - Coverage of both common and complex procedures prepares you for inpatient procedural coding using ICD-10-PCS. - Numerous and varied examples and exercises within each chapter break chapters into manageable segments and help reinforcing important concepts. - Illustrations and examples of key diseases help in understanding how commonly encountered conditions relate to ICD-10-CM coding. - Strong coverage of medical records provides a context for coding and familiarizes you with documents you will encounter on the

job. - Illustrated, full-color design emphasizes important content such as anatomy and physiology and visually reinforces key concepts.

icd 10 code for history of radiation therapy: Buck's 2023 ICD-10-CM for Hospitals - E-Book Elsevier, 2022-10-22 - NEW! Updated 2023 Official Code set reflects the latest ICD-10 codes needed for diagnosis coding.

icd 10 code for history of radiation therapy: ICD-10-CM/PCS Coding: Theory and Practice, 2015 Edition - E-Book Karla R. Lovaasen, Jennifer Schwerdtfeger, 2014-07-24 NEW! Updated content includes the icd-10 code revisions to ensure users have the latest coding information available.

icd 10 code for history of radiation therapy: Buck's 2025 ICD-10-CM for Hospitals - E-BOOK Elsevier Inc, Jackie Koesterman, 2024-09-26 Selecting diagnosis codes is faster and easier with Buck's 2025 ICD-10-CM for Hospitals. Designed by coders for coders, this full-color manual includes all the ICD-10 codes that you need for today's inpatient coding. As coders need extensive knowledge to code with ICD-10-CM — and to choose from the thousands of possible codes — this edition makes it easier with colorful anatomy plates (including Netter's Anatomy illustrations) to help you understand anatomy and how it can affect your code choices. In addition, it comes with durable spiral binding, and includes a companion website with the latest coding updates.

icd 10 code for history of radiation therapy: Buck's 2022 ICD-10-CM for Hospitals E-Book Elsevier, 2021-10-09 Selecting diagnosis codes is faster and easier with Buck's 2022 ICD-10-CM for Hospitals. Designed by coders for coders, this full-color manual includes all the ICD-10 codes that you need for today's inpatient coding. As coders need extensive knowledge to code with ICD-10-CM — and to choose from the thousands of possible codes — this edition makes it easier with colorful anatomy plates (including Netter's Anatomy illustrations) to help you understand anatomy and how it can affect your code choices. In addition, it comes with durable spiral binding, and includes a companion website with the latest coding updates.

icd 10 code for history of radiation therapy: Step-by-Step Medical Coding, 2013 Edition - E-Book Carol J. Buck, 2012-12-14 Take your first step toward a successful career in medical coding with comprehensive coverage from the most trusted source in the field! Step-by-Step Medical Coding, 2013 Edition is the practical, easy-to-use resource that shows you exactly how to code using all of today's coding systems. In-depth, step-by-step explanations of essential coding concepts are followed by practice exercises to reinforce your understanding. In addition to coverage of reimbursement, ICD-9-CM, CPT, HCPCS, and inpatient coding, the 2013 edition offers complete coverage of the ICD-10-CM diagnosis coding system in preparation for the eventual transition. No other text on the market so thoroughly prepares you for all coding sets in one source! - Dual coding in Units 4 and 5 (where both ICD-10 and ICD-9 answers are provided for every exercise, chapter review, and workbook question) ensures you can code using the systems of both today and tomorrow. - Complete coverage of the new ICD-10 code set in Unit 2 prepares you for the eventual transition from ICD-9 to ICD-10. - Official Guidelines for Coding and Reporting boxes in Units 2, 3, and 5 present the official outpatient and inpatient guidelines alongside text discussions. - Concrete real-life coding examples help you apply important coding principles and practices to actual scenarios from the field. - Over 500 total illustrations of medical procedures or conditions help you understand the services being coded. - Four coding question variations develop your coding ability and critical thinking skills: - One answer blank for coding questions that require a one-code answer - Multiple answer blanks for coding questions that require a multiple-code answer - Identifiers next to the answer blank(s) to guide you through the most difficult coding scenarios - Answer blanks with a preceding symbol (3 interlocking circles) indicates that the user must decide the number of codes necessary to correctly answer the question - In-text exercises, Quick Checks, and Toolbox features reinforce coding rules and concepts, emphasize key information, and test your retention and understanding. - From the Trenches, Coding Shots, Stop!, Caution!, Check This Out!, and CMS Rules boxes offer valuable, up-to-date tips and advice for working in today's medical coding field. - Coder's Index makes it easy to instantly locate specific codes. - Practice activities on the companion Evolve

website reinforce key concepts from the text. - Updated content presents the latest coding information so you can practice with the most current information available.

icd 10 code for history of radiation therapy: Step-By-Step Medical Coding Carol J. Buck, 2013 Take your first step toward a successful career in medical coding with comprehensive coverage from the most trusted source in the field! Updated content presents the latest coding information so you can practice with the most current information available.

