Overview of Matthews Health and Rehab

Matthews Health and Rehab is a leading facility providing inpatient and outpatient rehabilitation services. It is known for delivering high-quality care tailored to meet the unique rehabilitation needs of each patient. The center focuses on restoring health and function to individuals affected by various medical conditions, including orthopedic injuries, neurological disorders, and post-surgical recovery. Its commitment to excellence is reflected in its state-of-the-art equipment, innovative treatment methods, and compassionate care philosophy. Located conveniently to serve the local community, Matthews Health and Rehab has established itself as a cornerstone in health recovery services.

Comprehensive Rehabilitation Services

At Matthews Health and Rehab, patients receive a broad spectrum of rehabilitation services designed to address diverse health challenges. These services encompass physical, occupational, and speech therapies, each aimed at enhancing specific functional abilities and promoting overall wellness. The facility offers customized rehabilitation plans that adapt to patients' progress and changing needs, ensuring effective recovery outcomes. Emphasis

is placed on evidence-based practices and interdisciplinary collaboration among healthcare providers.

Physical Therapy

Physical therapy at Matthews Health and Rehab focuses on improving mobility, strength, and coordination. Licensed physical therapists utilize therapeutic exercises, manual therapy, and advanced modalities to help patients regain physical function. Treatments are designed to reduce pain, increase range of motion, and facilitate independence in daily activities.

Occupational Therapy

Occupational therapy services assist patients in relearning essential skills for daily living and work-related tasks. Therapists work closely with individuals to enhance fine motor skills, cognitive abilities, and adaptive techniques. The goal is to maximize patients' self-sufficiency and improve their quality of life.

Speech Therapy

Speech therapy addresses communication disorders, swallowing difficulties, and cognitive impairments. Speech-language pathologists at Matthews Health and Rehab provide personalized interventions to improve speech clarity, language comprehension, and safe swallowing practices, supporting comprehensive rehabilitation.

Specialized Therapies and Programs

Beyond standard rehabilitation services, Matthews Health and Rehab offers specialized programs tailored to specific patient populations and conditions. These include neurological rehabilitation, orthopedic recovery, cardiac rehabilitation, and pain management programs. Each program integrates specialized techniques and technologies to optimize patient outcomes.

Neurological Rehabilitation

This program targets patients recovering from strokes, traumatic brain injuries, spinal cord injuries, and other neurological conditions. The multidisciplinary team employs neuroplasticity principles and advanced therapeutic exercises to facilitate neurological recovery and functional independence.

Orthopedic Recovery

Orthopedic rehabilitation supports patients recovering from fractures, joint replacements, and other musculoskeletal surgeries. Customized exercise regimens and manual therapies help restore joint function, reduce stiffness, and enhance muscular strength around affected areas.

Cardiac Rehabilitation

Cardiac rehabilitation at Matthews Health and Rehab focuses on patients recovering from heart surgery or cardiac events. The program includes monitored exercise, education on heart-healthy living, and counseling to promote cardiovascular health and prevent future complications.

Pain Management

Effective pain management techniques are integrated into rehabilitation plans to address chronic and acute pain conditions. Therapists utilize modalities such as therapeutic ultrasound, electrical stimulation, and manual therapy to alleviate discomfort and improve function.

Experienced Healthcare Professionals

Matthews Health and Rehab prides itself on a highly skilled and compassionate team of healthcare professionals. This team includes board-certified physicians, licensed therapists, registered nurses, and support staff who collaborate to deliver comprehensive care. Continuous professional development and training ensure the staff remains current with the latest rehabilitation practices and technologies.

Interdisciplinary Team Approach

The facility employs an interdisciplinary team model, where healthcare providers from various disciplines work closely together. This approach ensures coordinated care, timely communication, and holistic treatment planning, optimizing patient recovery trajectories.

Patient Education and Support

Healthcare professionals at Matthews Health and Rehab emphasize patient education, empowering individuals and their families with knowledge about their conditions and rehabilitation processes. Support services include counseling, resource referrals, and discharge planning to facilitate smooth transitions post-treatment.

