

mba in aviation management

mba in aviation management is a specialized graduate degree designed to equip professionals with the essential skills and knowledge needed to excel in the dynamic aviation industry. This program combines core principles of business administration with aviation-specific topics, preparing graduates for leadership roles in airlines, airports, cargo carriers, and aviation service providers. The curriculum typically covers areas such as aviation finance, airport operations, airline marketing, safety management, and regulatory compliance. With the aviation sector continuously evolving due to technological advancements and global economic trends, an MBA in aviation management offers a competitive edge for aspiring managers and executives. This article explores the significance, curriculum, career prospects, and admission requirements of an MBA in aviation management, providing a comprehensive overview for prospective students and industry professionals.

- Overview of MBA in Aviation Management
- Curriculum and Key Subjects
- Career Opportunities and Industry Demand
- Admission Requirements and Eligibility
- Skills Developed Through the Program
- Advantages of Pursuing an MBA in Aviation Management

Overview of MBA in Aviation Management

The MBA in aviation management is tailored to meet the unique challenges of the aviation industry by blending business administration expertise with aviation-specific knowledge. This program is ideal for individuals aiming to take up managerial and executive roles within airlines, airport authorities, aviation regulatory bodies, and related sectors. It focuses on imparting skills necessary for strategic planning, operational efficiency, financial management, and compliance within the aviation context. The degree also addresses issues such as global air traffic management, safety regulations, and customer service excellence, which are critical to the industry's success.

Program Structure

The structure of an MBA in aviation management generally spans one to two years and includes both core business courses and specialized aviation subjects. The course delivery may be full-time, part-time, or online, catering to working professionals and fresh graduates alike. Many programs also offer internships or project work with aviation companies to provide hands-on experience.

Curriculum and Key Subjects

The curriculum of an MBA in aviation management is carefully designed to cover a wide range of topics that prepare students for leadership roles in the aviation sector. It integrates business fundamentals with industry-specific knowledge, ensuring graduates are well-rounded professionals.

Core Business Courses

Students typically study essential MBA subjects such as finance, marketing, organizational behavior, strategic management, and operations management. These courses provide a strong foundation in business principles necessary for effective decision-making and leadership.

Aviation-Specific Subjects

Specialized courses focus on areas unique to the aviation industry, including:

- Airport Operations and Management
- Airline Marketing and Sales
- Air Traffic Control and Safety Management
- Aviation Law and Regulations
- Supply Chain and Logistics in Aviation
- Aircraft Maintenance and Engineering Management

This combination ensures that graduates understand both the operational and regulatory aspects of aviation management alongside core business functions.

Career Opportunities and Industry Demand

An MBA in aviation management opens diverse career pathways in the global aviation industry, which is continually expanding due to increasing passenger traffic and cargo demands. Graduates are well-positioned to fill managerial roles that require both business acumen and aviation expertise.

Potential Job Roles

Employment opportunities for graduates include positions such as:

- Airport Manager
- Airline Operations Manager
- Flight Dispatch Manager
- Aviation Safety Manager
- Logistics and Cargo Manager
- Business Development Executive in Aviation

Industry Growth and Demand

The aviation industry is driven by global trade, tourism, and technological innovations. Increasing air travel and the need for efficient airport and airline management create a steady demand for qualified professionals with an MBA in aviation management. Regulatory changes and safety concerns also necessitate skilled managers who understand compliance and operational excellence.

Admission Requirements and Eligibility

Admission to an MBA in aviation management program typically requires candidates to meet certain academic and professional criteria. These requirements ensure that students possess the foundational skills necessary for the rigors of the program.

Academic Qualifications

Applicants generally need a bachelor's degree from an accredited institution, preferably in business, engineering, or a related field. Some programs may accept candidates from diverse academic backgrounds if they demonstrate relevant work experience.

Work Experience

Many programs prefer or require candidates to have prior work experience in aviation, logistics, or management. This experience enhances classroom discussions and practical understanding of aviation industry challenges.

Entrance Exams and Language Proficiency

Admission may require standardized test scores such as the GMAT or GRE, depending on the institution. International students typically need to demonstrate English language proficiency through exams like TOEFL or IELTS.

