ice breaker questions for college students: *Qualitative Data Collection Tools* Felice D. Billups, 2019-12-20 Qualitative Data Collection Tools is a new and unique supplementary text that will guide students and new researchers to design, develop, pilot, and employ qualitative tools in order to collect qualitative data. An often-omitted subject in general qualitative textbooks, qualitative tools form the backbone of the data collection process. Students and new researchers are frequently left to create their own qualitative tools from scratch, an unnecessary hurdle in the qualitative research design process. Author Felice D. Billups has used her experience as a qualitative researcher, and in teaching and advising students about qualitative research, to develop the templates in this book as a starting point for readers conducting original qualitative research. The author briefly describes each method of data collection and offers readers suggestions for using and adapting the qualitative instrument templates within the text. Templates of interview protocols, focus group moderator guides, content analysis tools, document analysis tools, reflective questionnaires, diary and journal logs, and observational rubrics give the reader either a cut-and-paste solution for their own research or a starting point to design their own personalized qualitative tools. The first three chapters illuminate the qualitative data collection process and the role each type of qualitative tool plays in that process. The next six chapters provide detailed guides

and numerous templates for each qualitative data collection method, covering interviews, focus groups, conversation and discourse analysis, observations, document analysis, field notes, journaling, and other reflective practices. A final chapter pulls together the multifaceted nature of qualitative research design and connects each tool back to the methodology to ensure trustworthiness and rigor in the data collection and instrument development process. Exemplars populate the appendices, offering readers concrete inspiration for ways to use and adapt the tools provided. If you have ever puzzled over how to best to design qualitative tools in order to guide and structure your qualitative data collection, or if you are embarking on your first qualitative study, *Qualitative Data Collection Tools* will give you a practical starting point to help make your qualitative data collection process easier and more organized.

ice breaker questions for college students: Class and Campus Life Elizabeth M. Lee, 2016-05-10 In 2015, the New York Times reported, The bright children of janitors and nail salon workers, bus drivers and fast-food cooks may not have grown up with the edifying vacations, museum excursions, daily doses of NPR and prep schools that groom Ivy applicants, but they are coveted candidates for elite campuses. What happens to academically talented but economically challenged first-gen students when they arrive on campus? Class markers aren't always visible from a distance, but socioeconomic differences permeate campus life—and the inner experiences of students—in real and sometimes unexpected ways. In *Class and Campus Life*, Elizabeth M. Lee shows how class differences are enacted and negotiated by students, faculty, and administrators at an elite liberal arts college for women located in the Northeast. Using material from two years of fieldwork and more than 140 interviews with students, faculty, administrators, and alumnae at the pseudonymous Linden College, Lee adds depth to our understanding of inequality in higher education. An essential part of her analysis is to illuminate the ways in which the students' and the college's practices interact, rather than evaluating them separately, as seemingly unrelated spheres. She also analyzes underlying moral judgments brought to light through cultural connotations of merit, hard work by individuals, and making it on your own that permeate American higher education. Using students' own descriptions and understandings of their experiences to illustrate the complexity of these issues, Lee shows how the lived experience of socioeconomic difference is often defined in moral, as well as economic, terms, and that tensions, often unspoken, undermine students' senses of belonging.

ice breaker questions for college students: Research, Advocacy, and Political Engagement Sally Tannenbaum, 2023-07-03 As institutions of higher education embrace civic engagement, service learning has emerged as a most effective way to engage students in field

experiences where they will confront profound questions of the relevance of academic learning to addressing community needs. Each volume in this series is organized around a specific community issue, and provides multiple perspectives on both the theoretical foundations for understanding the issues, and purposeful approaches to addressing them. The contributors to these books—who represent disciplines in the sciences, humanities and social sciences—offer vivid examples of how they have integrated civic engagement in their courses, explain their objectives, and demonstrate how they assess outcomes. To stimulate adaptation of the approaches described in these books, each volume includes an Activity / Methodology table that summarizes key elements of each example, such as class size, type of community partner, the activity and the methodology or pedagogy employed, and potential applications of the example in other disciplines. This volume presents inventive approaches to using service learning to introduce students to political engagement. The work of faculty representing a wide variety of disciplines, this compilation of innovative and varied courses offers models to adapt and ideas to stimulate the creativity of instructors. The contributors view political engagement from distinct vantage points. Political scientists look at political engagement from a more traditional perspective. Mathematicians develop courses that explore the statistical implications. Economists focus on cost benefit analysis. Business professors provide an entrepreneurial angle. Feminists consider the language implications of political engagement. The chapters in this book describe how teachers in Politics, Education, Urban and Regional Planning, Business, Communications, Sociology, Mathematics, Economics, and Women's Studies have created effective activities that advance disciplinary knowledge, develop collaboration with communities, and engage students in the political process.
