mcgraw hill education products: Respect for Teachers Brian Ford, 2012-12-27 For over 30 years we have been in the midst of a paradox. Following a questionable logic that sees education as a means to economic ends, efforts to reform education have focused on keeping the US from slipping in international economic competition. Relying on testing as a standard, in the end we may have decreased our human potential and become less competitive. Our system has gotten worse at its core, in its philosophical tenets and in its ultimate effects, by placing unwonted pressure on our youth and in stifling their creativity. While this goes back decades, Respect for Teachers takes its title from a phrase --perhaps a codeword-- in President's 2011 State of the Union address and sits down to consider its implications. Connecting attacks on teachers, unions and schools and the misrepresentation of research to the promotion of new economic models in education, it suggests that the Obama administration may be, without quite realizing it, setting the stage for rapid privatization of the public system. As this endangers the egalitarian basis of democracy, it also reminds us that schooling is big business - many trillions of dollars world-wide. Joseph Schumpeter once said, "No bourgeoisie ever disliked war profits." Respect operates under the premise that no bourgeoisie ever disliked the spoils of school reform, either.

mcgraw hill education products: New Approaches for Sustainable & Resilient Processes and Products of Social Housing Development in the Arabian Gulf Countries Khaled Galal Ahmed, Mohamed H. Elnabawi Mahgoub, Lindita Bande, Martin Scoppa, 2023-10-16 Social housing has been a forefront research topic especially from its economic and socio-cultural factors. The nature of social housing in the Arabian Gulf Countries has been distinctive in its approach with usually generous areas and urban sprawl designs. Recently, most of these Arabian Gulf Countries have gone through profound transformation in their social and housing paradigms influenced by their sustainability adopted agendas. Still, scholarly documentation and analysis of the processes and products of these transformed paradigms are largely missing, or at least fragmented. So, there is a desperate need to boost research work in this field as related to each city/country in this region, with largely expected mutual effects that these experiences might have on each other and on the global debate about sustainable and resilient social housing as a whole.

mcgraw hill education products: The Impact of Print-On-Demand on Academic Books Suzanne Wilson-Higgins, 2017-11-21 The convergence of online book selling, digital printing, digital document workflow management and the computerization of small parcel logistics created a unique opportunity to create a viable commercial model for printing and supplying books on demand. This innovation was swiftly embraced by the academic publishing community heralding the rescue of the languishing academic monograph. The possibilities captured the imagination of creative academic and niche publishers enabling custom publishing, student editions of monographs, self-compiled wiki books and even the establishment of new university presses and open access publishers. The Impact of Print on-Demand on Academic Books takes an in-depth look at this phenomenon by looking back on two decades of innovation, reviewing the present state of academic publishing with respect to works being printed on demand and compiling the current forecasts and speculation about the future of academic and niche publishing given the impact of print on-demand. - Presents knowledge on the print-on-demand industry and chronicles developments and their impact on publishing - Provides a useful guide for practitioners and students of publishing, and is ideal for academic publishing historians and business academics interested in innovation and digital developments - Includes an international perspective, with information from Europe, North America, Australia, and Singapore/China - Chronicles business case studies collected from interviews with key individuals from companies who have shaped, or are shaping, the academic POD landscape

mcgraw hill education products: *Great Mistakes in Education Policy* Ruth Lupton, Debra Hayes, 2021-04-30 Education policies should drive success and equity but in many countries they are failing to do so. Situating the cases of England and Australia within broader global policy trends, this book critically analyses what has gone wrong. The authors draw on extensive research in education to review the impact of multiple policies on students, teachers and schools, with a focus on communities where children and young people need education most. They issue a fundamental challenge to the policy orthodoxies of recent decades and set out a blueprint for making education both better and fairer.

