mclaren technology centre visit: The Business Case for Love Marc Cox, 2020-04-01 Love it? Hate it? Or, just don't care? How we feel about something dramatically affects how we interact with it. When we feel, we care. When we care, things happen. Companies that are thriving, not just surviving, are much more than a set of ruthlessly efficient and mechanistic processes – they are a social system operated by people for people. The quality of relationships, both inside and outside the organization is a far more important driver of sustainable success or failure than the quality of its control systems. The head is important, but it is the heart that matters most. If you want your customers to be brand ambassadors and your employees to brag about you to their friends, you need them to not just think you're great – you need them to feel you're great. You need them to love you – and for that, you need them to feel that you love them. For over a decade Marc Cox has been helping

companies whose toxic cultures, miserable employees, and angry customers have all but destroyed them to rebuild their company spirit, discover the business case for love and build an organization that is wonderful to work for, brilliant to do business with and has the mindset of creating memorable employee and customer experiences. Underpinned by fresh insights and perspectives, robustly tested and refined by the real world experience of working with a wide range of companies and over 2,000 senior executives drawn from all parts of the world, and filled with fascinating and illustrative "love stories" the book will help you to make the business case for love. It will help you to find a more rewarding and invigorating way of working – both emotionally and financially. In short, it shows what happens when the love is put back into business.

mclaren technology centre visit: Forever Forward Ben Hunt, 2025-05-22 With a foreword by McLaren CEO Zak Brown and written with inside access, this is the real-time, unfolding story of one of F1's greatest ever teams, as they rise back up from oblivion. Few names in motorsports carry the same authority as McLaren and, with their remarkable victory in the 2024 constructors championship, they are now returning to form in a spectacular way under the leadership of Zak Brown. Going into 2023, Brown's team were the second slowest on the grid, only to end it as arguably the second fastest, after a dramatic mid-season turnaround. In 2024, their driver Lando Norris achieved his first ever Grand Prix win in Miami, and McLaren fiercely competed for podiums against Ferrari and Red Bull. Zak Brown took over a failing team from Ron Dennis in 2018, and his strategic vision is now seeing results. McLaren are on the rise again, looking to a future that will echo its hallowed past and legendary drivers James Hunt, Alain Prost, Niki Lauda, Ayrton Senna and Lewis Hamilton. With access to the team's inner sanctum, this exhilarating account delves deep into McLaren's history, revealing how their rich heritage forms the core of their identity today, before taking us behind the scenes to give us the inside track on their extraordinary resurgence. Guided by the motto motto 'Forever Forward', McLaren has a tradition of coming back from adversity time and time again to take the chequered flag against all the odds. Here they go again.

His phenomenal debut season was nothing short of a revelation, coming through against all the odds to dominate and revolutionise the world of motor racing. It was an outcome no one could have predicted: thrown in at the deep end 'on a mighty whim' by McLaren team owner Ron Dennis, not only did Lewis have to combat his own nerves and fears, he had to overcome a dissenter within his own camp. With behind-the-scenes insight into the intense rivalry between Hamilton and his teammate Fernando Alonso which threatened to derail the young Briton's dream, and the low-down on the 'spy-gate' scandal, this biography describes how Lewis handled the intensity of the media scrum around his relationship with Nicole Scherzinger and kept his dignity to emerge triumphant as he racked up sensational wins around the world. Now he has even joined iconic speedsters Damon Hill and Bradley Wiggins as a BBC Sports Personality of the Year winner. From his momentous clinching of the 2014 World Championship in Abu Dhabi to the bitter rivalry with former friend Nico Rosberg - which culminated in the German engineering a deliberate high-speed crash - bestselling sports author Frank Worrall traces the slipstream of Hamilton's incredible career as the fastest driver on the planet. This is the ultimate story of the driver whom Sir Jackie Stewart says 'has re-written the rookie rule book'. But he is a rookie no more. Lewis Hamilton has accelerated into pole position to be called Britain's greatest ever race driver.

mclaren technology centre visit: Lewis Hamilton: Triple World Champion - The Biography Frank Worrall, 2016-02-15 LEWIS HAMILTON is the undisputed British hero of Formula One. His phenomenal successes have seen him move to third on the all-time Grand Prix winners list and, for a record-equalling third time, plant a British flag onto the mountain-top of motor racing. This is the ultimate story of the driver who has gone from being the rookie Sir Jackie Stewart said 'has rewritten the rule book' to a triple world champion, accelerating into pole position to perhaps be called Britain's greatest ever race driver.

Hamilton's debut season in 2007 won him fans around the world, and his place in Formula 1 history was sealed the following year when he became the youngest ever world champion. In the years since, he has created headlines on and off the track with his rivalries with Max Verstappen, Nico Rosberg and Sebastian Vettel and relationships that have landed him on the front pages of the tabloids. However, despite the media glare, he has continued to prove his incredible talent and tenacity and remains utterly dominant in his sport. In this insightful biography, bestselling sports author Frank Worrall traces the slipstream of Hamilton's incredible career as the fastest driver on the planet.
