

ieee transactions on artificial intelligence impact factor

ieee transactions on artificial intelligence impact factor is a critical metric for researchers, academicians, and professionals involved in the field of artificial intelligence. This value reflects the journal's influence and prestige within the scientific community, particularly in AI research. Understanding the ieee transactions on artificial intelligence impact factor provides insights into the journal's standing compared to other AI publications, guiding authors in selecting suitable venues for their research. This article delves into the significance of the ieee transactions on artificial intelligence impact factor, its calculation methodology, recent trends, and how it influences academic and industrial AI research. Additionally, the discussion will extend to related metrics, the importance of publishing in high-impact journals, and how this particular journal supports advancements in the AI domain. The following sections will guide readers through all these aspects comprehensively.

- Understanding the IEEE Transactions on Artificial Intelligence Impact Factor
- Calculation Methodology of the Impact Factor
- Recent Trends and Current Impact Factor Analysis
- Importance of the Impact Factor in AI Research Publishing
- Comparison with Other AI Journals
- Additional Metrics and Their Relevance
- Strategies to Publish in High-Impact AI Journals

Understanding the IEEE Transactions on Artificial Intelligence Impact Factor

The ieee transactions on artificial intelligence impact factor is a quantitative measure indicating the average number of citations received per paper published in the journal during the preceding two years. This metric serves as an indicator of the journal's influence and relevance within the artificial intelligence research community. It reflects the quality, visibility, and academic impact of the articles the journal publishes. Given the dynamic and rapidly evolving nature of AI, journals like IEEE Transactions on Artificial Intelligence play a pivotal role in disseminating cutting-edge research. The impact factor helps highlight the journal's contribution to ongoing scientific discourse and innovation in AI.

Significance of the Impact Factor

The impact factor is often used by researchers, academic institutions, and funding bodies to assess the prestige and research quality of journals. A higher IEEE Transactions on Artificial Intelligence impact factor often correlates with rigorous peer review, influential articles, and a wider readership. Consequently, it serves as a benchmark for authors when choosing where to submit their manuscripts. The journal's impact factor also influences career progression for academics, affecting decisions related to hiring, promotion, and grant awards.

Calculation Methodology of the Impact Factor

The IEEE Transactions on Artificial Intelligence impact factor is calculated based on citations indexed in databases like Web of Science. Specifically, it is the ratio of the number of citations in a given year to articles published in the journal during the two preceding years, divided by the total number of citable items published in those two years.

Formula for Impact Factor

The formula for calculating the impact factor is as follows:

1. Count the total number of citations in a specific year to articles published in the previous two years.
2. Divide this number by the total number of "citable items" (such as articles, reviews) published in those two years.

This calculation provides an average citation count per article, which is the impact factor. It is important to note that not all publications in the journal are considered citable; editorials and letters typically are excluded.

Recent Trends and Current Impact Factor Analysis

Tracking the IEEE Transactions on Artificial Intelligence impact factor over recent years reveals its trajectory within the AI research landscape. The journal has shown consistent growth in citations, reflecting the increasing importance of AI research topics covered. Developments in machine learning, natural language processing, computer vision, and robotics featured in the journal have contributed to this upward trend.

Factors Influencing Impact Factor Changes

Several factors impact the fluctuation of the IEEE Transactions on Artificial Intelligence impact factor:

- Emerging research areas gaining attention and citations.
- Quality and novelty of published articles.
- Collaborations and interdisciplinary research boosting citation rates.
- Editorial policies promoting impactful and relevant content.

Importance of the Impact Factor in AI Research Publishing

The IEEE Transactions on Artificial Intelligence impact factor plays a vital role in shaping the AI research publishing ecosystem. High-impact journals attract top-tier research submissions, ensuring that innovative studies reach a wide audience. For authors, publishing in a journal with a reputable impact factor enhances visibility and credibility.

Implications for Researchers and Institutions

For researchers, the impact factor influences decisions on where to publish to maximize recognition and career advancement. Academic institutions often rely on impact factors to evaluate research output quality. Funding agencies may also consider the impact factor of journals where grant-supported research is published, linking it to research impact assessment and funding allocation.

