Hakimah Yaacob, Razali Mat Zin, Qaisar Ali, 2024-11-12 Islamic financial institutions (IFIs) are often criticized due to insufficient regulatory provision, thus lowering clients' confidence in them. Additionally, few countries have well-established legislation relating to the Islamic finance industry, while others are only now developing preliminary regulations to incorporate Islamic finance within their own financial systems. This book offers a comprehensive understanding of Islamic financial regulation, outlining the regulatory landscape in various jurisdictions, examining how it supports the development and foundation of IFIs and addressing the regulation and supervision of IFIs from a global perspective. The book begins by introducing Islamic finance and its current position in the

international banking system, then goes on to review the historical developments of the field. It discusses the key financial regulators, their functions, and the regulations that have been implemented to foster the growth of Islamic finance. It includes cases from both Eastern and Western countries. It thoroughly examines how Shariah principles are integrated into the regulatory framework of Islamic finance. Specifically, the book examines the laws and arrangements established in different countries regarding the governance of the Islamic finance industry as well as the legal criteria for setting up and governing IFIs. The focus is on exploring diverging laws and their impact on developing Islamic Finance. This will serve as an academic and practitioner guide to understanding the preliminary regulations required for the establishment, governance, and management of IFIs. Also, it offers practical insights and guidance for professionals working in the Islamic finance industry, including bankers, lawyers, regulators, and policymakers.

ijara community development corp: *The Global Corporation* Laura P. Hartman, Patricia H. Werhane, 2013-12-19 This text brings together case studies focusing on specific instances of corporate best practices. All too often, we showcase cases based on questionable or unethical corporate behavior. Instead, the editors bring together in this book examples of how some firms got it right. Certainly, there is no claim that the companies in these case are perfect; some of them may have histories that include questionable practices. But, these are companies that work to foster trust, both internally and in their relationships with customers, suppliers, shareholders, and the communities in which they operate. The book is not, however, merely a descriptive iteration of effective corporate conduct. The editors conclude with an analysis of frameworks for corporate and managerial ethical decision-making - frameworks that help to establish models for best practices. These frameworks then can be generalized and applied to other corporate situations, and replicated by other companies in their search for excellence and the resulting avoidance of misconduct.

ijara community development corp: Islamic Capital Markets Kabir Hassan, Michael Mahlknecht, 2011-04-04 Islamic Finance has experienced rapid growth in recent years, showing significant innovation and sophistication, and producing a broad range of investment products which are not limited to the complete replication of conventional fixed-income instruments, derivatives and fund structures. Islamic Finance represents an elemental departure from traditional interest-based and speculative practices, relying instead on real economic transactions, such as trade, investment based on profit sharing, and other solidary ways of doing business, and aims to incorporate Islamic principles, such as social justice, ecology and kindness, to create investment products and financial markets which are both ethical and sustainable. Products created according to Islamic principles have shown a low correlation to other market segments and are relatively independent even from market turbulences like the subprime crisis. Therefore, they have become increasingly popular with secular Muslims and non-Muslim investors, as highly useful alternative investments for the diversification of portfolios. In Islamic Capital Markets: Products and Strategies, international experts on Islamic Finance and Sharia'a Law focus on the most imminent issues surrounding the evolution of Islamic capital markets and the development of Sharia'a-compliant products. The book is separated into four parts, covering: General concepts and legal issues, including Rahn concepts in Saudi Arabia, the Sharia'a process in product development and the integration of social responsibility in financial communities; Global Islamic capital market trends, such as the evolution of Takaful products and the past, present and future of Islamic derivatives; National and regional experiences, from the world's largest Islamic financial market, Malaysia, to Islamic finance in other countries, including Germany, France and the US; Learning from Islamic finance after the global financial crisis; analysis of the risks and strengths of Islamic capital markets compared to the conventional system, financial engineering from an Islamic perspective, Sharia'a-compliant equity investments and Islamic microfinance. Islamic Capital Markets: Products and Strategies is the complete investors' guide to Islamic finance.

It explores, step-by-step, the key ingredients of the concept. The book is aimed at a business savvy audience, but one which is not necessarily up to speed on the concept, and has a global reach by covering both OECD countries and the emerging markets. Project finance is positioned at a key point between the global capital markets and the energy and infrastructure industries. To explain and illustrate the ideas behind project finance, the book is made of chapters written by a range of leading players in the market from around the world and is split into four sections: ¢ The first reviews various themes and issues key to the project finance market - views from bankers, lawyers and advisers plus chapters on bank, bond and multilateral finance and a look at environmental, insurance and construction market issues. ¢ The second section looks at how project finance is used in various sectors of the energy and infrastructure market - renewable energy, oil and gas, mining, PPPs and roads and transportation. ¢ The third then takes an in-depth look at various projects finance markets from around the world - Australia, Vietnam, Indonesia, India, Turkey, Russia, Africa, France, USA and Brazil. ¢ Finally, the fourth section presents a series of Top 10 deal cases studies from the pages of Thomson Reuters Project Finance International (PFI), the leading source of global project finance information.