Patient-Centered Care Approach

Central to Matthews Health and Rehab's philosophy is a patient-centered care approach. This model prioritizes the individual's preferences, needs, and values in all aspects of care delivery. Patients are actively involved in goal setting and treatment decisions, fostering engagement and motivation throughout their rehabilitation journey.

Personalized Treatment Plans

Every patient at Matthews Health and Rehab receives a customized treatment

plan developed after thorough assessment. These plans are flexible and adapt to changes in patient condition and progress, ensuring effective and relevant interventions.

Family Involvement

The facility encourages family participation in the rehabilitation process. Family members receive education and support to assist patients at home, which contributes to better recovery outcomes and emotional well-being.

Facility Amenities and Environment

Matthews Health and Rehab offers a welcoming, safe, and accessible environment designed to promote healing and comfort. The facility is equipped with modern rehabilitation equipment, comfortable patient rooms, and communal spaces that encourage social interaction and relaxation. Accessibility features accommodate patients with mobility limitations, ensuring ease of movement throughout the center.

Therapy Facilities and Equipment

Advanced therapy equipment such as gait trainers, therapeutic pools, and computerized rehabilitation devices support diverse therapeutic needs. These resources enhance treatment effectiveness and patient engagement.

Comfort and Safety Features

Patient safety is a top priority, with protocols in place to prevent falls, infections, and other risks. Comfortable accommodations support rest and recovery, while amenities such as nutritious meal options and recreational activities contribute to a positive patient experience.

Community Involvement and Support

Matthews Health and Rehab maintains strong ties with the local community through outreach programs, health education events, and partnerships with healthcare providers. These efforts aim to promote wellness, prevent injury, and support ongoing health management for community members. The facility also provides resources and support groups for patients and families, fostering a sense of community and shared recovery.

Outreach and Education

Community education initiatives focus on injury prevention, chronic disease management, and healthy lifestyle promotion. Matthews Health and Rehab actively participates in local health fairs and seminars to increase public awareness about rehabilitation services.

matthews health and rehab: Matthews Model of Clinical Reasoning Laurie Knis-Matthews, 2023-11-24 The Matthews Model of Clinical Reasoning (MMCR) provides occupational therapy practitioners with a systematic approach to develop their clinical reasoning skills during the evaluation and intervention process when collaborating with persons served across multiple practice locations. The three core constructs of person, environment, and occupation lay the foundation for practitioners to compartmentalize information from selected evaluations, determine relevant intervention priorities, implement occupation-based intervention plans, and interpret successful outcomes. This book, influenced by these constructs, the practice framework, and accreditation standards for academic preparedness, provides the reader with the foundational information on how to apply the core constructs using a MMCR systematic approach for evaluation and intervention. Within the chapters are a variety of instructional methods, interviews with practitioners of various levels of experience, and case study examples. Clinical reasoning guidesheets are presented to assist the reader to follow the MMCR clinical reasoning process in terms of evaluation findings, application of frame of reference (FOR)/practice models, intervention strategies, and documentation. Occupational therapy students and practitioners will be provided with the foundational skills to systematically think about and apply the steps of the clinical reasoning process, starting with a person's evaluation through the completion of the intervention plan.

matthews health and rehab: Stroke Rehabilitation LeeAnne M. Carey, 2012-06-28 Stroke Rehabilitation: Insights from Neuroscience and Imaging informs and challenges neurologists, rehabilitation therapists, imagers, and stroke specialists to adopt more restorative and scientific approaches to stroke rehabilitation based on new evidence from neuroscience and neuroimaging literatures. The fields of cognitive neuroscience and neuroimaging are advancing rapidly and providing new insights into human behavior and learning. Similarly, improved knowledge of how the brain processes information after injury and recovers over time is providing new perspectives on what can be achieved through rehabilitation. Stroke Rehabilitation explores the potential to shape and maximize neural plastic changes in the brain after stroke from a multimodal perspective. Active skill based learning is identified as a central element of a restorative approach to rehabilitation. The evidence behind core learning principles as well as specific learning strategies that have been applied to retrain lost functions of movement, sensation, cognition and language are also discussed. Current interventions are evaluated relative to this knowledge base and examples are given of how active learning principles have been successfully applied in specific interventions. The benefits and evidence behind enriched environments is reviewed with examples of potential application in stroke rehabilitation. The capacity of adjunctive therapies, such as transcranial magnetic stimulation, to modulate receptivity of the damaged brain to benefit from behavioral interventions is also discussed in the context of this multimodal approach. Focusing on new insights from neuroscience and

imaging, the book explores the potential to tailor interventions to the individual based on viable brain networks.