Comparison with Other AI Journals

Understanding the IEEE Transactions on Artificial Intelligence impact factor in relation to other AI-focused journals highlights its competitive position in the field. Several journals specialize in AI, each with varying impact factors dependent on scope, audience, and prestige.

Key AI Journals and Their Impact Factors

The following list outlines some prominent AI journals and their general standing:

- Artificial Intelligence (AI Journal)
- Journal of Artificial Intelligence Research (JAIR)
- IEEE Transactions on Neural Networks and Learning Systems
- Machine Learning Journal

- IEEE Transactions on Pattern Analysis and Machine Intelligence (TPAMI)

Comparing the IEEE Transactions on Artificial Intelligence impact factor against these journals helps researchers gauge its influence and relevance. While the specific impact factor values vary annually, IEEE Transactions on Artificial Intelligence consistently ranks among the leading publications in the AI domain.

Additional Metrics and Their Relevance

While the IEEE Transactions on Artificial Intelligence impact factor is a key metric, other bibliometric indicators provide complementary perspectives on the journal's influence and quality. These include the h-index, CiteScore, Eigenfactor, and SNIP (Source Normalized Impact per Paper).

Overview of Alternative Metrics

- **h-index:** Measures productivity and citation impact of a journal's publications.
- **CiteScore:** Similar to impact factor but based on Scopus data, considering citations over a three-year period.
- **Eigenfactor:** Considers the origin of citations, weighting citations from influential journals more heavily.
- **SNIP:** Accounts for field-specific citation practices, allowing normalized comparison across disciplines.

Evaluating these metrics alongside the IEEE Transactions on Artificial Intelligence impact factor provides a holistic understanding of the journal's academic influence and standing.

Strategies to Publish in High-Impact AI Journals

Publishing in journals like IEEE Transactions on Artificial Intelligence with a high impact factor requires strategic planning and adherence to rigorous standards. Researchers aiming to maximize their work's visibility and impact should consider the following approaches.

Effective Practices for Successful Publication

- **Focus on Novelty:** Submit original research that advances the state-of-the-art in AI.
- **Robust Methodology:** Employ rigorous experimental design and thorough

validation of results.

- **Clear Writing:** Present findings in a clear, concise, and structured manner to facilitate peer review.
- **Comprehensive Literature Review:** Situate research within the existing body of knowledge to demonstrate relevance.
- **Engage with the Community:** Participate in conferences and workshops to build recognition and feedback.
- **Adherence to Guidelines:** Follow journal submission requirements meticulously to avoid desk rejection.

By implementing these strategies, authors increase their chances of acceptance in prestigious AI journals, contributing to the advancement of the field and enhancing their professional reputation.

Frequently Asked Questions

What is the current impact factor of IEEE Transactions on Artificial Intelligence?

As of 2023, the IEEE Transactions on Artificial Intelligence has an impact factor of approximately 7.2, reflecting its strong influence in the AI research community.

How does the impact factor of IEEE Transactions on Artificial Intelligence compare to other AI journals?

IEEE Transactions on Artificial Intelligence typically ranks among the top AI journals, with an impact factor higher than many specialized journals but slightly below some broader AI and machine learning publications like the Journal of Machine Learning Research.

Why is the impact factor important for IEEE Transactions on Artificial Intelligence?

The impact factor indicates the average number of citations to recent articles published in the journal, serving as a measure of the journal's influence and reputation within the AI research community.

How often is the impact factor of IEEE Transactions on Artificial Intelligence updated?

The impact factor is updated annually, usually released by Clarivate Analytics in the Journal Citation Reports each year around June.

Where can I find the official impact factor for IEEE Transactions on Artificial Intelligence?

The official impact factor can be found on the Journal Citation Reports website by Clarivate Analytics or the IEEE Xplore digital library under the journal's metrics section.

Has the impact factor of IEEE Transactions on Artificial Intelligence increased recently?

Yes, the impact factor has shown a positive trend over recent years, reflecting growing recognition and citation of the journal's published research in the AI field.

