

# iehp behavioral health providers

**iehp behavioral health providers** are essential components of the Inland Empire Health Plan (IEHP) network, offering critical mental health and substance use disorder services to members across the Inland Empire region. These providers encompass a wide range of professionals, including psychiatrists, psychologists, therapists, and counselors who specialize in behavioral health care. Understanding the scope, benefits, and accessibility of IEHP behavioral health providers can help members make informed decisions about their mental wellness. This article explores the various aspects of IEHP's behavioral health services, the types of providers available, how to access care, and the importance of integrated behavioral health in promoting overall health outcomes. The following sections will provide a comprehensive overview of IEHP behavioral health providers and their role in supporting behavioral health needs for IEHP members.

- Overview of IEHP Behavioral Health Providers
- Types of Behavioral Health Services Offered
- How to Access IEHP Behavioral Health Providers
- Benefits of Using IEHP Behavioral Health Providers
- Common Conditions Treated by IEHP Behavioral Health Providers
- Integration of Behavioral Health and Primary Care

## Overview of IEHP Behavioral Health Providers

IEHP behavioral health providers are a network of qualified professionals committed to delivering comprehensive mental health and substance use disorder services. IEHP (Inland Empire Health Plan) is a publicly operated health plan that serves residents of Riverside and San Bernardino counties in California. Behavioral health providers within this network are equipped to address a wide range of psychological and emotional challenges through evidence-based treatment modalities. Their role is vital in helping IEHP members achieve improved mental wellness, manage chronic conditions, and enhance quality of life.

This network includes licensed clinical social workers, psychologists, psychiatrists, licensed marriage and family therapists, and other certified counselors. These providers collaborate with primary care physicians and other healthcare professionals to ensure coordinated care tailored to each member's unique needs.

## Types of Behavioral Health Services Offered

IEHP behavioral health providers offer a broad spectrum of services designed to meet the diverse

needs of members. These services range from preventive care and early intervention to intensive treatment programs for complex behavioral health conditions.

## **Mental Health Counseling and Therapy**

Mental health counseling includes individual, group, and family therapy sessions aimed at treating anxiety, depression, trauma, and other psychological issues. Licensed therapists use approaches such as cognitive-behavioral therapy (CBT), dialectical behavior therapy (DBT), and trauma-informed care to support members' mental health.

## **Psychiatric Services**

Psychiatrists within the IEHP network provide diagnostic assessments, medication management, and ongoing psychiatric care for conditions like bipolar disorder, schizophrenia, and severe depression. Medication-assisted treatment (MAT) may also be offered for substance use disorders.

## **Substance Use Disorder Treatment**

Behavioral health providers deliver specialized treatment for substance use disorders, including counseling, detoxification referrals, relapse prevention, and recovery support. These services help members overcome addiction and maintain long-term sobriety.

## **Crisis Intervention and Support**

IEHP behavioral health providers are trained to offer crisis intervention services, including suicide prevention, emergency counseling, and stabilization support during acute behavioral health episodes.

- Individual and group therapy
- Medication management and psychiatric evaluation
- Substance use disorder treatment and recovery programs
- Crisis intervention and stabilization services
- Care coordination and case management

## **How to Access IEHP Behavioral Health Providers**

Accessing behavioral health services through IEHP is streamlined to ensure members receive timely and effective care. IEHP members can initiate services by contacting the plan's customer service or behavioral health department to obtain information about in-network providers.

## Referral Process

Typically, members can self-refer to behavioral health providers or obtain a referral from their primary care physician. IEHP encourages early engagement with behavioral health services to address concerns before they escalate.

## Appointment Scheduling

After selecting a provider, members can schedule appointments based on availability. Many IEHP behavioral health providers offer flexible scheduling, including telehealth options, to accommodate members' needs.

## Insurance Coverage and Costs

Behavioral health services provided by IEHP network providers are covered under the member's health plan benefits. Co-pays, if any, are minimal or waived for eligible services, making mental health care accessible and affordable.

## Benefits of Using IEHP Behavioral Health Providers

Choosing IEHP behavioral health providers offers several advantages to members seeking mental health and substance use disorder care. These benefits contribute to better health outcomes and overall member satisfaction.

