may 10 birthdays in history: Last of the Blue and Gray Richard A. Serrano, 2013-10-08

Richard Serrano, Pulitzer Prize-winning journalist for the Los Angeles Times, pens a story of two veterans. In the late 1950s, as America prepared for the Civil War centennial, two very old men lay dying. Albert Woolson, 109 years old, slipped in and out of a coma at a Duluth, Minnesota, hospital, his memories as a Yankee drummer boy slowly dimming. Walter Williams, at 117 blind and deaf and bedridden in his daughter's home in Houston, Texas, no longer could tell of his time as a Confederate forage master. The last of the Blue and the Gray were drifting away; an era was ending. Unknown to the public, centennial officials, and the White House too, one of these men was indeed a veteran of that horrible conflict and one according to the best evidence nothing but a fraud. One was a soldier. The other had been living a great, big lie.

may 10 birthdays in history: *The Kaiser* Annika Mombauer, Wilhelm Deist, 2003-11-17 This collection of innovative essays examining the role of Wilhelm II in Imperial Germany was first published in 2003, particularly on the later years of the monarch's reign. The essays highlight the Kaiser's relationship with statesmen and rulers; his role in international relations; the erosion of his power during the First World War; and his ultimate downfall in 1918. The book demonstrates the extent to which Wilhelm II was able to exercise 'personal rule', largely unopposed by the responsible government, and supported in his decision-making by his influential entourage. The essays are based on thorough and far-reaching research and on a wide range of archival sources. Written to honour the innovative work of John Röhl, Wilhelm II's most famous biographer, on his sixty-fifth birthday, the essays within this volume will continue to provide an exciting evaluation of the role and importance of this controversial monarch.

may 10 birthdays in history: An Index to Articles Published in The Etude Magazine, 1883-1957, Part 2 Pamela Richardson Dennis, 2011-01-01 Annotation: The Index is published in two physical volumes and sold as a set for \$250.00. As America's geography and societal demands expanded, the topics in The Etude magazine (first published in 1883) took on such important issues as women in music; immigration; transportation; Native American and African American composers and their music; World War I and II; public schools; new technologies (sound recordings, radio, and television); and modern music (jazz, gospel, blues, early 20th century composers) in addition to regular book reviews, teaching advice, interviews, biographies, and advertisements. Though a valued source particularly for private music teachers, with the de-emphasis on the professional elite and the decline in salon music, the magazine ceased publication in 1957. This Index to the articles in The Etude serves as a companion to E. Douglas Bomberger's 2004 publication on the music in The Etude. Published a little over fifty years after the final issue reached the public, this Index chronicles vocal and instrumental technique, composer biographies, position openings, department store orchestras, the design of a successful music studio, how to play an accordion, recital programs in music schools, and much more. The Index is a valuable tool for research, particularly in the music culture of American in the late nineteenth and early twentieth centuries. With titles of these articles available, the doors are now open for further research in the years to come.

may 10 birthdays in history: Organized Activity and its Support by Computer A. Holt, 2012-12-06 Organized Human Activity and Its Support by Computer proposes an answer to the question: what are computers for? With technical expertise, Anatol Holt analyzes human activity and its relevance to computer use. Holt interleaves a theory about the universal aspect of social life with a vision of how to harness computer power. 'This book is a culmination of a life of work that exemplifies two characteristics of the author: intellectual passion, and a concern for what matters to people. In the past thirty years, Holt has been a participant in the computing work at every level, from managing computer systems to developing commercial software to publishing theoretical articles in academic journals. His breadth of knowledge and experience makes possible the interweaving of theory and practice that shapes the fabric of this book. People often make a false opposition between theory and practice. In this case, it is a synergy: practice guides the theory, and the theory is grounded in its application.' Terry Winograd, Stanford University Organized Human Activity and Its Support by Computer will be of interest to those concerned with computers, especially those with and interest in 'groupware'. Particular relevance to social scientists, management scientists, students of law, and philosophers are also addressed. Though technical in spirit and method, this book does not expect significant prior computer knowledge of the reader.