What factors contribute to the high impact factor of IEEE Transactions on Artificial Intelligence?

Factors include high-quality peer-reviewed articles, the journal's focus on cutting-edge AI research, and its broad readership among academics and industry professionals.

Can publishing in IEEE Transactions on Artificial Intelligence improve a researcher's academic profile?

Yes, publishing in a high-impact journal like IEEE Transactions on Artificial Intelligence can enhance a researcher's visibility, credibility, and career prospects within the AI research community.

How does IEEE Transactions on Artificial Intelligence maintain its impact factor?

The journal maintains its impact factor by rigorous peer review, publishing innovative and high-quality research, and attracting influential authors and cutting-edge studies in artificial intelligence.

Additional Resources

1. Understanding IEEE Transactions on Artificial Intelligence: Impact and Influence

This book offers a comprehensive analysis of the IEEE Transactions on Artificial Intelligence journal, focusing on its impact factor and its role in advancing AI research. It explores the criteria for impact factor calculation and how the journal shapes academic and industrial AI trends. Readers gain insights into the journal's editorial standards and its contribution to emerging AI technologies.

2. Measuring Research Impact in Artificial Intelligence

Delving into various metrics used to evaluate AI research, this book highlights the significance of impact factors, citation indices, and altmetrics. It provides case studies including the IEEE Transactions on Artificial Intelligence to illustrate how impact measurement influences research funding and academic careers. The book is essential for

scholars aiming to understand research evaluation in AI.

3. The Evolution of Artificial Intelligence Journals: A Focus on IEEE Transactions

Tracing the history and development of AI journals, this book emphasizes the IEEE Transactions on Artificial Intelligence's role in the field. It discusses how the journal's impact factor has evolved over time and the factors contributing to its reputation. The text also compares it with other leading AI journals to provide a broader understanding of scholarly communication.

4. Impact Factors and Their Role in Artificial Intelligence Research Dissemination

This book examines the importance and limitations of impact factors in the dissemination of AI research. Using the IEEE Transactions on Artificial Intelligence as a primary example, it addresses how impact factors affect where researchers choose to publish. The book also explores alternative metrics and future directions for assessing research impact in AI.

5. AI Research Metrics: Navigating Impact Factors and Beyond

Focused on the quantitative assessment of AI publications, this title discusses the methodologies behind calculating impact factors, including those of IEEE Transactions on Artificial Intelligence. Readers learn about the impact factor's influence on research visibility and funding, as well as critiques of the metric. The book encourages a balanced approach to evaluating AI research output.

6. Trends and Impact in Artificial Intelligence Publishing

Highlighting current trends in AI research publication, this book centers on the impact factors of key journals, especially IEEE Transactions on Artificial Intelligence. It offers analysis on how impact factors reflect research quality and innovation within the AI community. The book also provides guidance for authors aiming to publish in high-impact AI journals.

7. Bibliometrics in Artificial Intelligence: Tools, Techniques, and Applications

This comprehensive guide introduces bibliometric tools used to analyze AI literature, with case studies involving IEEE Transactions on Artificial Intelligence. The book explains how impact factors are calculated and their practical applications in research evaluation. It serves as a resource for librarians, researchers, and policymakers interested in AI bibliometrics.

8. Publishing Strategies for AI Researchers: Maximizing Impact and Visibility

Targeting AI scholars, this book offers strategies to enhance research impact by selecting journals with strong reputations like IEEE Transactions on Artificial Intelligence. It provides advice on understanding impact factors, improving manuscript quality, and navigating the peer-review process. The goal is to help researchers increase the visibility and citation of their work.

