maverick transportation cdl training: How To Become a Truck Driver HowExpert, Bruce Stimson, 2016-09-23 Let's talk about the money, most truck drivers can expect to earn \$30,000-\$40,000 in their 1st year. I know some drivers who work as Solo drivers and decide to give up their apartments so they can stay in the truck all year long and save money. They still take days off from time to time, and stay with friends, family or rent a hotel for a few days so they can take a break. Once you have 6 months experience you may be able to find a job that pays more money. I've seen motivated drivers earning in the \$60,000 range in their 1st year. The money is there to earn if you look for it. Too many drivers get complacent and they stay with the same company in the same position making low wages for years and years. Sometimes all you need to do to increase your income is switch positions within the company. If the company you work for doesn't offer anything that will take you to the next level then find another company that will. I know a Walmart driver who earns \$100,000 year and he's home every night and weekend. Companies pay you in cents per mile (CPM) so the more mileage you drive the more you earn The bottom line is company drivers can make anywhere from \$30,000 to around \$100,000 per year. Stay away from company lease options, 99% of the time only the company does well with this type of position. They will make their lease program sound perfect, touting how you will be your own boss and make lots of money. Drivers often find themselves making just enough to cover the WEEKLY truck lease payment. If you want to truly be your own boss as a owner operator of your own truck then save up the money to buy a used truck cash or you may be able to find a 3rd party (not company sponsored) lease program. I have seen a couple of decent 3rd party lease programs, these will allow you to contract with any company you want. So if you're not making enough money with one company then you can easily switch to another. Owner operators can make anywhere from \$50,000 - \$250,000 per year. About the Expert I have been driving a truck full time for over 4 years at the time of this publishing. I have been a company driver for 3 of those years and an owner/operator for a bit over one. In the 4+ years that I've been driving I have spent one year driving most of the lower 48 states. I haven't made it up to North Carolina, and a few other states in the northeast but all of the others I have. For the last two years I have been truck driving with my team from Los Angeles to the Kansas City area and back. We did that twice a week. After doing that for about a year I was able to get a driving position working nights and being home every day. I did that for almost year. I left there because the company did a pathetic job of maintaining their equipment. I was afraid of getting stopped by law enforcement. So I left them and got my own truck to take care of. Now I am contracted with a carrier to move their freight and it works out a lot better. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.

maverick transportation cdl training: Commercial Drivers License Pre-Trip Inspection Training Manual Robert C. Robinson, 2009 Most training manuals skip and bounce around the truck in a manner that's both confusing and disorganized. This manual, however, systematically guides the trainee in a logical, orderly method that works and makes sense. From the start of the inspection to it's end, the driver will never have to guess about where to go or what to inspect next. This is accomplished by displaying the truck and trailer components in sections that are logically and numerically organized followed by a thorough discussion of the components following the same logical, numerical order--making the pre-trip inspection far less intimidating and less confusing. While most manuals barely mention the components to be inspected, this manual discusses the components in great detail by first explaining their purpose and then by further explaining the multitude of problems that one could possibly find while inspecting a tractor and/or trailer or straight truck. Instead of black and white sketches that lack clarity and detail, this manual includes color photographs of every component covered. Never again will you have to wonder what a component really looks like nor will you have to embarrass yourself by asking someone. Also included are a sample score sheet and an inspection checklist that can be used for practice while

training. This manual also contains several bonus pictures, compliments of the world champion extreme turbine race team Miss GEICO and AMF Offshore Racing. More importantly, this manual includes all the information needed to successfully pass the pre-trip inspection exam on the first try and also serves as a good refresher to those who already have a commercial driver's license using an approach that has worked time and time again.
