mckinney black history month: One of the First Ralph Stokes, Chris McKinney, 2021-07-05 Ralph Stokes has spent most of his life challenging racial discrimination and prejudice. His method has always been to overcome racism with personal, professional, and moral excellence, taking a loving but determined stance toward anyone who mistreated him due to the color of his skin. Over the years, Ralph's story has been featured by The New York Times, The Washington Post, CNN, USAToday.com, The Atlanta Journal-Constitution, Golf Digest, ESPN Radio, AL.com, and many other media outlets. However, most of those media outlets only told one or two specific parts of Ralph's story. A CNN documentary examined how—when Ralph was one of the top football recruits in the nation in 1970—Ralph's mother stood eye to eye with the legendary coach Paul "Bear" Bryant and challenged him about past racism. The New York Times touched on Ralph's tendency to become one of the first Black people to do various things, and described how Ralph uses that experience to

inspire young minorities to do the same. The Washington Post described Ralph's role in integrating The University of Alabama football team and winning favor for Black athletes in various ways before and after graduation. USA Today.com told the story of how Ralph dealt with prejudice when he became one of the first Black football players at Robert E. Lee High School in Montgomery, Alabama, after being forced to leave his beloved Booker T. Washington Yellow Jackets. The Atlanta Journal-Constitution examined what it was like for Ralph to be the only African American member at the prestigious Atlanta Country Club for 7 years, and why it was so important for Ralph to challenge segregation in the world of golf. AL.com briefly highlighted how Ralph stood up to racist policies at the University of Alabama during his time there as a football player. Now there is a book that tells the whole story. In *One of the First*, you'll read detailed accounts of those parts of Ralph's story, but you'll also read how: ***Ralph grew up being inspired by other African American pioneers, with his dad owning a negro league baseball team and his family being founding members of the church pastored by noted civil rights leader Fred Gray ***Ralph developed a "father away from home" relationship with Paul "Bear" Bryant in spite of having to challenge discriminatory policies during his time at Alabama ***Ralph became the first Black football player at the University of Alabama to attend their business school, after initially being denied access and told it was "too hard" for him ***Ralph singlehandedly challenged a rule that said Black players could not join fraternities, in spite of the fact that white players could join fraternities at will ***Ralph almost singlehandedly integrated the professional sphere of the health insurance industry, taking on a role as the first Black marketing professional in the industry in spite of serious resistance, ultimately becoming an executive in the industry ***Ralph frequently encountered blatant racists in his career during the 70s and 80s, often facing off with them in corporate boardrooms, and winning them over through love and perseverance—including the president of a large lumber company who was a known racist and also widely reputed to be an Imperial Wizard for the KKK ***Ralph lived by the principle of personal responsibility, refusing to take on a victim mentality and never letting other people's racism become an excuse for the results he got in life ***In a lifelong pursuit of his calling for racial integration, Ralph continues to do whatever he can to make strides to this day, recently being elected as the first-ever African American President of the Georgia State Golf Association Let Ralph's story inspire you today! "Ralph Stokes has broken many barriers, from the world of football, to the business world, to the world of golf. Ralph consistently persevered through biases, blatant racism, and other challenges, paving the way for those who came after him." — Sylvester Croom, First African American Head Football Coach in the SEC "One of the First reveals the truth that with commitment, perseverance, and faith, you can overcome any obstacle in life, including racism." — Ozzie Newsome, NFL Hall of Fame Tight End and First African American General Manager in the NFL "With his new book, *One of the First*, Ralph has drawn out tremendous wisdom from his personal life, addressing some issues that are uncomfortable. He does not point fingers, but he does teach some very valuable lessons about racial issues and about persevering through challenges. A must read for everyone." — Wendell Hudson, First African American Scholarship Athlete at The University of Alabama

mckinney black history month: Laundering Black Rage Too Black, Rasul A Mowatt, 2024-04-11 *Laundering Black Rage: The Washing of Black Death, People, Property, and Profits* is a spatial and historical critique of the capitalist State that examines how Black Rage—conceived as a constructive and logical response to the conquest of resources, land, and human beings racialized as Black—is cleaned for the unyielding means of White capital. Interlacing political theory with international histories of Black rebellion, it presents a thoughtful challenge to the counterinsurgent tactics of the State that consistently convert Black Rage into a commodity to be bought, sold, and repressed. *Laundering Black Rage* investigates how the Rage directed at the police murder of George Floyd could be marshalled to funnel the Black Lives Matter movement into corporate advertising and questionable leadership, while increasing the police budgets inside the laundry cities of capital - largely with our consent. Essayist/Performer Too Black and Geographer Rasul A. Mowatt assert Black Rage as a threat to the flow of capital and the established order of things, which must therefore be managed by the process of laundering. Intertwining stories of Black resistance throughout the African diaspora, State building under capitalism, cities as sites of

laundering, and the world making of empire, *Laundering Black Rage* also lays the groundwork for upending the laundering process through an anti-colonial struggle of reverse-laundering conquest. Relevant to studies of race and culture, history, politics, and the built environment, this pathbreaking work is essential reading for scholars and organizers enraged at capitalism and White supremacy laundering their work for nefarious means.

