## Program Overview

The MCW internal medicine residency is a comprehensive training program accredited to provide high-quality education and clinical experience in internal medicine. It focuses on developing well-rounded physicians capable of delivering advanced patient care across various settings. The program is affiliated with multiple hospitals and outpatient clinics, offering residents exposure to diverse patient populations and medical conditions. Emphasizing professionalism, clinical excellence, and lifelong learning, the residency prepares graduates for board certification and successful careers in primary care, subspecialties, or academic medicine.

## Mission and Vision

The mission of the MCW internal medicine residency is to cultivate competent, compassionate, and skilled internists who contribute significantly to the healthcare

community. The vision centers on fostering an environment that encourages innovation, critical thinking, and collaborative practice among residents and faculty alike.

## **Program Structure**

The residency typically spans three years, divided into progressive clinical and educational experiences. Each year builds on the previous one to enhance clinical reasoning, procedural skills, and patient management capabilities. The program includes inpatient rotations, outpatient clinics, specialty electives, and scholarly activities.

## **Curriculum and Clinical Training**

The curriculum of the MCW internal medicine residency is designed to provide a balanced mix of inpatient and outpatient experiences, ensuring comprehensive exposure to adult medicine. Residents engage in core rotations, subspecialty electives, and interdisciplinary conferences, promoting a well-rounded education.

## **Core Rotations**

Core rotations include general medicine wards, intensive care units, cardiology, pulmonology, gastroenterology, nephrology, infectious diseases, and endocrinology. These rotations develop proficiency in diagnosing and managing common and complex medical conditions.

## **Outpatient Training**

Outpatient clinics are integral to the curriculum, offering continuity of care experiences and exposure to chronic disease management. Residents learn to coordinate care, counsel patients, and implement preventive health strategies.

## **Educational Conferences and Didactics**

The program features regular didactic sessions, case conferences, morbidity and mortality meetings, and journal clubs. These activities support evidence-based learning and foster critical appraisal skills.

## **Faculty and Mentorship**

The MCW internal medicine residency boasts a distinguished faculty comprising experienced clinicians, researchers, and educators. Faculty members are committed to resident education and professional growth through personalized mentorship and guidance.

## **Faculty Expertise**

Faculty members represent various subspecialties within internal medicine, providing residents with access to expert knowledge and diverse clinical perspectives. Their active involvement in research and clinical innovation enriches the educational environment.

## **Mentorship Programs**

Structured mentorship programs pair residents with faculty mentors to support career development, research involvement, and personal well-being. Mentors assist in navigating training challenges and preparing for fellowship or practice.

## **Application Process and Requirements**

Applying to the MCW internal medicine residency requires careful preparation and understanding of the program's selection criteria. The application process seeks candidates with strong academic records, clinical aptitude, and a commitment to internal medicine.

## **Eligibility Criteria**

Applicants must have graduated from an accredited medical school and completed prerequisite clinical rotations. International medical graduates are welcomed, provided they meet visa and certification requirements.

## **Application Components**

- ERAS application with a detailed personal statement
- Curriculum vitae highlighting clinical and research experiences
- Letters of recommendation from clinical supervisors or faculty
- USMLE or COMLEX scores demonstrating medical knowledge competency
- Medical school transcripts and Dean's letter (MSPE)

## **Interview Process**

Selected candidates are invited for interviews that assess clinical reasoning, communication skills, and professionalism. Interviews provide an opportunity for applicants to learn about the program culture and expectations.

# Research Opportunities

The MCW internal medicine residency encourages resident involvement in research to advance medical knowledge and improve patient care. Opportunities are available across clinical, translational, and health services research domains.

## Research Curriculum

Residents receive structured training in research methodology, biostatistics, and scientific writing. This foundation supports successful project development and scholarly dissemination.

## Available Research Projects

Current research initiatives include studies in cardiovascular disease, infectious diseases, health disparities, and quality improvement. Residents can collaborate with faculty mentors and participate in multicenter trials or independent investigations.

## Resident Life and Support

Life as a resident in the MCW internal medicine program balances rigorous clinical responsibilities with wellness resources and community engagement. Support systems are established to promote resident well-being and professional satisfaction.

## Work-Life Balance

The residency program incorporates duty hour regulations and wellness programs to help residents maintain a healthy balance between work and personal life. Activities such as wellness workshops, peer support groups, and recreational events are available.

## Resident Benefits

- Competitive salary and benefits package
- Access to mental health and counseling services
- Opportunities for leadership and advocacy involvement
- Housing assistance and relocation support
- Educational resources including board review materials

## **Career Outcomes and Alumni**

Graduates of the MCW internal medicine residency have a strong track record of success in diverse career paths. The program's comprehensive training equips residents to excel in primary care, subspecialty fellowships, academic medicine, and healthcare leadership roles.