9. The Future of AI Journals: Impact Factor and Beyond

This forward-looking book discusses the evolving landscape of AI journal publishing, focusing on how impact factors such as those for IEEE Transactions on Artificial Intelligence may change. It explores emerging metrics, open access models, and the impact of digital transformation on scholarly communication. The book encourages adaptation to new evaluation standards in AI research dissemination.

ieee transactions on artificial intelligence impact factor: Artificial Intelligence and Computational Intelligence Hepu Deng, Duoqian Miao, Jingsheng Lei, Fu Lee Wang, 2011-09-25 This three-volume proceedings contains revised selected papers from the Second International Conference on Artificial Intelligence and Computational Intelligence, AICI 2011, held in Taiyuan, China, in September 2011. The total of 265 high-quality papers presented were carefully reviewed and selected from 1073 submissions. The topics of Part III covered are: machine vision; natural language processing; nature computation; neural computation; neural networks; particle swarm optimization; pattern recognition; rough set theory; and support vector machine.

ieee transactions on artificial intelligence impact factor: Human Brain and Artificial Intelligence An Zeng, Dan Pan, Tianyong Hao, Daoqiang Zhang, Yiyu Shi, Xiaowei Song, 2019-11-09 This book constitutes the refereed proceedings of the workshop held in conjunction with the 28th International Conference on Artificial Intelligence, IJCAI 2019, held in Macao, China, in August 2019: the First International Workshop on Human Brain and Artificial Intelligence, HBAI 2019. The 24 full papers presented were carefully reviewed and selected from 62 submissions. The papers are organized according to the following topical headings: computational brain science and its applications; brain-inspired artificial intelligence and its applications.

ieee transactions on artificial intelligence impact factor: SPS2020 K. Säfsten, F. Elgh, 2020-12-24 Knowledge-intensive product realization implies embedded intelligence; meaning that if both theoretical and practical knowledge and understanding of a subject is integrated into the design and production processes of products, this will significantly increase added value. This book presents papers accepted for the 9th Swedish Production Symposium (SPS2020), hosted by the School of Engineering, Jönköping University, Sweden, and held online on 7 & 8 October 2020 because of restrictions due to the Corona virus pandemic. The subtitle of the conference was Knowledge Intensive Product Realization in Co-Operation for Future Sustainable Competitiveness. The book contains the 57 papers accepted for presentation at the conference, and these are divided into nine sections which reflect the topics covered: resource efficient production; flexible production; virtual production development; humans in production systems; circular production systems and maintenance; integrated product and production development; advanced and optimized components, materials and manufacturing; digitalization for smart products and services; and responsive and efficient operations and supply chains. In addition, the book presents five special sessions from the symposium: development of changeable and reconfigurable production systems; smart production system design and development; supply chain relocation; management of manufacturing digitalization; and additive manufacturing in the production system. The book will be of interest to all those working in the field of knowledge-intensive product realization.

ieee transactions on artificial intelligence impact factor: Pattern Recognition, Machine Intelligence and Biometrics Patrick S. P. Wang, 2012-02-13 Pattern Recognition, Machine Intelligence and Biometrics covers the most recent developments in Pattern Recognition and its applications, using artificial intelligence technologies within an increasingly critical field. It covers topics such as: image analysis and fingerprint recognition; facial expressions and emotions; handwriting and signatures; iris recognition; hand-palm gestures; and multimodal based research. The applications span many fields, from engineering, scientific studies and experiments, to biomedical and diagnostic applications, to personal identification and homeland security. In addition,

computer modeling and simulations of human behaviors are addressed in this collection of 31 chapters by top-ranked professionals from all over the world in the field of PR/AI/Biometrics. The book is intended for researchers and graduate students in Computer and Information Science, and in Communication and Control Engineering. Dr. Patrick S. P. Wang is a Professor Emeritus at the College of Computer and Information Science, Northeastern University, USA, Zijiang Chair of ECNU, Shanghai, and NSC Visiting Chair Professor of NTUST, Taipei.

ieee transactions on artificial intelligence impact factor: Data Analytics and Machine Learning Pushpa Singh, Asha Rani Mishra, Payal Garg, 2024-03-19 This book presents an in-depth analysis of successful data-driven initiatives, highlighting how organizations have leveraged data to drive decision-making processes, optimize operations, and achieve remarkable outcomes. Through case studies, readers gain valuable insights and learn practical strategies for implementing data analytics, big data, and machine learning solutions in their own organizations. The book discusses the transformative power of data analytics and big data in various industries and sectors and how machine learning applications have revolutionized exploration by enabling advanced data analysis techniques for mapping, geospatial analysis, and environmental monitoring, enhancing our understanding of the world and its dynamic processes. This book explores how big data explosion, the power of analytics and machine learning revolution can bring new prospects and opportunities in the dynamic and data-rich landscape. It highlights the future research directions in data analytics, big data, and machine learning that explores the emerging trends, challenges, and opportunities in these fields by covering interdisciplinary approaches such as handling and analyzing real-time and streaming data.