'Eric Collins is one of the most powerful business people in Britain.' *The Times* _____ Step 1: Embrace the unexpected Step 2: Engage in consistent and continuous acts of disruption Step 3: Let go of small - think bigger, think global and prepare for pitfalls Step 4: Take risks using data to mitigate the downside Step 5: Put your money where your mouth is, make your resources matter Step 6: Leverage what you know Step 7: Become a convener by making your mission bigger than yourself Step 8: Invest in women to create Alpha Step 9: Sell your vision, make time-appropriate asks and don't forget to recruit allies Step 10: Always bet on Black _____ At a time when half of Black households in the UK live in persistent poverty - over twice as many as their white counterparts - *We Don't Need Permission* argues that investing in Black and under-represented entrepreneurs in order to create successful businesses is the surest, fastest socio-economic game-changer there is. Long-lasting economic empowerment - from education to health outcomes - is key to solving the multiple problems that result from systemic racism and sexism. And it is the best way to close the inequality gaps that have hampered and continue to hinder Black people and all women too. To address this problem head on, Eric Collins co-founded venture capital firm Impact X Capital to invest in under-represented entrepreneurs in the UK and Europe. In *We Don't Need Permission*, Collins identifies ten key principles of successful entrepreneurship, and reveals how it's possible to change a system that has helped some, while holding others back. The book not only aims to inspire and motivate under-represented people to take their future and economic destiny into their own hands, but will demand of current business leaders and organizations that they do business better. It's time to stop waiting for someone else to give permission and start boldly making the world we want to see. _____

mckinney black history month: It Was Like a Fever Francesca Polletta, 2009-01-14 Activists and politicians have long recognized the power of a good story to move people to action. In early 1960 four black college students sat down at a whites-only lunch counter in Greensboro, North Carolina, and refused to leave. Within a month sit-ins spread to thirty cities in seven states. Student participants told stories of impulsive, spontaneous action—this despite all the planning that had gone into the sit-ins. “It was like a fever,” they said. Francesca Polletta’s *It Was Like a Fever* sets out to account for the power of storytelling in mobilizing political and social movements. Drawing on cases ranging from sixteenth-century tax revolts to contemporary debates about the future of the World Trade Center site, Polletta argues that stories are politically effective not when they have clear moral messages, but when they have complex, often ambiguous ones. The openness of stories to interpretation has allowed disadvantaged groups, in particular, to gain a hearing for new needs and to forge surprising political alliances. But popular beliefs in America about storytelling as a genre have also hurt those challenging the status quo. A rich analysis of storytelling in courtrooms, newsrooms, public forums, and the United States Congress, *It Was Like a Fever* offers provocative new insights into the dynamics of culture and contention.

mckinney black history month: Civil Rights History from the Ground Up Emilye Crosby, 2011

After decades of scholarship on the civil rights movement at the local level, the insights of bottom-up movement history remain essentially invisible in the accepted narrative of the movement and peripheral to debates on how to research, document, and teach about the movement. This collection of original works refocuses attention on this bottom-up history and compels a rethinking of what and who we think is central to the movement. The essays examine such locales as Sunflower County, Mississippi; Memphis, Tennessee; and Wilson, North Carolina; and engage such issues as nonviolence and self-defense, the implications of focusing on women in the movement, and struggles for freedom beyond voting rights and school desegregation. Events and incidents discussed range from the movement's heyday to the present and include the Poor People's Campaign mule train to Washington, D.C., the popular response to the deaths of Rosa Parks and Coretta Scott King, and political cartoons addressing Barack Obama's presidential campaign. The kinds of scholarship represented here--which draw on oral history and activist insights (along with traditional sources) and which bring the specificity of time and place into dialogue with broad themes and a national context--are crucial as we continue to foster scholarly debates, evaluate newer conceptual frameworks, and replace the superficial narrative that persists in the popular imagination.