Skills Developed Through the Program

An MBA in aviation management cultivates a diverse set of skills essential for success in the aviation sector. These competencies enable graduates to navigate complex operational environments and lead organizations effectively.

Leadership and Strategic Thinking

The program emphasizes leadership skills, enabling students to formulate strategic plans that align with organizational goals and industry standards. Graduates learn to manage teams and projects efficiently in a fast-paced environment.

Financial and Analytical Skills

Students develop financial acumen to manage budgets, analyze costs, and maximize revenue streams within airlines or airports. Analytical skills are honed to assess market trends, operational data, and regulatory impacts.

Regulatory and Safety Compliance

Understanding aviation laws, safety protocols, and regulatory frameworks is a critical skill imparted by the program. Graduates are equipped to ensure compliance and implement safety management systems effectively.

Advantages of Pursuing an MBA in Aviation Management

Choosing an MBA in aviation management offers numerous benefits that contribute to career advancement and professional growth in the aviation industry.

- **Industry-Specific Expertise:** The program provides specialized knowledge that general MBA programs do not offer, making graduates highly valuable to aviation employers.
- **Networking Opportunities:** Students gain access to industry professionals, alumni networks, and internship placements that can facilitate career opportunities.
- **Global Career Prospects:** Aviation is an international industry, and the degree prepares graduates for roles worldwide, enhancing global mobility.
- **Competitive Salary Potential:** Managers in aviation typically enjoy lucrative salaries and benefits due to the specialized nature of their roles.
- **Adaptability to Industry Changes:** The curriculum often incorporates emerging trends such as sustainable aviation, digital transformation, and crisis management.

Frequently Asked Questions

What is an MBA in Aviation Management?

An MBA in Aviation Management is a specialized postgraduate degree that combines business administration principles with the aviation industry's operational and managerial aspects, preparing graduates for leadership roles in airlines, airports, and related sectors.

What are the eligibility criteria for pursuing an MBA in Aviation

Management?

Typically, candidates must have a bachelor's degree in any discipline from a recognized university. Some institutions may require work experience in the aviation sector or related fields, but many accept fresh graduates.

What are the core subjects covered in an MBA in Aviation Management program?

Core subjects often include Aviation Operations, Air Transport Economics, Airline Marketing, Airport Management, Aviation Safety and Security, Supply Chain Management, and Strategic Management.

What career opportunities are available after completing an MBA in Aviation Management?

Graduates can pursue roles such as Airline Manager, Airport Operations Manager, Aviation Consultant, Air Traffic Control Manager, Logistics Manager, and Positions in aviation regulatory bodies.

Is work experience necessary before enrolling in an MBA in Aviation Management?

While some programs prefer candidates with prior work experience in aviation or related industries, many institutions offer MBA programs tailored for fresh graduates.

How does an MBA in Aviation Management differ from a general MBA?

An MBA in Aviation Management focuses specifically on the aviation industry's challenges, regulations, and operational aspects, whereas a general MBA covers broad business management topics applicable across industries.

Are there online MBA programs available in Aviation Management?

Yes, several universities and institutes offer online or distance learning MBA programs in Aviation Management, providing flexibility for working professionals.

What are the top countries to pursue an MBA in Aviation Management?

Countries like the United States, United Kingdom, Australia, Canada, and the UAE are popular for aviation management programs due to their strong aviation industries and reputed universities.

What skills can I expect to gain from an MBA in Aviation Management?

Students develop skills in strategic planning, leadership, aviation safety, financial management, regulatory compliance, customer service, and operational efficiency specific to the aviation sector.

How much does an MBA in Aviation Management typically cost?

The cost varies widely depending on the country and institution but generally ranges from \$10,000 to \$50,000 USD for the full program. Scholarships and financial aid may be available.

Additional Resources

1. *Strategic Management in Aviation*

This book offers comprehensive insights into the strategic planning and management processes specific to the aviation industry. It covers topics such as competitive analysis, strategic decision-making, and organizational leadership within airlines and airports. Ideal for MBA students, it bridges theory with real-world aviation case studies to enhance strategic thinking skills.

