**if education is expensive try ignorance:** *Applied Spirituality: Seeing Through the Illusion of Our Separateness* Robert Colacurcio, 2015-10-14 This volume is a compilation of six smaller books that were published between 2012 and 2014. They were written as though I were taking dictation. Some higher power unlocked the gates of inspiration and articulation, and I wrote almost continuously for three hours every day without ever first composing an outline for any of these books. Instead of coming out as gibberish, they form a coherent, and I feel, cogent whole, and so I have grouped them together in one volume. Performance excellence in any field requires, among other things, a clear goal that can be methodically approached incrementally in manageable steps and stages. Without a clear goal, there can be no cogent methodology. Accomplishment in the practice of a spiritual discipline that leads to excellent results is no different. Together these books offer a clear goal and method for accomplishing what I feel is the universal target of every valid

form of spiritual practice, namely, seeing through the illusion of our separateness. This goal is universal to every form of spiritual aspiration. The methods outlined in this book, therefore, bypass every form of sectarianism. They can be applied and practiced by anyone of any faith who is sincerely motivated to deepen in the spirit that unites us all.

**if education is expensive try ignorance: *That'S Life*** Lester Wertheimer, 2018-04-13 *That's Life* is a series of entertaining essays offering a wealth of personal observations and prejudiced views on a wide range of subjects. Though written as a legacy to benefit grandchildren, it is derived from a lifetime of experience from which others may also profit. The essay on names, for example, warns of parental blunders like naming children Tonsillitis and Meningitis. Another discussion considers obesity and suggests an effective diet by eating wisely at McDonalds, while the essay on pets explains why emotional support animals may soon be sitting next to you in the concert hall. Other essays reveal why most people hate their jobs, the epidemic of dishonesty among advertisers and politicians, and the hilarious world of humor. Several essays illustrate the importance of art, health, and romance, including the emotional benefits of daily hugs and kisses. Anger, cruelty, and fear are considered, with suggestions for dealing with each. Further discussions consider sex, drinking, and death, including the bewildering problems suicide bombers face dealing with seventy-two virgins. From sports, fashion, and travel, to music, food, and fellowship, every important topic is examined and explained. There seems no more valuable an asset one can offer grandchildren than the wisdom that comes with advancing years. Thus, *That's Life* confronts everyday challenges we all face, providing responses to the most common of life's frustrations.

Characteristics we find in the sale of big ticket items include. The products or services are of relatively high price. The duration of the selling process is relatively long and consists of several steps. The duration of the process that buyers go through is relatively long. The buyers are usually looking to purchase against a set of specifications - they are looking for a solution. And so there are usually steps in the selling process to learn about and get agreement on the needs and wants of the buyers. There is often a team of people on the buying side. Sometimes the salesperson needs help from others (team sales). The products often need explaining. There is usually competition to deal with. They are rarely sold from a retail store. The complexity and price of such offerings justifies the cost and selling time of a field sales force. This book provides, among other things: Show More Show Less