matthews health and rehab: Physical Rehabilitation's Role in Disability Management

David W. Clifton, 2005 Bridging the gap between clinical practice and real-world interaction, this new resource challenges rehabilitation providers to think beyond treatment to disability management. It provides the theories and knowledge needed to effectively manage patients' disabilities within a managed care framework, with the goal of better collaboration with claims adjusters, case managers, risk managers, human resource personnel, safety and health officers, attorneys, peer reviewers, and others in the health care system. Highly visual and packed with useful information, it provides an excellent introduction to the wide variety of interested parties with whom a therapist will interact in the course of managing a client's health. The author has more than 23 years of experience consulting with insurance companies, employers, and the legal sector, and offers proven strategies for collaboration between providers and others involved with the health care system. Filled with numerous illustrations, graphics, and tables, many of which are useful for training and education of staff or clients. The appendix contains a large and diverse collection of helpful information that is not readily available from other sources. It also provides an essential list of resources for further reading about this constantly changing field. Chapters cover theoretical issues (management models, definitions of disability) as well as disability management in long-term care, worker's compensation, outcomes management, legal implications, and more. Case studies throughout the book present realistic examples of situations to improve the reader's technical and critical thinking skills. Focused on managing disabilities (i.e., functional problems) rather than on treating impairments (i.e., diseases), encouraging rehabilitation providers to think out of the box and to position themselves better within and beyond managed care.

matthews health and rehab: The Fabric of Welfare Margaret Tennant, 2007 Throughout history, the 'welfare of the people' has been a contested area. Is it the responsibility of the state? The churches? The extended family? Organised charities or informal community groups? The Fabric of Welfare is about the many points of contact between voluntary welfare and government social services, and the complex pattern woven by these different threads. The country's welfare history is shaped by its colonial past, with the predominantly British influences transmitted by an immigrant society in the nineteenth century; by its Maori population, with a strong communal ethos; by the shaping forces of the welfare state; by two world wars and economic depression; and by both free-market policies and rapid social change in recent years. In tracing the interdependence of state and voluntary provision of welfare from 1840 to 2005, Margaret Tennant offers new perspectives on New Zealand social history. This is a rigorous analysis, but it is also a history illuminated by people. The text is illustrated with stories about the people who were moved to save, to reform, to care, to support, and the people who needed that essential sustenance. From the nun who sees a distraught

woman about to throw her child into the sea, and sets out to care for 'foundlings', to city missionaries, community-minded public servants, businessmen philanthropists, and the entrepreneurial organisers of floral fetes and telethons, these accounts tell us much about the history of welfare, in all its interconnections.

matthews health and rehab: From AIDS to Population Health James D. Kelly, 2022-11-22

From AIDS to Population Health explores the thirty-year history of a unique collaboration between the medical schools of Indiana University and Moi University in Kenya, as it progressed from combating the HIV/AIDS epidemic in East Africa to the building of a national plan to provide universal healthcare to all. The Academic Model Providing Access to Healthcare (AMPATH) program focuses on the medical education of healthcare professionals who are building communities that can take care of themselves. The overwhelming success of the AMPATH program and its continuing vibrant legacy today are showcased through dozens of striking photographs, telling interviews, and revealing anecdotes and encounters. It focuses on four of the most innovative projects among the fifty that AMPATH oversees: a microfinance officer who organizes villagers, an oncology nurse who runs outreach clinics, a farm extension agent working in partnership with a multinational agriculture corporation to improve farm output, and a special healthcare clinic exclusively for adolescents. Over its thirty-year history, AMPATH has served more than a million clients and trained 2,600 medical professionals and community health workers, always guided by its motto Leading with Care. From AIDS to Population Health presents their compelling stories and explores the program's continuing legacy for the first time.