2. *Aviation Finance and Economics*

Focused on the financial aspects of aviation management, this book explores airline economics, financial planning, and investment strategies. It explains concepts like cost control, revenue management, and capital budgeting tailored for aviation businesses. Readers will gain a solid foundation in financial decision-making critical for managing aviation enterprises.

3. *Airport Management: Operations and Strategy*

This title delves into the operational and strategic challenges faced by airport managers. Covering topics such as airport planning, safety regulations, and customer service enhancement, it provides practical frameworks for efficient airport administration. The book is essential for MBA candidates specializing in aviation infrastructure and operations management.

4. *Airline Marketing and Customer Experience*

A detailed exploration of marketing principles applied to airlines, this book emphasizes branding, market segmentation, and customer relationship management. It discusses how airlines can enhance passenger experience through innovative service delivery and digital marketing strategies. MBA students learn to develop effective marketing plans that drive airline growth.

5. *Aviation Safety and Risk Management*

This book addresses the critical area of safety protocols and risk assessment in aviation. It presents methodologies for identifying hazards, managing risks, and ensuring compliance with international safety standards. The content is designed to equip future aviation managers with tools to maintain high safety levels in their organizations.

6. *Global Aviation Law and Policy*

Covering the legal frameworks governing the aviation industry worldwide, this book examines regulations, international treaties, and policy issues affecting airlines and airports. It provides insights into liability, airspace rights, and environmental laws relevant to aviation management. MBA students gain an understanding of the legal environment shaping aviation operations.

7. *Human Resource Management in Aviation*

This book explores the unique challenges of managing human capital in the aviation sector, including recruitment, training, and labor relations. It highlights the importance of leadership and organizational culture in fostering a productive workforce. The text is valuable for those pursuing management roles within airlines, airports, and related aviation entities.

8. *Supply Chain and Logistics in Aviation*

Focusing on the logistics and supply chain functions critical to aviation, this book discusses inventory management, procurement, and distribution strategies. It explains how efficient supply chain management contributes to cost reduction and service reliability. MBA students learn to optimize operations to support airline and airport efficiency.

9. *Innovation and Technology Management in Aviation*

This book examines the impact of technological advancements on the aviation industry, including digital transformation, automation, and sustainable technologies. It offers frameworks for managing innovation and integrating new technologies into aviation business models. The content prepares MBA students to lead technology-driven initiatives in aviation organizations.

mba in aviation management: AVIATION MANAGEMENT Prabhu TL, □ Aviation Management: Mastering the Business of the Skies □ Your Ultimate Guide to the Fast-Paced World of Aviation Take flight into one of the most dynamic and vital industries on Earth — Aviation. Whether you're a student, aspiring airline executive, airport manager, or aviation enthusiast, this comprehensive guide offers a complete roadmap to the inner workings of the global aviation ecosystem. □ Inside This Book, Discover: □ The fundamentals of aviation and airline operations □ Airport management, air traffic control, and infrastructure □ Strategic planning, finance, and logistics in aviation □□ Crew management, safety protocols, and crisis handling □ Regulatory frameworks, international air laws, and environmental impact □ Case studies of major airlines and industry trends shaping the future From booking systems to baggage handling, from fleet acquisition to fuel economics — this book demystifies it all, with clear explanations, real-world insights, and

practical knowledge. □ Perfect For: Aviation management students Airline professionals & ground staff Business & logistics learners Travel industry entrepreneurs Curious minds fascinated by aviation □ Why This Book? Because the skies aren't the limit — they're just the beginning. Master the art and science of aviation management and become a part of the industry that keeps the world moving.

mba in aviation management: Peterson's Graduate Programs in Business, Education, Health, Information Studies, Law & Social Work 2012 Peterson's, 2012-05-15 Peterson's Graduate Programs in Business, Education, Health, Information Studies, Law & Social Work 2012 contains a wealth of info on accredited institutions offering graduate degrees in these fields. Up-to-date info, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable data on degree offerings, professional accreditation, jointly offered degrees, part-time & evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. Also find valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