## **Board Certification Success**

Residents consistently achieve high pass rates on the American Board of Internal Medicine (ABIM) certification exam, reflecting the program's commitment to clinical excellence and education.

## **Alumni Network**

The active alumni network provides ongoing support and professional opportunities for graduates. Many alumni hold prominent positions in academic institutions, healthcare organizations, and research centers nationwide.

**mcw internal medicine residency:** Victors Over Leukemia Estrellita H. Redmon, MD, 2022-12-12 The Leukemia and Lymphoma Society statistics show every three minutes someone in the United States is diagnosed with a blood cancer such as leukemia, lymphoma, myeloma, or myelodysplasia. Unfortunately, my family was no exception when my son was diagnosed with acute lymphoblastic leukemia (ALL). Our experience inspired me to write Victors Over Leukemia to relate my son's and family's struggle with, and ultimate triumph over, a disease that not long ago was a certain death sentence. Whatever the situation that has piqued your interest, I am glad you chose this book. I wanted this book to present our ordeal from the perspectives of all the main characters. Whether or not you have had prior experience with a blood cancer, I want you to become part of our story and determine which perspective speaks to you. As you read Victors Over Leukemia, I hope it fortifies your hope in triumph as the main characters articulate their thoughts, fears, faith, and emotions as they travel the tough road of a leukemia diagnosis. Each person's experience is unique, but there are some constant variables. Based on this premise, I believe the reader will identify with the book. It's the true story of a brave young man and is filled with facts, faith, humor, and encouragement.

**mcw internal medicine residency:** *Handbook on Medical Student Evaluation and Assessment* Alliance for Clinical Education, 2015-07-17 The Alliance for Clinical Education (ACE) is proud to announce its newest text, the Handbook on Medical Student Evaluation and Assessment. This comprehensive book derives from some chapters in the indispensable fourth edition of the Guidebook for Clerkship Directors, but expands upon those chapters and contains critical new information about milestones, professionalism, and program evaluation. It is useful not only for clerkship directors, but also for preclinical educators, teachers of electives and subinternships, the dean's office, the student affairs office, residency and fellowship program directors, and anyone who teaches, advises, or mentors medical students. It discusses all aspects of assessing learners, with well-referenced presentations starting from basic definitions, progressing through various assessment methods, and including reviews of the legal aspects of assessments.

**mcw internal medicine residency:** *Cambridge Handbook of Psychology, Health and Medicine* Carrie D. Llewellyn, Susan Ayers, Chris McManus, Stanton Newman, Keith J. Petrie, Tracey A. Revenson, John Weinman, 2019-05-16 This third edition of the much acclaimed Cambridge Handbook of Psychology, Health and Medicine offers a fully up-to-date, comprehensive, accessible, one-stop resource for doctors, health care professionals, mental health care professionals (such as psychologists, counsellors, specialist nurses), academics, researchers, and students specializing in health across all these fields. The new streamlined structure of the book features brief section overviews summarising the state of the art of knowledge on the topic to make the information easier to find. The encyclopaedic aspects of the Handbook have been retained; all the entries, as well as the extensive references, have been updated. Retaining all the virtues of the original, this edition is expanded with a range of new topics, such as the effects of conflict and war on health and wellbeing, advancements in assisted reproduction technology, e-health interventions, patient-reported outcome measures, health behaviour change interventions, and implementing changes into health care practice.

**mcw internal medicine residency: Objective Structured Clinical Examinations** Sondra Zabar, Elizabeth Kachur, Kathleen Hanley, Colleen Gillespie, Adina Kalet, 2025-07-25 Objective Structured Clinical Examinations (OSCEs) or other Standardized Patient/Participant (SP) exercises are an important methodology for teaching and assessment in health professions education across disciplines and the continuum of training. The first edition of Objective Structured Clinical Examinations offered a systematic approach for educators to get involved in the process of creating OSCEs and similar SP exercises. The second edition uses the same successful format to make the OSCE process easy and reproducible and adds novel material and innovative best practices for OSCEs in every context. The first edition of this book was based on the editors' 20 years of experience producing OSCEs without a clinical skills center — in empty classrooms or walk-in clinics on weekends, working with well-trained SPs and using carefully designed clinical scenarios. In the 10 years since, they have engaged in multidisciplinary and inter-professional collaborations and expanded their approach to designing and implementing successful performance-based assessment, both inside and outside of high-tech simulation centers. The original chapters - (1) Introduction; (2) 10-step approach; (3) Remediation; and (4) Unannounced Standardized Patients - have been updated and charts, tables and best practices throughout these chapters are elaborated and expanded on. This second edition also features an updated Foreword by Ronald Harden and Preface by Mack Lipkin, Adina Kalet, and Sandy Zabar, along with eight new chapters in collaboration with other educators and researchers, covering topics such as: analyzing OSCE notes for clinical reasoning; OSCE data, reporting and visualization; scholarship and a research registry; examples of performance-based assessment in practice; virtual OSCEs and telemedicine skills; OSCEs for transitions; OSCEs for teaching; and SP programs. This expanded edition will be useful to both

novice and advanced educators and offers an important contribution to the health professions education literature.