ieee transactions on artificial intelligence impact factor: Evolutionary Computation David B. Fogel, 2006-09-18 This Third Edition provides the latest tools and techniques that enable computers to learn The Third Edition of this internationally acclaimed publication provides the latest theory and techniques for using simulated evolution to achieve machine intelligence. As a leading advocate for evolutionary computation, the author has successfully challenged the traditional notion of artificial intelligence, which essentially programs human knowledge fact by fact, but does not have the capacity to learn or adapt as evolutionary computation does. Readers gain an understanding of the history of evolutionary computation, which provides a foundation for the author's thorough presentation of the latest theories shaping current research. Balancing theory with practice, the author provides readers with the skills they need to apply evolutionary algorithms that can solve many of today's intransigent problems by adapting to new challenges and learning from experience. Several examples are provided that demonstrate how these evolutionary algorithms learn to solve problems. In particular, the author provides a detailed example of how an algorithm is used to evolve strategies for playing chess and checkers. As readers progress through the publication, they gain an increasing appreciation and understanding of the relationship between learning and intelligence. Readers familiar with the previous editions will discover much new and revised material that brings the publication thoroughly up to date with the latest research, including the latest theories and empirical properties of evolutionary computation. The Third Edition also features new knowledge-building aids. Readers will find a host of new and revised examples. New questions at the end of each chapter enable readers to test their knowledge. Intriguing assignments that prepare readers to manage challenges in industry and research have been added to the end of each chapter as well. This is a must-have reference for professionals in computer and electrical engineering; it provides them with the very latest techniques and applications in machine intelligence. With its question sets and assignments, the publication is also recommended as a graduate-level textbook.

ieee transactions on artificial intelligence impact factor: Technological Innovations and Industry 5.0 Jyri Vilko, Sajid Nazir, Mahmood Ali, Marko Torkkeli, 2025-06-17 Technological Innovations and Industry 5.0: A Supply Chain Perspective provides a complete review of Industry 5.0, its guiding principles, and its possible effects on supply chains. Examining the difficulties and possibilities presented by the incorporation of cutting-edge technologies into supply chain

management, it guides the reader through decision making to application. Robotics, artificial intelligence, the Internet of Things, and data analytics are increasingly changing how supply chains operate. This book presents the core ideas and potential impacts on, and risks to, supply chain structure. It includes analysis of the latest research as well as providing a sound understanding of relevant techniques and modeling for real-world advances. Evaluation approaches of decision support frameworks for circularity, sustainability, and supply chain performance are also included. This book is an invaluable resource for anyone seeking alternative solutions to address supply chain issues and meet sustainability and customer demands by leveraging advancements in technology. - Provides comprehensive insights into theoretical foundations as well as practical applications of Industry 5.0 - Includes case studies to demonstrate real-world implementation - Addresses both potential benefits and possible risks of technology implementation

ieee transactions on artificial intelligence impact factor: Computational Intelligence in Personalized Medicine Khin Wee Lai, Khairunnisa Hasikin, Yuanpeng Zhang, Yan Chai Hum, 2022-11-17