- **Comprehensive Care:** Access to a full continuum of behavioral health services tailored to individual needs.
- **Network Coordination:** Seamless coordination with primary care and specialty providers for integrated treatment plans.
- **Accessibility:** Availability of in-person and telehealth sessions to reduce barriers to care.
- **Cost-Effective:** Services are covered under IEHP's plans, minimizing out-of-pocket expenses.
- **Culturally Competent Care:** Providers trained to deliver services sensitive to cultural, linguistic, and community needs in the Inland Empire.
- **Focus on Prevention:** Early intervention programs reduce the risk of chronic behavioral health issues.

# **Common Conditions Treated by IEHP Behavioral Health Providers**

IEHP behavioral health providers treat a broad array of mental health and substance use conditions. Their expertise covers mild to severe disorders, ensuring members receive appropriate care for their specific challenges.

## **Mental Health Disorders**

Commonly treated mental health conditions include:

- Depression and anxiety disorders
- Post-traumatic stress disorder (PTSD)
- Bipolar disorder
- Schizophrenia and other psychotic disorders
- Attention deficit hyperactivity disorder (ADHD)

## **Substance Use Disorders**

Providers offer treatment for various substance use challenges, including:

- Alcohol use disorder
- Opioid and prescription drug addiction
- Marijuana and other illicit drug dependence
- Co-occurring mental health and substance use disorders

## **Integration of Behavioral Health and Primary Care**

IEHP emphasizes the integration of behavioral health services with primary care to promote holistic health management. This approach improves communication among providers, enhances care coordination, and addresses both physical and mental health needs effectively.

## **Benefits of Integrated Care**

Integrated behavioral health models facilitate early detection of mental health issues during primary care visits. Providers work collaboratively to develop comprehensive treatment plans that consider all aspects of a member's health. This reduces fragmentation of care and promotes better adherence to treatment recommendations.

## **Collaborative Care Teams**

IEHP behavioral health providers often participate in multidisciplinary teams alongside primary care physicians, nurses, and care coordinators. These teams ensure continuous monitoring of members' progress and prompt adjustments to treatment as necessary.

- Improved patient outcomes through coordinated care
- Reduced stigma associated with seeking behavioral health treatment
- Enhanced access to mental health services within primary care settings
- Comprehensive management of chronic conditions and behavioral health

## **Frequently Asked Questions**

### **What types of behavioral health services does IEHP provide?**

IEHP provides a range of behavioral health services including therapy, counseling, psychiatric evaluations, medication management, crisis intervention, and substance use disorder treatment.

### **How can I find an IEHP behavioral health provider near me?**

You can find an IEHP behavioral health provider by visiting the IEHP website and using their provider directory, or by calling IEHP member services for assistance.

### **Are IEHP behavioral health services covered for all members?**

Yes, behavioral health services are covered benefits for eligible IEHP members, including those enrolled in Medi-Cal and Medicare plans.

### **Does IEHP offer telehealth options for behavioral health?**

Yes, IEHP offers telehealth services for behavioral health, allowing members to access therapy and psychiatric care remotely.

## **How do I become an IEHP behavioral health provider?**

To become an IEHP behavioral health provider, you need to apply through the IEHP provider enrollment process, meet credentialing requirements, and complete any necessary training.

## **What is the process for IEHP members to get a referral to a behavioral health provider?**

IEHP members typically can self-refer to behavioral health services, but some services may require a referral from a primary care provider depending on the plan and service type.

## **Does IEHP cover substance use disorder treatment under behavioral health?**

Yes, IEHP covers substance use disorder treatment as part of its behavioral health benefits, including counseling, outpatient, and inpatient services.

## **Are there any special programs for children and youth behavioral health within IEHP?**

IEHP offers specialized behavioral health programs tailored for children and youth, including early intervention and therapy services to address mental health needs.

## **What should I do if I have an urgent behavioral health crisis as an IEHP member?**

If you have an urgent behavioral health crisis, contact emergency services immediately or use IEHP's 24/7 behavioral health crisis hotline for support.

## **How does IEHP support cultural competency among behavioral health providers?**

IEHP provides training and resources to behavioral health providers to ensure culturally competent care that respects the diverse backgrounds of its members.

