The Red Summer of 1919

if we must die claud mckay analysis: The Crisis of the Negro Intellectual Harold Cruse, 2005-06-30 Published in 1967, as the early triumphs of the Civil Rights movement yielded to increasing frustration and violence, *The Crisis of the Negro Intellectual* electrified a generation of activists and intellectuals. The product of a lifetime of struggle and reflection, Cruse's book is a singular amalgam of cultural history, passionate disputation, and deeply considered analysis of the relationship between American blacks and American society. Reviewing black intellectual life from the Harlem Renaissance through the 1960s, Cruse discusses the legacy (and offers memorably acid-edged portraits) of figures such as Paul Robeson, Lorraine Hansberry, and James Baldwin, arguing that their work was marked by a failure to understand the specifically American character of racism in the United States. This supplies the background to Cruse's controversial critique of both integrationism and black nationalism and to his claim that black Americans will only assume a just place within American life when they develop their own distinctive centers of cultural and economic influence. For Cruse's most important accomplishment may well be his rejection of the clichés of the melting pot in favor of a vision of Americanness as an arena of necessary and vital contention, an open and ongoing struggle.

if we must die claud mckay analysis: Constructivism and the New Social Studies Geoffrey Scheurman, Ronald W. Evans, 2018-07-01 *The New Social Studies* refers to a flurry of academic and commercial activity during the 1960s and 1970s that resulted in the mass development and dissemination of revolutionary classroom materials and teacher resources. In science as well as social studies, a spirit of "inquiry-based teaching" filled the air during this time, resulting in the development of curricula that were both pedagogically innovative and intellectually rigorous. "Constructivism and the New Social Studies" contains a collection of classic lessons from some of the most successful projects of the era, providing a resource of exceptional ideas and materials that have stood the test of time. These revealing artifacts are presented with commentaries from some of the original directors of major projects, including Edwin Fenton, Barry Beyer, and Suzanne Helburn. In addition to American and World History, groundbreaking lessons are represented in Economics, Government, Sociology, and Geography, including the Public Issues Series (Fred Newann), The Amherst History Project (Richard Brown and Geoffrey Scheurman) and Teaching American History: The Quest for Relevancy (Allan Kownslar, Gerald Ponder, and Geneva Gay), and Man: A Course of Study (Peter Dow). With a Foreword by Jerome Bruner, the volume not only provides a resource of exceptional curriculum ideas and actual materials, it also builds a lucid

bridge between the theoretical ideas of constructivism and the pedagogical principles of inquiry learning. With over 50 years of expertise from curriculum history and social studies pedagogy, the editors make the case that “guided inquiry” as presented in these projects was constructivist by design, offering a range of instructional methods that begin with questions rather than answers and considers progress in terms of the development of analytical skills and experimental habits of mind rather than the mere acquisition of knowledge. Projects developed during the New Social Studies serve as both an interesting historical archive of powerful curricular innovations as well as a treasure trove of actual lessons and materials still useful in social studies classrooms striving to become more constructivist. The lessons and other materials we chose should be relevant if you are an historian, researcher, theorist, or teacher of any subject, but it will be especially significant if you are interested in the nature of social, civic, or historical literacy in America, including how to teach for authentic achievement in those areas.

if we must die claud mckay analysis: Memories of Africa Toyin Falola, 2023-03-24 2023 CHOICE Outstanding Academic Title Memories of Africa: Home and Abroad in the United States suggests a new lens for viewing African Diaspora studies: the experiences of African memoirists who live in the United States. The book shows how African Diaspora memoirs beautifully and grippingly depict the experiences of African migrants over time through political, social, and cultural spheres. In reading African Diaspora memoirs from the transatlantic slave trade period to the present, a reader can understand the complexity of the African migrant legacy and evolution. Author Toyin Falola argues that memoirs are significant not only in their interpretation of events conveyed by the memoirists but also in demonstrating how interpersonal and human the stories told can be. Memoirs are powerful because they are emotionally captivating and because important themes and events circulate around a particular person (in this case, the memoirist). Undoubtedly, a memoir is significant because it can teach anyone about a part of the human experience, even if the "facts" are not described without bias. Through this sort of narrative, the reader cannot help but enter into the memoirist's mind and, therefore, feel more empathy for them. In doing so, the reader can "feel"

what the memoirist feels and “see” what the memoirist sees as clearly as is humanly possible. In this way, the historical events and life lessons become tangible and poignantly real to the reader.

if we must die claud mckay analysis: Sexual Identities, Queer Politics Mark Blasius, 2021-02-09 In this collection, political and public policy analysts explore the social concerns of lesbians, gays, bisexuals, and the transgendered--what has come to be known as lgbt or queer politics. Compared to the humanities and to other social sciences, political science has been slow to

address this phenomenon. Issues ranging from housing to adoption to laws on sodomy, however, have increasingly raised important political questions about the rights and status of sexual minorities, particularly within liberal democracies such as the United States, and also on an international level. This anthology offers the first comprehensive overview of the study of LGBT politics in political science across the discipline's main subfields and methodologies, and it spotlights LGBT movements in several regions around the world. Focusing on the politics of sexuality with regard to the politics of knowledge, the book presents a discussion of power that will interest all political scientists and others concerned with minority rights and gender as well as with transformation in the relations between public and private. The articles cover such topics as LGBT power in urban politics, the impact of public opinion on LGBT life, means of effecting legal and political change in the United States, and international differences in LGBT political activism. The authors represent a new cadre of political scientists who are creating an interdisciplinary domain of research that is informed by and in turn generates political activism. They are Dennis Altman, M. V. Lee Badgett, Robert W. Bailey, Mark Blasius, Cathy J. Cohen, Timothy E. Cook, Paisley Currah, Juanita Díaz-Cotto, Jan-Willem Duyvendak, Leonard Harris, Bevin Hartnett, Rosalind Pollack Petchesky, David Rayside, Rebecca Mae Salokar, and Alan S. Yang.

if we must die claud mckay analysis: Grave History Kami Fletcher, Ashley Towle, 2023-12-15 Grave sites not only offer the contemporary viewer the physical markers of those remembered but also a wealth of information about the era in which the cemeteries were created. These markers hold keys to our historical past and allow an entry point of interrogation about who is represented, as well as how and why. *Grave History* is the first volume to use southern cemeteries to interrogate and analyze southern society and the construction of racial and gendered hierarchies from the antebellum period through the dismantling of Jim Crow. Through an analysis of cemeteries throughout the South—including Alabama, Florida, Georgia, Kentucky, Maryland, Missouri, and Virginia, from the nineteenth through twenty-first centuries—this volume demonstrates the importance of using the cemetery as an analytical tool for examining power relations, community formation, and historical memory. *Grave History* draws together an interdisciplinary group of scholars, including historians, anthropologists, archaeologists, and social-justice activists to investigate the history of racial segregation in southern cemeteries and what it can tell us about how ideas regarding race, class, and gender were informed and reinforced in these sacred spaces. Each chapter is followed by a learning activity that offers readers an opportunity to do the work of a historian and apply the insights gleaned from this book to their own analysis of cemeteries. These activities, designed for both the teacher and the student, as well as the seasoned and the novice cemetery enthusiast, encourage readers to examine cemeteries for their physical organization, iconography, sociodemographic landscape, and identity politics.