**mcw internal medicine residency: An Introduction to Medical Teaching** Kathryn N. Huggett, William B. Jeffries, 2014-06-30 Few faculty members in academic medical centers are formally prepared for their roles as teachers. This work is an introductory text designed to provide medical teachers with the core concepts of effective teaching practice and information about innovations for curriculum design, delivery and assessment. It offers brief, focused chapters with content that is assimilated easily by the reader. The topics are relevant to basic science and clinical teachers and the work does not presume readers possess prerequisite knowledge of education theory or instructional design. The authors emphasize the application of concepts to teaching practice. Topics include: Facilitating Student Learning; Teaching Large Groups; Teaching in Small Groups; Flipping the Classroom; Problem-Based Learning; Team-Based Learning; Teaching Clinical Skills; Teaching with Simulation; Teaching with Practicals and Labs; Teaching with Technological Tools; Teaching to Develop Scientific Engagement in Medical Students; Designing a Course; Establishing and Teaching Elective Courses; Designing Global Health Experiences; Assessing Student Performance; Documenting the Trajectory of Your Teaching and Teaching as Scholarship. This is a complete revision of the first edition of this work with new chapters and up to date information. Similar to the first edition, chapters were written by leaders in medical education and research who draw upon extensive professional experience and the literature on best practices in education. Although designed for teachers, the work reflects a learner-centered perspective and emphasizes outcomes for student learning. The book is accessible and visually interesting and the work contains information that is current, but not time-sensitive. Each chapter concludes with references, many include recommendations for additional reading, and the work includes an appendix with resources for medical education.

**mcw internal medicine residency: Oxford Textbook of Palliative Medicine** Nathan Cherny, Marie Fallon, Stein Kaasa, Russell K. Portenoy, David C. Currow, 2015-04-30 The definitive Oxford Textbook of Palliative Medicine, now in its fifth edition, has again been thoroughly updated to offer a truly global perspective in this field of extraordinary talent and thoughtfulness. Updated to include new sections devoted to assessment tools, care of patients with cancer, and the management of issues in the very young and the very old, this leading textbook covers all the new and emerging topics since its original publication in 1993. In addition, the multi-disciplinary nature of palliative care is emphasized throughout the book, covering areas from ethical and communication issues, the treatment of symptoms and the management of pain. This fifth edition of the Oxford Textbook of Palliative Medicine is dedicated to the memory of Professor Geoffrey Hanks, pioneer in the field of palliative medicine, and co-editor of the previous four editions. Winner in the Medicine category of the British Medical Association Book Awards, this is a truly comprehensive text, no hospital, hospice, palliative care service, or medical library should be without this essential source of information.

**mcw internal medicine residency: Il burnout nella scuola** Francesco Chirico, Giuseppe Ferrari, 2014-09-01 Il termine inglese "burnout" può essere tradotto letteralmente in "bruciato", "fuso", significa bruciare fino in fondo, estinguersi e indica una condizione di esaurimento emotivo derivante dallo stress dovuto alle condizioni di lavoro e a fattori della sfera personale e ambientale. Questo termine viene utilizzato per indicare una serie di fenomeni di affaticamento, logoramento e improduttività lavorativa registrati nei lavoratori inseriti in attività professionali a carattere sociale. "Burnout" rende l'idea della spinta iniziale che si esaurisce e lascia in qualche modo vuoti gli operatori. Questo libro evidenzia gli aspetti storici, gli obblighi normativi, le metodologie, gli strumenti, gli aspetti clinici e medico-legali del Burnout, oltre che proporre una rassegna degli studi e delle ricerche svolte su questo tema. Si tratta di un libro completo che analizza in profondità la sindrome del burnout all'interno dell'ambiente scolastico. Un libro adatto non solo al medico competente, al responsabile della sicurezza sui luoghi di lavoro e agli operatori sociali, ma anche a tutti coloro che vogliono approfondire il tema dei rischi psicosociali nella scuola. Gli autori propongono inoltre un questionario, lo School Burnout Inventory, per rilevare il rischio burnout individuale. Completano l'opera gli allegati tecnici: verbali per la formazione, slides, checklist per la valutazione del rischio, questionario per la valutazione soggettiva, SBI, esempio della valutazione del rischio.