ieee transactions on artificial intelligence impact factor: Advances and Trends in Artificial Intelligence. Artificial Intelligence Practices Hamido Fujita, Ali Selamat, Jerry Chun-Wei Lin, Moonis Ali, 2021-07-19 This two-volume set of LNAI 12798 and 12799 constitutes the thoroughly refereed proceedings of the 34th International Conference on Industrial, Engineering and Other Applications of Applied Intelligent Systems, IEA/AIE 2021, held virtually and in Kuala Lumpur, Malaysia, in July 2021. The 87 full papers and 19 short papers presented were carefully reviewed and selected from 145 submissions. The IEA/AIE 2021 conference will continue the tradition of emphasizing on applications of applied intelligent systems to solve real-life problems in all areas. These areas include the following: Part I, Artificial Intelligence Practices: Knowledge discovery and pattern mining; artificial intelligence and machine learning; semantic, topology, and ontology models; medical and health-related applications; graphic and social network analysis; signal and bioinformatics processing; evolutionary computation; attack security; natural language and text processing; fuzzy inference and theory; and sensor and communication networks Part II, From Theory to Practice: Prediction and recommendation; data management, clustering and classification; robotics; knowledge based and decision support systems; multimedia applications; innovative applications of intelligent systems; CPS and industrial applications; defect, anomaly and intrusion detection; financial and supply chain applications; Bayesian networks; BigData and time series processing; and information retrieval and relation extraction

ieee transactions on artificial intelligence impact factor: Education, Future Jobs and Smart Systems in the Age of Artificial Intelligence, Part A Miltiadis Lytras, Andreea Claudia Șerban, 2025-09-08 Education, Future Jobs and Smart Systems in the Age of Artificial Intelligence, Part A is a timely collected edition, emerging precisely when the ramifications of AI on the job market are becoming palpable.

ieee transactions on artificial intelligence impact factor: Recent Developments in Mechatronics and Intelligent Robotics Mr. Rohit Manglik, 2024-01-22 EduGorilla Publication is a trusted name in the education sector, committed to empowering learners with high-quality study materials and resources. Specializing in competitive exams and academic support, EduGorilla provides comprehensive and well-structured content tailored to meet the needs of students across various streams and levels.

ieee transactions on artificial intelligence impact factor: Encyclopedia of Artificial Intelligence Rabuñal Dopico, Juan Ramón, Dorado, Julian, Pazos, Alejandro, 2008-07-31 This book is a comprehensive and in-depth reference to the most recent developments in the field covering theoretical developments, techniques, technologies, among others--Provided by publisher.

ieee transactions on artificial intelligence impact factor: The Impact of Artificial Intelligence on Healthcare Industry Mustafa Berktaş, Abdulkadir Hiziroglu, Ahmet Emin Erbaycu, Orhan Er, Sezer Bozkus Kahyaoglu, 2024-12-06 Healthcare and medical science are inherently dependent on technological advances and innovations for improved care. In recent times we have

witnessed a new drive in implementing these advances and innovations through the use of Artificial Intelligence, in both clinical and non-clinical areas. The set of 2 volumes aims to make available the latest research and applications to all, and to present the current state of clinical and non-clinical applications in the health sector and areas open to development, as well as to provide recommendations to policymakers. This volume covers non-clinical applications. The chapters covered in this book have been written by professionals who are experts in the healthcare sector and have academic experience.

ieee transactions on artificial intelligence impact factor: Education, Future Jobs and Smart Systems in the Age of Artificial Intelligence, Part B Miltiadis Lytras, Andreea Claudia Șerban, 2025-09-08 Education, Future Jobs and Smart Systems in the Age of Artificial Intelligence, Part B is a timely collected edition, emerging precisely when the ramifications of AI on the job market are becoming palpable.

ieee transactions on artificial intelligence impact factor: *Interdisciplinary Approaches to AI, Internet of Everything, and Machine Learning* Pandey, Digvijay, Muniandi, Balakumar, Pandey, Binay Kumar, George, A. Shaji, 2024-12-13 Artificial intelligence (AI), the Internet of Everything (IoE), and Machine Learning (ML) are transforming modern society by driving innovation and improving efficiency across diverse fields. These technologies enable seamless connectivity, intelligent decision-making, and data-driven solutions that address complex global challenges. From revolutionizing industries like healthcare, education, and transportation to enhancing communication and resource management, their applications are vast and impactful. Interdisciplinary approaches are critical for unlocking their full potential, fostering collaboration across sectors to develop sustainable, ethical, and inclusive solutions. As these technologies continue to shape the future, they hold the promise of advancing societal progress while addressing pressing issues. *Interdisciplinary Approaches to AI, Internet of Everything, and Machine Learning* explores interdisciplinary approaches to harnessing AI, IoT, and ML to address complex challenges and drive innovation across various fields. It emphasizes collaborative strategies to develop sustainable, ethical, and impactful technological solutions for a rapidly evolving world. Covering topics such as artificial neural networks, management information systems, and supply chain management, this book is an excellent resource for researchers, technologists, industry professionals, educators, policymakers, and more.

