iggy peck architect book: Perfect Pairs, K-2 Melissa Stewart, Nancy Chesley, 2023-10-10 Hands-on lessons can be fun and compelling, but when it comes to life science, they aren't always possible, practical, effective, or safe. Children can't follow a lion as it stalks a gazelle, visit the exotic kapok tree in a rain forest, or swim alongside the underwater life in a pond. But they can explore a whole world of animals, plants, and ecosystems through the pages of beautifully illustrated, science-themed picture books. Perfect Pairs, which marries fiction and nonfiction picture books focused on life science, helps educators think about and teach life science in a whole new way. Each of the twenty-two lessons in this book is built around a pair of books that introduces a critical life science concept and guides students through an inquiry-based investigative process to explore that idea—from animal/environment interactions to the role of structure in plant and animal survival, from inheritance of traits to variation of species. Each lesson starts with a Wonder Statement- and comprises three stages. Engaging Students- features a hands-on activity that captures student interest, uncovers current thinking, and generates vocabulary. The heart of the investigative

process, *Exploring with Students*, - spotlights the paired books as the teacher reads aloud and helps students find and organize information into data tables. *Encouraging Students to Draw Conclusions* shows students how to review and analyze the information they have collected. Bringing high-quality science-themed picture books into the classroom engages a broad range of students, addresses the Performance Expectations outlined in the Next Generation Science Standards, and supports the goals of the Common Core State Standards for English Language Arts. Even if you are science shy, *Perfect Pairs* can help you become a more confident teacher whose classroom buzzes with curious students eager to explore their natural world.

iggy peck architect book: Start with Joy Katie Cunningham, 2023-10-10 In Start with Joy: Designing Literacy Learning for Student Happiness, author Katie Cunningham links what we know from the science of happiness with what we know about effective literacy instruction. When given a choice about what to write, children express hopes, fears, and reactions to life's experiences. Literacy learning is full of opportunities for students to learn tools to live a happy life. Inside, you'll find: Seven Pillars: Cunningham discusses the seven pillars that guide her classrooms and are involved in each literacy lesson's Connection, Choice, Challenge, Play, Story, Discovery, and

Movement. Ten Invitations: Designed for teachers to improvise and make their own, these ten lessons may be presented at any time of year in the context of any unit and include children's literature suggestions as well as recommended teacher talk to meet children's specific needs. Teaching Tools: Tools and resources that will help students tell their stories and make literacy learning something all students celebrate and cherish. This book honors the adventure that learning is meant to be and aims to make happiness more tangible in the classroom. By infusing school days with happiness, teachers can support children as they become stronger readers, writers, and thinkers, while also helping them learn that strength comes from challenge, and joy comes from leading a purposeful life.