mba in aviation management: Practical Applications in Business Aviation Management James R. Cannon, Franklin D. Richey, 2012-01-16 Business aviation is one of America's most important yet least understood industries. Most organizations (about 85%) operating business aircraft are small and medium-size enterprises. They include a wide range of organizations: state governments, universities, charitable organizations, and all types of businesses. While the organizations that rely on business aviation are varied, they all have one thing in common: the need for fast, flexible, safe, and secure access to destinations worldwide. Many small U.S. businesses rely on business aviation. They are located in markets where the airlines have reduced or eliminated service, making business aviation an important connection to the rest of the world. Business aviation fosters efficiency and productivity, and is essential in an intensely competitive global marketplace. This textbook, *Practical Applications in Business Aviation Management*, systematically examines business aviation and provides you with a complete understanding of one of America's most dynamic industries. In this comprehensive guide to business aviation management, authors James R. Cannon and Franklin D. Richey provide in-depth and useful information on all aspects of managing a corporate aviation program. The book begins with a brief look at the history of business aviation and its important role in the aviation industry. It then moves on to focus on the practical issues facing all corporate aviation programs, such as: Regulatory compliance Administrative issues Aircraft and facility maintenance Finances and budgeting Aircraft selection and acquisition Standard operating procedures International operations Human resource management Training Communication and team building Safety and security And much more The book also includes a foreword by Ed Bolen, the President and CEO of the National Business Aviation Association. It is an essential tool for students and professionals who need comprehensive, accurate, and practical information on managing a corporate aviation program.

mba in aviation management: Designing and Executing Strategy in Aviation Management Dr Triant G Flouris, Professor Sharon L Oswald, 2012-10-01 *Designing and Executing Strategy in Aviation Management* is designed to provide an intensely practical guide to this critically important topic. Comprehensive in coverage and easy-to-read in style, it allows both professionals and students to understand the principles and practicalities of crafting and executing business strategies with an aviation context. The result is a comprehensive and multifaceted teaching/learning package, which includes applied case studies on a wide range of airlines and aviation businesses, setting out how these organizations deal with strategy formulation and implementation in critical areas. Topics covered include: corporate strategy, generic strategy, competitive strategy, internal and external environment assessment, mergers, alliances, safety and security. Written directly for both aviation professionals and student courses in aviation strategy,

aviation management and aviation operations, it will also be of great interest to aviation professionals in a variety of different fields, including airlines, corporate aviation, consultancy, etc., as well as academics within the field of aviation and those within the field of strategy and management science.

mba in aviation management: CompetitiveEdge: A Guide to Business Programs 2013

Peterson's, 2013-04-15 Peterson's CompetitiveEdge: A Guide to Graduate Business Programs 2013 is a user-friendly guide to hundreds of graduate business programs in the United States, Canada, and abroad. Readers will find easy-to-read narrative descriptions that focus on the essential information that defines each business school or program, with photos offering a look at the faces of students, faculty, and important campus locales. Quick Facts offer indispensable data on costs and financial aid information, application deadlines, valuable contact information, and more. Also includes enlightening articles on today's MBA degree, admissions and application advice, new business programs, and more.

mba in aviation management: Graduate Programs in Business, Education, Information

Studies, Law & Social Work 2014 (Grad 6) Peterson's, 2013-12-20 Peterson's Graduate Programs in Business, Education, Information Studies, Law & Social Work 2014 contains comprehensive profiles of more than 11,000 graduate programs in disciplines such as, accounting & finance, business administration & management, education, human resources, international business, law, library & information studies, marketing, social work, transportation management, and more. Up-to-date info, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable data on degree offerings, professional accreditation, jointly offered degrees, part-time & evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. Also find valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

mba in aviation management: Graduate Programs in Business, Education, Information

Studies, Law & Social Work 2015 (Grad 6) Peterson's, 2014-12-30 Graduate Programs in Business, Education, Information Studies, Law & Social Work 2015 contains helpful facts and figures on more than 11,000 graduate programs. The comprehensive directory includes more than 1,850 institutions and their programs in all of the relevant disciplines such as accounting and finance, business management, education, law, library and information sciences, marketing, social work, and many more. Informative data profiles feature facts and figures on accreditation, degree requirements, application deadlines, contact information, financial support, faculty, and student body profiles. Two-page in-depth descriptions, written by featured institutions, offer complete details on specific graduate program, school, or department as well as information on faculty research. Comprehensive directories list programs in this volume, as well as others in the graduate series.

