language and discourses we use, the films we watch, our museums and histories, our journalism, and our education systems. It also examines the roots of violence in our parenting styles, gender roles, and spiritual practices. It contrasts this with an examination of a number of peaceful societies that already exist, drawing useful lessons from their cultures. It critiques discrepancies in history education with regard to war and peace and examines artistic and cultural processes, institutions, and artifacts designed to create peace, such as peace museums and parks, peace journalism, peace education, and resistance to violence through cultural means, such as film-making, fine arts, satirical theatre, and protest music. Solutions-oriented, it examines the efficacy of these attempts and suggests positive ways forward. It also explores the role of gender in creating cultures of peace and the impacts on peacebuilding of cultivating peace within.

A generation of young people were forced out of their classrooms, jobs, and social lives, returning home to live with their parents. Now many of these young adults carry the scars of the internal pandemic, with increased anxiety and depression, poor coping, and the uncertainty of how to restart their lives. Parents want to help, but the old rules of advice-giving can clash with the need to respect their child's autonomy. In *You're Not Done Yet*, two leading adolescent and young adult mental health experts provide a practical and compassionate path to parents combatting the worry and frustrating isolation many feel when supporting their twentysomethings. Hibbs and Rostain explain when and how developmental markers changed, and invite parents and young adults to learn new, more effective ways of communicating with each other. Part I of the book covers the "new normal," of young adulthood, with its educational and career changes. The new normal of parent-child relationship asks us to rethink our "shoulds," and in the process develop a closer relationship based on talking and listening to understand each other, rather than "being right." Part II addresses the common and challenging problems that arise when mental illness creates a drag on a young adult's progress, and shows how parents may be engaged in their child's treatment. Packed with helpful information and step-by-step guides to specific problems, this book will be an invaluable resource for parents and their twentysomething children.

if movie 2024 parents guide: *Early Psychological Research Contributions from Women of Color, Volume 2* Rihana Shiri Mason, Jon E. Grahe, Michelle L. Ceynar, 2024-07-29 This volume serves as a companion to *Early Psychological Research Contributions from Women of Color, Volume I*. It focuses on the dissertations of 20 builders, women of color who earned their doctoral degrees in psychology prior to 1990 and who were leaders in the field through their leadership or innovation. An introductory chapter bridges the two volumes. Each subsequent chapter summarizes and examines a dissertation using a consistent format, including a biographical sketch of the builder with an emphasis on her significant contribution to an organization or innovation that moved the field forward, a summary of the dissertation, a reproducibility critique of the dissertation, and an alternative framework section that analyzes the dissertation from a modern theoretical perspective or methodological approach (e.g., feminist theory, liberation psychology, mestiza consciousness, etc.). The topics cover the breadth of the discipline of psychology, including physiological, cognitive, developmental, social, and clinical. Some topics are also relevant to business, education, medicine, and social work. The varying nature of these dissertations allows the book to be used to augment coursework either as a complete collection or as individual chapters. This volume is intended for both instructors and students. The course activities provide examples of how to integrate key aspects of the dissertation research into the classroom. The volume was written with upper-level undergraduate students in mind so that it could be used across the psychology curriculum, but the editors envision this book as a potential graduate-level text as well.