## **Additional Resources**

### *1. Integrating Behavioral Health into IEHP: A Comprehensive Guide for Providers*

This book offers a detailed overview of how behavioral health services can be effectively integrated within the Inland Empire Health Plan (IEHP) framework. It covers best practices for collaboration between physical and behavioral health providers, addressing common challenges and solutions. Providers will find practical strategies to improve patient outcomes through coordinated care models.

### *2. Behavioral Health Strategies for IEHP Providers: Enhancing Patient Engagement*

Focused on patient engagement, this book explores techniques behavioral health providers can use to connect with IEHP members. It discusses motivational interviewing, culturally sensitive

communication, and the use of technology to support patient adherence to treatment plans. The book also highlights case studies demonstrating successful engagement efforts.

### *3. IEHP Behavioral Health Compliance and Regulatory Guidelines*

This resource is essential for behavioral health providers working within IEHP, detailing the regulatory requirements and compliance standards they must follow. It explains documentation best practices, privacy laws like HIPAA, and IEHP-specific billing procedures. The book helps providers navigate the complex legal landscape while maintaining high-quality care.

### *4. Trauma-Informed Care for IEHP Behavioral Health Providers*

Addressing the importance of trauma-informed care, this book guides IEHP behavioral health providers in recognizing and responding to trauma among their patients. It covers screening tools, therapeutic approaches, and ways to create a safe and supportive environment. Providers will learn how trauma-informed practices can improve treatment effectiveness and patient trust.

### *5. Coordinated Care Models within IEHP Behavioral Health Services*

This book examines various coordinated care models that IEHP behavioral health providers can implement to enhance service delivery. It highlights integrated care teams, case management, and communication strategies that promote holistic treatment. The text includes examples of successful models and metrics for evaluating their impact.

### *6. Cultural Competency in Behavioral Health Care for IEHP Providers*

Understanding and respecting cultural differences is crucial in behavioral health care. This book helps IEHP providers develop cultural competency skills to better serve diverse patient populations. It discusses cultural beliefs about mental health, language barriers, and tailored intervention strategies to ensure equitable care.

### *7. Using Data Analytics to Improve Behavioral Health Outcomes in IEHP*

This guide introduces behavioral health providers to data analytics tools and methods relevant to IEHP services. It explains how to collect, analyze, and interpret data to identify trends, measure outcomes, and inform clinical decision-making. The book also explores how data-driven approaches can enhance quality improvement initiatives.

### *8. Substance Use Disorder Treatment Approaches for IEHP Behavioral Health Providers*

Focusing on substance use disorders (SUD), this book provides evidence-based treatment approaches tailored for IEHP members. It covers assessment, medication-assisted treatment, counseling techniques, and relapse prevention strategies. Providers will find guidance on collaborating with other health professionals to support recovery.

### *9. Telebehavioral Health Practices in IEHP: Opportunities and Challenges*

This book explores the growing field of telebehavioral health within the IEHP network. It discusses technological platforms, patient privacy concerns, and best practices for delivering remote behavioral health services. The text also addresses challenges such as accessibility and provider training, offering solutions to optimize virtual care delivery.

**iehp behavioral health providers: Work at Home with a Real Online Job** AnnaMaria Bliven, 2016-03-02 Find the Job You Want . . . Today! Are you a work at home mom or dad, retiree, or disabled person hoping to earn a little extra to make ends meet? Are you seeking a legitimate, rewarding online job you can do from home? Do you dream of being in charge of your own schedule, income, advancement . . . destiny? If you said yes to any of these questions, this book is for you! In *Work at Home with a Real Job Online* you can find just the right job, schedule, income, and future with the help of a leading expert in the field of online job success and prosperity, AnnaMaria Bliven. Known as the "Prosperity Princess" by thousands of people she has helped, Bliven has poured her latest and greatest practical, proven-effective insights into this one information-packed (no filler), easy-to-use volume. In these pages you'll find: • Hundreds of real jobs with quality companies at your fingertips! • Pro tips and advice on how to find these jobs, get hired, keep the job you find and advance in it! • Opportunities for people of all ages and stages: teenagers, college students, work at home moms and dads, military veterans, retirees, the disabled, those with background/credit issues, and more. • Positions to match just about any interest, passion, potential, or skill set: game tester, customer service agent, educator, data entry specialist, nurse, medical coding specialist, transcriptionist, translator, interpreter, artist, writer, computer technologist, and many more. Get your copy of *Work at Home with a Real Job Online* today . . . start working tomorrow!