mba in aviation management: Peterson's Graduate Programs in Business 2011

Peterson's, 2011-06-01 Peterson's Graduate Programs in Business, Education, Health, Information Studies, Law & Social Work contains a wealth of information on colleges and universities that offer graduate work in these fields. Institutions listed include those in the United States, Canada, and abroad that are accredited by U.S. accrediting agencies. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. Readers will find helpful links to in-depth descriptions that offer additional detailed information about a specific program or department, faculty members and their research, and much more. In addition, there are valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of

accrediting agencies.

mba in aviation management: *Peterson's Graduate Programs in Health-Related Professions 2011* Peterson's, 2011-06-01 Peterson's Graduate Programs in Business, Education, Health, Information Studies, Law & Social Work contains a wealth of information on colleges and universities that offer graduate work in these fields. Institutions listed include those in the United States, Canada, and abroad that are accredited by U.S. accrediting agencies. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. Readers will find helpful links to in-depth descriptions that offer additional detailed information about a specific program or department, faculty members and their research, and much more. In addition, there are valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

mba in aviation management: *British Qualifications 2020* Kogan Page Editorial, 2019-12-03 Now in its 50th edition, British Qualifications 2020 is the definitive one-volume guide to every recognized qualification on offer in the United Kingdom. With an equal focus on both academic and professional vocational studies, this indispensable guide has full details of all institutions and organizations involved in the provision of further and higher education, making it the essential reference source for careers advisers, students, and employers. It also contains a comprehensive and up-to-date description of the structure of further and higher education in the UK, including an explanation of the most recent education reforms, providing essential context for the qualifications listed. British Qualifications 2020 is compiled and checked annually to ensure the highest currency and accuracy of this valuable information. Containing details on the professional vocational qualifications available from over 350 professional institutions and accrediting bodies, informative entries for all UK academic universities and colleges, and a full description of the current structural and legislative framework of academic and vocational education, it is the complete reference for lifelong learning and continuing professional development in the UK.

mba in aviation management: *Peterson's Graduate Schools in the U.S. 2010* Peterson's, 2009 Shares overviews of nearly one thousand schools for a variety of disciplines, in a directory that lists educational institutions by state and field of study while sharing complementary information about tuition, enrollment, and faculties.

mba in aviation management: *Addressing Uncertainty about Future Airport Activity Levels in Airport Decision Making* Ian S. Kincaid, 2012 This report provides a guidebook on how to develop air traffic forecasts in the face of a broad range of uncertainties. It is targeted at airport operators, planners, designers, and other stakeholders involved in planning, managing, and financing of airports, and it provides a systems analysis methodology that augments standard master planning and strategic planning approaches. This methodology includes a set of tools for improving the understanding and application of risk and uncertainty in air traffic forecasts as well as for increasing overall effectiveness of airport planning and decision making. In developing the guidebook, the research team studied existing methods used in traditional master planning as well as methods that directly address risk and uncertainty, and based on that fundamental research, they created a straightforward and transparent systems analysis methodology for expanding and improving traditional planning practices, applicable through a wide range of airport sizes. The methods presented were tested through a series of case study applications that also helped to identify additional opportunities for future research and long-term enhancements.

mba in aviation management: *Graduate & Professional Programs: An Overview 2015 (Grad 1)* Peterson's, 2014-12-23 Graduate & Professional Programs: An Overview 2015 contains over 2,000 university and college profiles with detailed information on the degrees available, enrollment figures, tuition, financial support, housing, faculty, research affiliations, library facilities, and contact

information. This graduate guide enables students to explore program listings by field, geographic area, and institution. Two-page in-depth descriptions, written by each featured institution, give complete details on the graduate study available. Up-to-date appendixes list institution changes since the last edition and abbreviations used in the guide. Graduate & Professional Programs: An Overview 2015 is the latest in Peterson's 40+ year history of providing prospective students with the most up-to-date graduate school information available.

mba in aviation management: Quality Function Deployment and Systems Supportability

