Taking this into account, the quality of health care should be judged not only by whether clinical decisions are informed by the best available scientific evidence, but also by whether care is tailored to a patient's individual needs and perspectives. However, too often it is provider preference and convenience, rather than those of the patient, that drive what care is delivered. As part of its Learning Health System series of workshops, the Roundtable on Value & Science-Driven Health Care hosted a workshop to assess the prospects for improving health and lowering costs by advancing patient involvement in the elements of a learning health system.

maxine hall health center: San Francisco's Fillmore District Robert F. Oaks, 2005 Today's Fillmore District, while one of San Francisco's most diverse neighborhoods, bears little resemblance to the cosmopolitan place it once was. This district, which has arguably changed more than any other in the city, once held a large Jewish settlement, replete with synagogues, bakeries, and kosher markets. It also had a huge Japanese community, now centered in Japantown but not as extensive as in the prewar years; amusements like the Chutes, Dreamland boxing ring, and theatres; schools, churches, and a celebrated Jazz District that hosted the top names in music for many years. And in one of the most controversial displays of civic power, this densely populated area fell to the forces of redevelopment, bisected by the ambitious plan to widen Geary Boulevard, creating a freeway-like road through the district and forcing out thousands of dwellers whose homes were either moved or demolished.