**iehp behavioral health providers: Integrating Behavioral Health and Primary Care** Dr. Robert Feinstein, Dr. Joseph Connelly, Marilyn Feinstein, 2017-04-13 Integrated care incorporates behavioral and physical health services into primary care and specialty medical environments. These models of care are patient-centered, population focused, and delivered by a multidisciplinary team of medical professionals. This book is practical, office-based, comfortably accessible, and intended for mental health professionals, primary care and medical specialists, and professional health students, residents, and other professionals working in integrated care environments.

**iehp behavioral health providers: The Primary Care Toolkit** Larry James, William O'Donohue, 2008-11-01 Integrated care is receiving a lot of attention from clinicians, administrators, policy makers, and researchers. Given the current healthcare crises in the United States, where costs, quality, and access to care are of particular concern, many are looking for new and better ways of delivering behavioral health services. Integrating behavioral health into primary care medical settings has been shown to: (1) produce healthier patients; (2) produce medical savings; (3) produce higher patient satisfaction; (4) leverage the primary care physician's time so that they can be more productive; and (5) increase physician satisfaction. For these reasons this is an emerging paradigm with a lot of interest and momentum. For example, the President's New Freedom Commission on Mental Health has recently endorsed redesigning the mental health system so that much of this is integrated into primary care medicine.

**iehp behavioral health providers: Quality Improvement in Behavioral Health** William O'Donohue, Alexandros Maragakis, 2016-06-17 This innovative volume presents a cogent case for quality improvement (QI) in behavioral healthcare as ethical practice, solid science, and good business. Divided between foundational concepts, key QI tools and methods, and emerging applications, it offers guidelines for raising care standards while addressing ongoing issues of treatment validity, staffing and training, costs and funding, and integration with medical systems. Expert contributors review the implications and potential of QI in diverse areas such as treatment of entrenched mental disorders, in correctional facilities, and within the professional context of the American Psychological Association. The insights, examples, and strategies featured will increase in value as behavioral health becomes more prominent in integrated care and vital to large-scale health goals. Included in the coverage: Behavioral health conditions: direct treatment costs and indirect

social costs. /iliQuality improvement and clinical psychological science. · Process mapping to improve quality in behavioral health service delivery. · Checklists for quality improvement and evaluation in behavioral health. · Creating a quality improvement system for an integrated care program: the why, what, and how to measure. · Feedback Informed Treatment (FIT): improving the outcome of psychotherapy one person at a time. Quality Improvement i n Behavioral Healthcare gives health psychologists, public health professionals, and health administrators a real-world framework for maintaining quality services in a rapidly evolving health landscape.

**iehp behavioral health providers:** Caring for People with Mental Health and Substance Use Disorders in Primary Care Settings National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Board on Health Care Services, Forum on Mental Health and Substance Use Disorders, 2021-01-30 Behavioral health conditions, which include mental health and substance use disorders, affect approximately 20 percent of Americans. Of those with a substance use disorder, approximately 60 percent also have a mental health disorder. As many as 80 percent of patients with behavioral health conditions seek treatment in emergency rooms and primary care clinics, and between 60 and 70 percent of them are discharged without receiving behavioral health care services. More than two-thirds of primary care providers report that they are unable to connect patients with behavioral health providers because of a shortage of mental health providers and health insurance barriers. Part of the explanation for the lack of access to care lies in a historical legacy of discrimination and stigma that makes people reluctant to seek help and also led to segregated and inhumane services for those facing mental health and substance use disorders. In an effort to understanding the challenges and opportunities of providing essential components of care for people with mental health and substance use disorders in primary care settings, the National Academies of Sciences, Engineering, and Medicine's Forum on Mental Health and Substance Use Disorders convened three webinars held on June 3, July 29, and August 26, 2020. The webinars addressed efforts to define essential components of care for people with mental health and substance use disorders in the primary care setting for depression, alcohol use disorders, and opioid use disorders; opportunities to build the health care workforce and delivery models that incorporate those essential components of care; and financial incentives and payment structures to support the implementation of those care models, including value-based payment strategies and practice-level incentives. This publication summarizes the presentations and discussion of the webinars.