icd 10 code for history of radiation therapy: ICD-10-CM/PCS Coding: Theory and Practice, 2016 Edition Karla R. Lovaasen, 2015-08-12 With this comprehensive guide to inpatient coding, you will 'learn by doing!' ICD-10-CM/PCS Coding: Theory and Practice, 2016 Edition provides a thorough understanding of diagnosis and procedure coding in physician and hospital settings. It combines basic coding principles, clear examples, plenty of challenging exercises, and the ICD-10-CM and ICD-10-PCS Official Guidelines for Coding and Reporting to ensure coding accuracy using the latest codes. From leading medical coding authority Karla Lovaasen, this expert resource will help you succeed whether you're learning to code for the first time or making the transition to ICD-10! Coding exercises and examples let you apply concepts and practice coding with ICD-10-CM/PCS codes. Coverage of disease includes illustrations and coding examples, helping you understand how commonly encountered conditions relate to ICD-10-CM coding. ICD-10-CM and ICD-10-PCS Official Guidelines for Coding and Reporting provide fast, easy access to examples of proper application. Full-color design with illustrations emphasizes important content such as anatomy and physiology and visually reinforces key concepts. Integrated medical record coverage provides a context for coding and familiarizes you with documents you will encounter on the job. Coverage of common medications promotes coding accuracy by introducing medication names commonly encountered in medical records. Coverage of both common and complex procedures prepares you for inpatient procedural coding using ICD-10-PCS. MS-DRG documentation and reimbursement details provide instruction on proper application of codes NEW! 30-day trial access to TruCode? includes additional practice exercises on the Evolve companion website, providing a better understanding of how to utilize an encoder. UPDATED content includes icd-10 code revisions,

ensuring you have the latest coding information.

icd 10 code for history of radiation therapy: Buck's 2021 ICD-10-CM for Hospitals - E-Book Elsevier, 2020-09-25 Selecting diagnosis codes is faster and easier with Buck's 2021 ICD-10-CM for Hospitals. Designed by coders for coders, this full-color manual includes all the ICD-10 codes that you need for today's inpatient coding. As coders need extensive knowledge to code with ICD-10-CM — and to choose from the thousands of possible codes — this edition makes it easier with colorful anatomy plates (including Netter's Anatomy illustrations) to help you understand anatomy and how it can affect your code choices. In addition, it comes with durable spiral binding, and includes a companion website with the latest coding updates.

icd 10 code for history of radiation therapy: Buck's 2021 ICD-10-CM for Physicians - E-Book Elsevier, 2020-09-25 Selecting diagnosis codes is faster and easier with Buck's 2021 ICD-10-CM for Physicians. Designed by coders for coders, this full-color manual ensures you learn the most accurate billing and reimbursement codes for medical services provided in the physicians' office and outpatient settings. As coders need extensive knowledge to code with ICD-10-CM — and to choose from the thousands of possible codes — this edition makes it easier with colorful anatomy plates (including Netter's Anatomy illustrations) to help you understand anatomy and how it can affect your code choices. In addition, it comes with durable spiral binding, and includes a companion website with the latest coding updates.

icd 10 code for history of radiation therapy: ICD-10-CM/PCS Coding: Theory and Practice, 2016 Edition - E-Book Karla R. Lovaasen, 2015-07-16 With this comprehensive guide to inpatient coding, you will 'learn by doing!' ICD-10-CM/PCS Coding: Theory and Practice, 2016 Edition provides a thorough understanding of diagnosis and procedure coding in physician and hospital settings. It combines basic coding principles, clear examples, plenty of challenging exercises, and the ICD-10-CM and ICD-10-PCS Official Guidelines for Coding and Reporting to ensure coding accuracy using the latest codes. From leading medical coding authority Karla Lovaasen, this expert resource will help you succeed whether you're learning to code for the first time or making the transition to ICD-10! icd 10 code for history of radiation therapy: Step-By-Step Medical Coding, 2016 Edition
Carol J. Buck, Jackie L. Grass, 2015-12-02 Take your first step toward a successful career in medical coding with guidance from the most trusted name in coding education! From bestselling author Carol J. Buck, Step-by-Step Medical Coding, 2016 Edition is a practical, easy-to-use resource that shows you exactly how to code using all current coding sets. Practice exercises follow each 'step' of information to reinforce your understanding of important concepts. In-depth coverage includes reimbursement, ICD-10-CM, CPT, HCPCS, and inpatient coding, with an Evolve website that includes 30-day access to TruCode® Encoder Essentials. No other text so thoroughly covers all coding sets in one source! 30-day access to TruCode® Encoder Essentials and practice exercises on the Evolve companion website provide additional practice and help you understand how to utilize an encoder product. A step-by-step approach makes it easier to build skills and remember the material. Over 475 illustrations include medical procedures and conditions to help you understand the services being coded. Real-world coding reports (cleared of any confidential information) simulate the reports you will encounter as a coder and help you apply coding principles to actual cases. Dual coding includes answers for both ICD-10 and ICD-9 for every exercise, chapter review, and workbook question to help you ease into the full use of ICD-10. Exercises, Quick Checks, and Toolbox features reinforce coding rules and concepts, and emphasize key information. From the Trenches, Coding Shots, Stop!, Caution!, Check This Out!, and CMS Rules boxes offer valuable tips and helpful advice for working in today's medical coding field. Four coding-question variations develop your coding ability and critical thinking skills, including one-code or multiple-code answers. Official Guidelines for Coding and Reporting boxes allow you to read the official wording for inpatient and outpatient coding alongside in-text explanations. Coders' Index makes it easy to quickly locate specific codes. Appendix with sample Electronic Health Record screenshots provides examples similar to the EHRs you will encounter in the workplace. Online practice activities on Evolve include questions such as multiple choice, matching, fill-in-the-blank, and coding reports. A workbook corresponds to the textbook and offers review and practice with more than 1,200 theory, practical, and report exercises (odd-numbered answers provided in appendix) to reinforce your understanding of medical coding. Available separately. NEW! Separate HCPCS chapter expands coverage of the HCPCS code set. UPDATED content includes the latest coding information available, promoting accurate coding and success on the job.