John Longshore, Angela Cheatham, Jim Gibson, 2023-11-01 This book not only presents the overall development of quality function deployment (QFD) and what it has been used for to date but a new product support orientation by which it can be employed. It is product and service "system" focused and presents how blending the processes and elements of supportability and analysis into a QFD-modeled methodology can achieve optimal cost savings and performance efficiency and effectiveness. In addition, a working model is provided that will assist those that elect to use such an approach to current/new product and/or service development. QFD is widely spreading throughout the world because of its outstanding usefulness. It is aimed to fulfill the customer's expectation of a product or service design. Organizations of all sizes are using it to (1) save product and service design and development time, (2) focus on how the product or service might satisfy the customer and (3) improve communication at all levels of an organization during the development process. Based on these three reasons, today's traditional QFD can be divided into three branches and analyzed. First, QFD can be implemented effectively for developing new products and designs by establishing the linkage between design stages through the manufacturing environment. However, research has found that traditional QFD is quite weak in implementing modifications to existing product and service design during its predicted lifecycle. Second, most research to this point has been squarely focused on the "voice of the customer" for prioritizing customer needs. While certainly needed, the "voice of the system" that is being used to produce the product/service and how they operate during its intended life cycle has been given less attention. Third, QFD is often viewed as overly labor-intensive and thus costly, and, because of its team-based development logic, manual in nature by those involved during its development and implementation. Research has shown that life cycle sustainment planning and support for current or proposed products and/or services requires a seamless and balanced life cycle support methodology. To achieve this type of support, twelve functional elements have been identified that form the product support infrastructure. A new approach, one that views product support as an integrative activity where all twelve product support elements are assessed over the entire product and/or service life cycle is being deployed. With this deployment comes a need to ensure Key Performance Parameters (KPPs) are achieved and functional alignment obtained by balancing supportability element cost and provisioning throughout the entire product and/or service lifecycle, not just during the development stage, and to view the system as the "customer" and thus listen to the "Voice of the System" when assessing supportability requirements. Quality Function Deployment (QFD) is such a tool. This book contains four sections. Section 1 provides an initial overview of QFD origins, and history and highlights some of its use today. It addresses how QFD fits within the organization, increasing revenue, and reducing cost. It outlines a step-by-step strategy for successfully deploying QFD within the organization. Section 2 examines the evolving product and/or service requirement, creating the design solution using QFD, assessing supportability characteristics using QFD, and performing functional supportability analysis using QFD. Section 3 provides a guide for developing the life cycle supportability solution using QFD methodology on an ongoing basis, and managing processes throughout the systems lifecycle. Section 4 addresses using QFD in an imperfect world and will provide insight into how to use QFD beyond the standard "house of quality" concept.

mba in aviation management: Peterson's Graduate & Professional Programs: An Overview--Profiles of Institutions Offering Graduate & Professional Work Peterson's, 2011-06-01 Graduate & Professional Programs: An Overview--Profiles of Institutions Offering Graduate & Professional Work contains more than 2,300 university/college profiles that offer

valuable information on graduate and professional degree programs and certificates, enrollment figures, tuition, financial support, housing, faculty, research affiliations, library facilities, and contact information.

mba in aviation management: Graduate Schools in the U.S. 2011 Peterson's, 2010-07-01 Peterson's Graduate Schools in the U.S. is the snapshot paperback version of the hardcover Peterson's Graduate & Professional Programs: An Overview (book one of the six-volume hardcover Grad series). This book includes articles with information on how to finance a graduate education, tips on choosing the right program, and why accreditation is important. It has up-to-date information on hundreds of U.S. institutions that offer master's and doctoral degree programs in a wide range of fields--from accounting to zoology--with facts and figures on enrollment, faculty, computer and library facilities, expenses, and contact information. The program listings are searchable by state or filed and includes an alphabetical school index.

mba in aviation management: Graduate & Professional Programs: An Overview 2011 (Grad 1) Peterson's, 2011-05-01 An Overview contains more than 2,300 university/college profiles that offer valuable information on graduate and professional degrees and certificates, enrollment figures, tuition, financial support, housing, faculty, research affiliations, library facilities, and contact information. This graduate guide enables students to explore program listings by field and institution. Two-page in-depth descriptions, written by administrators at featured institutions, give complete details on the graduate study available. Readers will benefit from the expert advice on the admissions process, financial support, and accrediting agencies.