**iehp behavioral health providers:** *Principles of Community-based Behavioral Health Services for Justice-involved Individuals: A Research-based Guide - A bridge to the possible* U.S. Department of Health and Human Services, 2019-03-17 Community-based behavioral health providers and systems have an essential role in serving individuals with mental and substance use disorders who are currently or formerly involved with the criminal justice system. These individuals are a part of every community, and as for all community members with behavioral health needs, individualized, integrated, comprehensive, coordinated, and continuous service is the standard of care. Individuals with behavioral health issues are overrepresented in jails and prisons across the United States.<sup>1</sup> Most of these individuals return to their communities, families, and social networks and subsequently require community-based behavioral and physical health care services. Research has shown that mental and substance use disorders affect people from all walks of life, with or without justice involvement, and, with the services and supports of behavioral health providers, many people recover.

**iehp behavioral health providers:** **Principles of Community-based Behavioral Health Services for Justice-involved Individuals: A Research-based Guide (A bridge to the possible)** Department of Health and Human Services U.S., 2019-11-19 Community-based behavioral health providers and systems have an essential role in serving individuals with mental and substance use disorders who are currently or formerly involved with the criminal justice system. These individuals are a part of every community, and as for all community members with behavioral health needs, individualized, integrated, comprehensive, coordinated, and continuous service is the standard of

care. Individuals with behavioral health issues are overrepresented in jails and prisons across the United States.<sup>1</sup> Most of these individuals return to their communities, families, and social networks and subsequently require community-based behavioral and physical health care services. Research has shown that mental and substance use disorders affect people from all walks of life, with or without justice involvement, and, with the services and supports of behavioral health providers, many people recover.

**iehp behavioral health providers:** *Integrated Behavioral Health in Primary Care* Stephanie B. Gold, Larry A. Green, 2018-11-01 This book provides an evidence-based guide for primary care physicians seeking to integrate behavioral health into their practice. This is grounded in the underlying notion that integrating behavioral health and primary care is not an adjustment to practice but a reconstruction of how primary health care is defined and delivered. While some aspects (billing and financing) will be specific to the policy context in the United States, much of the book will contain universal lessons for an approach to integration from a primary care perspective that may be relevant across the globe. This guide is organized to follow a comprehensive approach, derived from lessons learned by early adopters of integration. Dividing the book in this manner creates a unique and natural flow from the “why” of integrating care to a step-by-step approach to achieve integration in a practice. The book includes the case for why integrating behavioral health is important; what integration looks like in practice; and how to transform a practice and grow a team of clinicians to work together to address mental, emotional, and behavioral problems. Each chapter starts with a short preamble to introduce the stage of integration. Each chapter and subchapter would end with a summary box of key messages and a short list of resources (articles, websites, etc) for further information for each topic. Where relevant, chapters additionally include a brief section on application for specific populations (pediatrics, geriatrics, etc). This is an ideal guide for primary care physicians and their medical and administrative teams interested in integrating behavioral health in their practice.

**iehp behavioral health providers:** The Integrated Behavioral Health Continuum Laurel J. Kiser, Paul M. Lefkowitz, Lawrence L. Kennedy, 2008-11-01 Until recently, behavioral health was defined within the strict dichotomy of inpatient and outpatient care -- a dichotomy that failed to mirror the range and complexity of human experience and clinical needs. Today's integrated system renders this dichotomy obsolete. Instead, service delivery integration processes offer an organized system of care rooted in a common vision and defined by processes intended to promote continuity and quality of care, coordination of efforts, efficiencies of operation, and seamless patient movement through an otherwise bewildering array of health care services. Unique in the literature, this volume brings together distinguished clinicians and policymakers who focus on the operational aspects of developing state-of-the-art integrated delivery systems. History and concept -- Why we need integrated health care delivery systems, including a model of service delivery integration that incorporates current barriers (e.g., ambiguous roles and responsibilities and lack of strategic alignment; how to design integrated delivery systems improving clinical outcomes, achieving fiscal and operating efficiencies, and aligning clinical and fiscal incentives) Structural foundations -- Access to the system of care for patients, payors, and employers; how to design level-of-care criteria; eight strategies that help clients move along the continuum; how to define level of care in today's managed care world; and the process of following therapeutic processes (i.e., philosophies, procedures, and practices used to create or support recovery and wellness) across the continuum Administrative and management processes -- How to reorient staff toward minimizing barriers and making the patient central to the system; documentation/information management and reimbursement (rates and rate structures, risk assumption); current research and its enormous potential to improve every aspect of care; quality assessments based on examining the driving forces behind the needs for monitoring and evaluating quality and outcomes; and the relation of behavioral health care systems, which seek to fully integrate clients and families into the fabric of their community and culture, to other systems A case vignette that highlights -- from the consumer's viewpoint -- the vital role of self-help during an episode of hospitalization and a discussion of future