mcgraw hill education products: *CIOs at Work* Ed Yourdon, 2011-10-18 In *CIOs at Work*, noted author Ed Yourdon interviews many of the world's most influential chief information officers. You will gain insights from the first CIO of the USA, take a peek into the future with the CIO at Google, learn the unique role IT plays in testing Microsoft applications, and much more. Yourdon focuses on how his interviewees tackle the day-to-day work of managing information in their organizations while revealing much more: How they got there, how they manage and allocate resources, and how they interact with business units and assure that their companies take advantage of technologies and automation to make employees even more productive. Surveying a variety of unique corporations, you'll get a great sense of what can be done and what is being done now in organizations around the world. Simply put, Ed Yourdon's *CIOs at Work* is a fascinating read. The author has managed to illuminate the real challenges confronting the Chief Information Officer. The technical expertise of his extraordinary interviewees and their personal insights into the changing role of technology in business are in no short supply. But, what really stands out—beyond the banter about clouds, agile development,—is the human dimension. More than anything else, the CIO is wrestling with profound issues: the proliferation of choices, the speed of change, the shorter attention spans of consumers, the everyone's an expert mindset, and the growing expectation for limitless and low cost computing resources that are as open and accessible as they are safe, secure and accurate. At last, the CIO has a human face, but also an enormous burden that can only be appreciated by reading Yourdon's probative interviews. —Jon Toigo, Managing Principle, Toigo Partners International Featured CIOs: Ben Fried, Google Tony Scott, Microsoft Monte Ford, American Airlines Mittu Sridhara, Ladbrokes Steve Rubinow, NYSE Lew Temares (retired), University of Miami Mark Mooney, McGraw-Hill Dan Wakeman, Educational Testing Services Lynne Ellen, Detroit Energy Becky Blalock, Southern Company Ken Bohlen, Arizona Public Services Roger Gurnani, Verizon Ashish Gupta, British Telecom Joan Miller, U.K. Parliament Vivek Kundra, (first CIO), U.S. Government Paul Strassmann, (retired), Kraft Foods Other books in the Apress At Work Series: CTOs at Work, Donaldson, Seigel, & Donaldson, 978-1-4302-3593-4 Coders at Work, Seibel, 978-1-4302-1948-4 Venture Capitalists at Work, Shah & Shah, 978-1-4302-3837-9 Founders at Work, Livingston, 978-1-4302-1078-8 European Founders at Work, Santos, 978-1-4302-3906-2 Women Leaders at Work, Ghaffari, 978-1-4302-3729-7 Advertisers at Work, Tuten, 978-1-4302-3828-7 Gamers at Work, Ramsay. 978-1-4302-3351-0

mcgraw hill education products: *Introducing CAL* Keith Hudson, 2013-11-11 It is often the case - perhaps more often than not - that new ideas arrive long before there is the means to clothe and deliver them. We can think of Leonardo da Vinci's drawings of helicopters and submarines among many other examples. Computer-Assisted Learning (CAL) is an example of an idea which has had a particularly long gestation. As I will illustrate early in the book, the principles of CAL were really first discovered by Socrates. As a formal method of teaching, the Socratic method disappeared for over two millennia until the 1950s. It was then revived in the form of Programmed Learning (PL)

which resulted from the researches of B. F. Skinner at Harvard University. Even then, PL was premature. In the 1950s and 60s, methods were devised, such as teaching machines and various sorts of PL text books, and there was a mushrooming of PL publishing at that time. For a complex of reason- economic, logistical and technical-PL also largely disappeared from the mid- 60s, although it continued in a few specialized areas of teaching and industrial training. However, during the same period, PL quietly transformed itself into CAL. But the computerized form was not capable of mass dissemination until recently because personal microcomputers did not have sufficient internal memory sizes. That situation has now changed very dramatically and 128K microcomputers are becoming cheap and widely available. Cheap memory chips of 256K and 1024K cannot be far away, either.

mcgraw hill education products: Issues in Technology, Learning, and Instructional Design

Alison A. Carr-Chellman, Gordon Rowland, 2016-12-01 In *Issues in Technology, Learning, and Instructional Design*, some of the best-known scholars in those fields produce powerful, original dialogues that clarify current issues, provide context and theoretical grounding, and illuminate a framework for future thought. Position statements are introduced and then responded to, covering a remarkably broad series of topics across educational technology, learning, and instructional design, from tool use to design education to how people learn. Reminiscent of the well-known Clark/Kozma debates of the 1990s, this book is a must-have for professionals in the field and can also be used as a textbook for graduate or advanced undergraduate courses.
