ielts exam in china: *A New Representation of Chinese Learners* Yingmei Luo, 2021-07-26 This book examines Chinese tertiary students' experiences of learning English in Sino-Australian programs in China. Using an institutional ethnography, the book examines one well-established Sino-Australian program based at a Chinese university. The book explores the ways that participant students used the Chinese words, tropes and their meanings to describe their English learning experiences with both local Chinese and foreign English teachers. This book introduces an innovative theoretical framework, "representation theory with a multilingual perspective", to analyse how Chinese students' everyday experiences are constructed and mediated through language, discourse and identity. This framework also highlights graphic examples of how concepts are created in both Chinese and English, and thus serves as a powerful tool for deconstructing dichotomies between China and the West. The aim of this book is, then, two-fold: to show how a novel theoretical lens can help us to develop more nuanced understandings of Chinese students, and to propose a new methodological and theoretical framework through which one can challenge the monolingual subjectivity and parochial views of both Chinese and Western conceptions.

ielts exam in china: *Chasing the Chinese Dream* William N. Brown, 2021-06-01 This open access book explores the historical, cultural and philosophical contexts that have made anti-poverty the core of Chinese society since Liberation in 1949, and why poverty alleviation measures evolved from the simplistic aid of the 1950s to Xi Jinping's precision poverty alleviation and its goal of eliminating absolute poverty by 2020. The book also addresses the implications of China's experience for other developing nations tackling not only poverty but such issues as pandemics, rampant urbanization and desertification exacerbated by global warming. The first of three parts draws upon interviews of rural and urban Chinese from diverse backgrounds and local and national leaders. These interviews, conducted in even the remotest areas of the country, offer candid insights into the challenges that have forced China to continually evolve its programs to resolve even the most intractable cases of poverty. The second part explores the historic, cultural and philosophical roots of old China's meritocratic government and how its ancient Chinese ethics have led to modern Chinese socialism's stance that "poverty amidst plenty is immoral". Dr. Huang Chengwei, one of China's foremost anti-poverty experts, explains the challenges faced at each stage as China's anti-poverty measures evolved over 70 years to emphasize "enablement" over "aid" and to foster bottom-up initiative and entrepreneurialism, culminating in Xi Jinping's precision poverty alleviation. The book also addresses why national economic development alone cannot reduce poverty; poverty alleviation programs must be people-centered, with measurable and accountable practices that reach even to household level, which China has done with its "First Secretary" program. The third part explores the potential for adopting China's practices in other nations, including the potential for replicating China's successes in developing countries through such measures as the Belt and Road Initiative. This book also addresses prevalent misperceptions about China's growing global presence and why other developing nations must address historic, systemic causes of poverty and inequity before they can undertake sustainable poverty alleviation measures of their own.