directions in integrated behavioral health care round out this remarkable volume. With its wealth of strategic and nuts and bolts information -- useful for alliances and single entities alike -- on how to harness operational forces in establishing an effective integrated behavioral health continuum, this volume will be welcomed by those who deliver direct services (psychiatric professionals) and those who administer and manage the integrated financing and delivery of quality care from public (U.S. government agencies) and private (managed care and insurance providers) sectors alike.

**iehp behavioral health providers:** *Behavioral Health Providers and Practitioners*, 2020

**iehp behavioral health providers:** Assuring Quality Mental Health Services Jules Asher, 1981

**iehp behavioral health providers:** **Primary Care Providers' Perceptions of Mental and Behavioral Health Problems in Frontier Areas of Idaho** Alexander A. Theiler, 2011

**iehp behavioral health providers:** Integrated Behavioral Health in Primary Care Christopher L. Hunter, 2009-01-01 The authors of this book draw on research evidence and years of experience to provide practical information and guidance for health care practitioners, especially behavioral health care providers who wish to work more effectively in this fast-paced setting. Interwoven through each chapter are practical tips for success and traps to avoid. The book includes a rich array of reproducible assessment questions, patient handouts, and sample scripts. All of these help the clinician alter his or her assessment and intervention skills in a manner that leads to focused interactions that work well within the fast pace of primary care.

**iehp behavioral health providers:** Collaborative relationships between medical and behavioral health providers in an urban primary care system David S. Hardley, 2014

**iehp behavioral health providers:** **The Evidence-Based Practice** Chris E. Stout, Randy A. Hayes, 2004-11-03 Evidence-Based Practice (EBP), a trend started in the medical community, is rapidly becoming of critical importance to the mental health profession as insurance companies begin to offer preferential pay to organizations using it. Featuring contributions from top researchers in the field, this groundbreaking book covers everything from what EBP is and its relevance to behavioural health to specific models for application and implementation, building best practice protocols, and evaluating bottom-line effectiveness in your organization.

**iehp behavioral health providers:** Integrated Behavioral Healthcare Nicholas A. Cummings, Victoria Follette, Steven C. Hayes, William O'Donohue, 2001-09-05 Healthcare is now practiced in a different financial and delivery system than it was two decades ago. Currently managed care defines what is treated, how, by whom and for what reimbursement. Mental health professionals have been greatly impacted by these changes to their practice, and yet, there is little understanding of exactly what it is and where it is going. The present volume explores these issues, prospects and opportunities from the vantage of mental health /medical professionals and managed care executives who are in the very process of implementing changes to the existing system of managed care. Behavioral healthcare will be integrated into medical practice in the future for sound clinical and economic reasons. The present volume, edited by four prominent mental health professionals provides a roadmap of the emerging directions integrated behavioral healthcare is taking and lays out the steps the mental health professional needs to take--in training, and modifying her/his clinical practice--to adapt to the new system of healthcare. - Leading Experts in managed care - Nicholas Cummings, Father of behavioral managed care - Multidisciplinary approach

**iehp behavioral health providers:** **Integrated Behavioral Health in Primary Care** Mary R. Talen, Aimee Burke Valeras, 2013-06-04 Contributed by experts who've developed integrative healthcare initiatives with strengths in the areas of policy and principles, organizational systems, or clinical practice. These contributors will illustrate the concepts and describe the nuts and bolts of their integration initiatives. In the conclusion of each section, the editors will construct a template to systematically evaluate these essential elements. This template will organize the information to help stakeholders compare and contrast the strengths, resources, limitations and challenges of how each model meets the vision of integrative healthcare. In the concluding section the information in the preceding sections connects to provide a coherent synopsis of the common themes and practices, from the macro to micro levels of care, which foster successful integration of the medical and

psychosocial systems.