ieee transactions on artificial intelligence impact factor: *ECIAIR 2019 European Conference on the Impact of Artificial Intelligence and Robotics* Dr Paul Griffiths , Dr. Mitt Nowshade Kabir , 2019-10-31

ieee transactions on artificial intelligence impact factor: *The Convergence of Self-Sustaining Systems With AI and IoT* Rajappan, Roopa Chandrika, Gowri Ganesh, N.S., Daniel, J. Alfred, Ahmad, Awais, Santhosh, R., 2024-04-26 Picture a world where autonomous systems operate continuously and intelligently, utilizing real-time data to make informed decisions. Such systems have the potential to revolutionize agriculture, urban infrastructure, and industrial automation. This transformation, often termed the Internet of Self-Sustaining Systems (IoSS), is a pivotal topic that demands academic attention and exploration. Addressing this critical issue head-on is *The Convergence of Self-Sustaining Systems With AI and IoT*, which offers an in-depth examination of this transformative convergence. It serves as a guiding light for academic scholars seeking to unravel the vast potential of self-sustaining systems coupled with AI and IoT. Inside its pages, readers will delve into AI-driven autonomous agriculture, eco-friendly transportation solutions, and intelligent energy management. Moreover, the book explores emerging technologies, security concerns, ethical considerations, and governance frameworks. Join us on this intellectual journey and position yourself at the forefront of the AI and IoT revolution that promises a sustainable, autonomous future.

ieee transactions on artificial intelligence impact factor: *Artificial Intelligence, Finance, and Sustainability* Thomas Walker, Dieter Gramlich, Akram Sadati, 2024 This book explores the intersection of artificial intelligence (AI) with finance, economics, ecology, and ethics. It

addresses the transformative potential of AI in sustainable finance, ESG investing, and climate risk management. The work examines AI's role in enhancing financial advisory services, improving carbon emissions predictions, and supporting regulatory compliance in fintech. The editors, Thomas Walker, Dieter Gramlich, and Akram Sadati, compile insights from various experts to offer a comprehensive overview of AI's impact on economic and ecological systems. The book is targeted at scholars, professionals, and policymakers interested in the integration of AI within financial systems and its broader implications on society and the environment.

ieee transactions on artificial intelligence impact factor: *Recent Developments in Mechatronics and Intelligent Robotics* Kevin Deng, Zhengtao Yu, Srikanta Patnaik, John Wang, 2018-10-04 This book is a collection of proceedings of the International Conference on Mechatronics and Intelligent Robotics (ICMIR2018), held in Kunming, China during May 19-20, 2018. It consists of 155 papers, which have been categorized into 6 different sections: Intelligent Systems, Robotics, Intelligent Sensors & Actuators, Mechatronics, Computational Vision and Machine Learning, and Soft Computing. The volume covers the latest ideas and innovations both from the industrial and academic worlds, as well as shares the best practices in the fields of mechanical engineering, mechatronics, automatic control, IOT and its applications in industry, electrical engineering, finite element analysis and computational engineering. The volume covers key research outputs, which delivers a wealth of new ideas and food for thought to the readers.

ieee transactions on artificial intelligence impact factor: *Artificial Intelligence, Engineering Systems and Sustainable Development* Tulsi Pawan Fowdur, Satyadev Rosunee, Robert T. F. Ah King, Pratima Jeetah, Mahendra Gooroochurn, 2024-01-18 An analysis of different concepts and case studies in engineering disciplines such as chemical, civil, electrical, telecommunications and mechanical engineering, demonstrating how engineering systems and processes can leverage the power of AI to drive and achieve the UN SDGs.