icd 10 code for history of radiation therapy: ICD-10-CM/PCS Coding: Theory and Practice, 2025/2026 Edition - EBK Elsevier Inc, 2024-08-23 Learn facility-based coding by actually working with codes. ICD-10-CM/PCS Coding: Theory and Practice provides an in-depth understanding of inpatient diagnosis and procedure coding to those who are just learning to code, as well as to experienced professionals who need to solidify and expand their knowledge. Featuring basic coding principles, clear examples, and challenging exercises, this text helps explain why coding is necessary for reimbursement, the basics of the health record, and rules, guidelines, and functions of ICD-10-CM/PCS coding. - NEW! Revisions to ICD-10 codes and coding guidelines ensure you have the most up-to-date information available. - 30-day access to TruCode® Encoder Essentials gives you experience with using an encoder, plus access to additional encoder practice exercises on the Evolve website. - ICD-10-CM and ICD-10-PCS Official Guidelines for Coding and Reporting provide fast, easy access to instructions on proper application of codes. - Coverage of both common and complex procedures prepares you for inpatient procedural coding using ICD-10-PCS. - Numerous and varied

examples and exercises within each chapter break the material into manageable segments and help reinforce important concepts. - Illustrations and examples of key diseases help in understanding how commonly encountered conditions relate to ICD-10-CM coding. - Strong coverage of medical records provides a context for coding and familiarizes you with documents you will encounter on the job. - Illustrated, full-color design emphasizes important content such as anatomy and physiology and visually reinforces key concepts. - Evolve website offers online access to additional practice exercises, coding guidelines, answer keys, coding updates, and more.

icd 10 code for history of radiation therapy: ICD-10-CM/PCS Coding: Theory and Practice, 2017 Edition - E-Book Karla R. Lovaasen, 2016-07-18 NEW Coding Medical and Surgical Procedures chapter is added to this edition. UPDATED content includes revisions to icd-10 code and coding guidelines, ensuring you have the latest coding information.

icd 10 code for history of radiation therapy: ICD-9-CM Coding: Theory and Practice with ICD-10, 2013/2014 Edition - E-Book Karla R. Lovaasen, Jennifer Schwerdtfeger, 2012-08-20 Learn to code effectively with ICD-9-CM medical coding and gain a thorough introduction to ICD-10-CM/PCS coding with one book! ICD-9-CM Coding, 2013/2014 Edition combines basic coding principles with proven, practical insight and the ICD-9-CM and ICD-10-CM/ICD-10-PCS Official Guidelines for Coding and Reporting to prepare you for the upcoming implementation of ICD-10-CM/PCS. Whether you're learning to code for the first time or making the transition from ICD-9-CM to ICD-10-CM/PCS, leading medical coding authors Karla Lovaasen and Jennifer Schwerdtfeger deliver the fundamental understanding you need to succeed in hospital and physician settings. Both ICD-9-CM codes and ICD-10-CM/ICD-10-PCS codes are shown in all coding exercises and examples (including answer keys). Emphasis on ICD-10-CM and ICD-10-PCS coding prepares you for the upcoming implementation of ICD-10. MS-DRG documentation and reimbursement details guide you through this key component of the coding process. Line coding exercises and activities challenge you to apply concepts to solve problems. ICD-10 Official Guidelines for Coding and Reporting (OGCR) are included in each coding chapter, immediately following the ICD-9-CM coding guidelines. Full-color A&P content, disease coverage, procedure guidelines, and drug data ensure that you're familiar with key topics affecting medical coding. Medical record coverage introduces the records and documents you'll encounter on the job. Updated Coding Clinic references direct you to the definitive coding resource from the American Hospital Association (AHA). A companion Evolve website provides convenient online access to the OGCR, medical and surgical root operations definitions, a MS-DRG list, partial answer keys, and more.

icd 10 code for history of radiation therapy: 2018 ICD-10-CM Standard Edition - E-Book Carol J. Buck, 2017-10-13 - Updated 2018 Official Code set reflects the latest ICD-10 codes needed for diagnosis coding. - NEW! Key terms are highlighted making code selection faster and easier.