**iehp behavioral health providers: Behavioral Medicine and Integrated Care** Melanie P. Duckworth, William T. O'Donohue, 2018-10-12 This evidence-to-practice volume deftly analyzes the processes and skills of integrating mental healthcare with primary care, using multiple perspectives to address challenges that often derail these joint efforts. Experts across integrative medicine offer accessible blueprints for smoothly implementing data-based behavioral interventions, from disease management strategies to treatment of psychological problems, into patient-centered, cost-effective integrated care. Coverage highlights training and technology issues, key healthcare constructs that often get lost in translation, and other knowledge necessary to create systems that are rooted in—and contribute to—a robust evidence base. Contributors also provide step-by-step guidelines for integrating behavioral health care delivery in treating cancer, dementia, and chronic pain. Among the topics covered: The epidemiology of medical diseases and associated behavioral risk factors. Provider training: recognizing the relevance of behavioral medicine and the importance of behavioral health consultations and referrals. Screening for behavioral health problems in adult primary care. Health care transformation: the electronic health record. Meeting the care needs of patients with multiple medical conditions. Smoking cessation in the context of integrated care. This depth of clinical guidance makes Behavioral Medicine and Integrated Care an essential reference for practitioners on all sides of the equation, including health psychologists and other professionals in health promotion, disease prevention, psychotherapy and counseling, and primary care medicine.

**iehp behavioral health providers: The Primary Care Toolkit** Larry James, William O'Donohue, 2008-10-27 Integrated care is receiving a lot of attention from clinicians, administrators, policy makers, and researchers. Given the current healthcare crises in the United States, where costs, quality, and access to care are of particular concern, many are looking for new and better ways of delivering behavioral health services. Integrating behavioral health into primary care medical settings has been shown to: (1) produce healthier patients; (2) produce medical savings; (3) produce higher patient satisfaction; (4) leverage the primary care physician's time so that they can be more productive; and (5) increase physician satisfaction. For these reasons this is an emerging paradigm with a lot of interest and momentum. For example, the President's New Freedom Commission on Mental Health has recently endorsed redesigning the mental health system so that much of this is integrated into primary care medicine.

**iehp behavioral health providers: Two Minute Talks to Improve Psychological and Behavioral Health** John F. Clabby, 2021-06-23 'There are important books that focus a full effort on a painful emotion such as depression or panic. Frankly, many troubled people do not directly present with such complaints. Instead, they speak about marital stress, upset about making an oral presentation, dealing with a mean-spirited co-worker, poor nutritional habits, handling uncooperative children or early adolescents, and domestic violence. They want practical guidance about those content areas as well.' - John F Clabby. Health professionals confronted with symptoms of mental and emotional distress often lack knowledge of how to respond to the situations that underlie them, or feel unable to address them in time-limited consultations. This can lead many to either adopt an empathetic listening approach which fails to address underlying causes effectively, or avoid asking their patients and clients about their psychosocial lives at all. Two Minute Talks to Improve Psychological and Behavioral Health takes a unique approach to this common dilemma. It provides concise, pragmatic and matter-of-fact advice which health professionals can use to effectively address the most common underlying causes of distress, such as work, family or relationship difficulties, poor nutritional habits, domestic violence and grief. Although firmly evidence-based, it avoids unnecessary detail to provide a practical reference which can either be read in its entirety or used as a quick reference of clear, accessible advice and strategies that patients can put into use. It is an essential addition to the toolbox of all health professionals who want to provide effective, responsive and empathetic care to their clients in time-limited situations. 'This book will reveal to you talents and results you did not believe possible. It will re-energize your approach to care, and make it fun to talk with and get to know your patients'. - from the Foreword by

Kenneth Faistl.
