mazzarino construction development ltd: War and Health Catherine Lutz, Andrea Mazzarino, 2019-11-05 Provides a detailed look at how war affects human life and health far beyond the battlefield Since 2010, a team of activists, social scientists, and physicians have monitored the lives lost as a result of the US wars in Iraq, Afghanistan, and Pakistan through an initiative called the Costs of War Project. Unlike most studies of war casualties, this research looks beyond lives lost in violence to consider those who have died as a result of illness, injuries, and malnutrition that would not have occurred had the war not taken place. Incredibly, the Cost of War Project has found that, of the more than 1,000,000 lives lost in the recent US wars, a minimum of 800,000 died not from violence, but from indirect causes. War and Health offers a critical examination of these indirect casualties, examining health outcomes on the battlefield and elsewhere—in hospitals, homes, and refugee camps—both during combat and in the years following, as communities struggle to live normal lives despite decimated social services, lack of access to medical care, ongoing illness and disability, malnutrition, loss of infrastructure, and increased substance abuse. The volume

considers the effect of the war on both civilians and on US service members, in war zones—where healthcare systems have been destroyed by long-term conflict—and in the United States, where healthcare is highly developed. Ultimately, it draws much-needed attention to the far-reaching health consequences of the recent US wars, and argues that we cannot go to war—and remain at war—without understanding the catastrophic effect war has on the entire ecosystem of human health.

mazzarino construction development ltd: The Cambridge History of Communism: Volume 3, Endgames? Late Communism in Global Perspective, 1968 to the Present Julianne Fürst, Silvio Pons, Mark Selden, 2017-09-21 The third volume of The Cambridge History of Communism spans the period from the 1960s to the present, documenting the last two decades of the global Cold War and the collapse of Soviet socialism. An international team of scholars analyze the rise of China as a global power continuing to proclaim its Maoist allegiance, and the transformation of the geopolitics and political economy of Cold War conflict in an era of increasing economic interpenetration. Beneath the surface, profound political, social, economic and cultural changes were occurring in the socialist and former socialist countries, resulting in the collapse and transformations of the existing socialist order and the changing parameters of world Marxism. This volume draws on innovative research to bring together history from above and below, including social, cultural, gender, and transnational history to transcend the old separation between Communist studies and the broader field of contemporary history.
