This type of education could be considered non-traditional as it goes beyond the typical educational path and develops learners that are self-initiated and focused on personal development in the form of gaining some sort of education. The Research Anthology on Adult Education and the Development of Lifelong Learners focuses specifically on adult education and the best practices, services, and educational environments and methods for both the teaching and learning of adults. This spans further into the understanding of what it means to be a lifelong learner and how to develop adults who want to voluntarily contribute to their own development by enhancing their education level or knowledge of certain topics. This book is essential for teachers and professors, course instructors, business professionals, school administrators, practitioners, researchers, academicians, and students interested in the latest advancements in adult education and lifelong learning.

This book confirms the significance of social capital as an analytical tool, while challenging the basis on which current policy is being developed. It: · offers a wealth of evidence on a topic that has become central to contemporary government; · provides a detailed empirical investigation of the relationship between social capital, knowledge creation and lifelong learning; · relates the findings to wider policy debates; · questions the dominant theoretical models of social capital; and · confronts the assumption of many policy makers that the obvious solution to social problems is to 'invest in social capital'.

mcclenaghan adult community education: Social Capital John Field, 2008-04-30

The term 'social capital' is a way of defining the intangible resources of community, shared values and trust upon which we draw in daily life. It has achieved considerable international currency across the social sciences through the very different work of Pierre Bourdieu in France and James Coleman and Robert Putnam in the United States, and has been widely taken up within politics and sociology as an explanation for the decline in social cohesion and community values in western societies. It has also been adopted by policy makers, particularly in international governmental bodies such as the World Bank. This fully revised second edition of Social Capital provides a thorough overview of the intense and fast-moving debate surrounding this subject. This clear and comprehensive introduction explains the theoretical underpinning of the subject, the empirical work that has been done to explore its operation, and the influence that it has had on public policy and practice. It includes guides to further reading and a list of the most important websites.

This text also focuses on the nature and significance of his curriculum thinking, specifically his arguments and provocations regarding English teaching, the English classroom, and the contexts that infuse and shape them. It constitutes a rich resource for rethinking English teaching in the present day and provides an important contribution to the historical imagination. With all due

mcclenaghan adult community education: Brick Walls Thomas E. Truitt, 2006 In 1987, when veteran school administrator Thomas E. Truitt took the post of district superintendent in Florence, South Carolina, he assumed leadership of a public school system in denial of its racial disharmony. More than three decades after Brown v. Board of Education, Florence District One had never accomplished an integration plan that met federal approval; rather the district had skirted the intent of the federal mandate by employing freedom of choice and traditional attendance zones. In the 1990s, a single issue - the need to replace an aging, predominantly black elementary school - brought to the fore the local population's anguished attitudes about race and education. Brick Walls and Other Barriers recounts in wrenching detail how legacies of discrimination and injustice combined to divide a community along racial lines. Truitt takes readers into the complex inner workings of a modern school system, detailing the relationships between school boards and professional administrators to which few parents or citizens are privy.
