Over the past thirty years, James Tully has made key contributions to some of the most pressing questions of our time, including: interventions in the history of moral and political thought, contemporary political philosophy, democracy, citizenship, imperialism, recognition and cultural diversity. post test civil rights citizenship and civic participation: **Democracy Assistance Bypassing Governments in Recipient Countries** Paulina Pospieszna, 2018-07-18 This book addresses important and under-researched issues such as, the role of young people in democratization processes, the role of new democracies in sharing their transition experience, and the effectiveness of aid. A major theme of the book is democracy assistance efforts by the NGOs

from Central and Eastern Europe to support young people in Eastern Europe, the Western Balkans, and Central Asia. It examines this theme in a comparative perspective and with a deeper analysis of reasons and ways to support young people, the need to support them and the effectiveness of these efforts. Bringing together a wide range of material on democracy assistance of Central and Eastern European countries that includes surveying the providers and beneficiaries of aid and looking for better methods of impact evaluation, the book advances a framework for assessing democracy assistance efforts. It concludes with implications of the impact of democracy assistance on young people and democracy diffusion from Central and Eastern European democracies to other countries. This text will be of key interest to scholars and students of democracy, democratization, Central and Eastern Europe, Post-Soviet studies, and European and Comparative Politics, as well as for practitioners (donors, NGOs) who want to know what works best, and why and when in aid provision.

post test civil rights citizenship and civic participation: Civitas Charles N. Quigley, Charles F. Bahmuelier, 1991 CIVITAS is a curriculum framework that sets forth a set of national goals to be achieved in a civic education curriculum, primarily for K-12 public and private schools. It is a framework that proposes to specify the knowledge and skills needed by citizens to perform their roles in U.S. democracy. There are two major sections in the framework. It begins with a rationale that explains the basic philosophy, purpose and nature of the framework. The other major section is a statement of goals and objectives that civic education should foster. This section is divided into three parts--(1) Civic Virtue, (2) Civic Participation, and (3) Civic Knowledge and Intellectual Skills. Parts 2 and 3 contain model scope and sequence statements that suggest what aspects of the subjects in the framework can be taught at varying school grades and how they may be taught. The part on Civic Knowledge and Intellectual Skills comprises by far the largest portion of the framework. It organizes summaries of numerous topics into three main groupings: the nature of politics and government; public government in the United States; and the role of the citizen. The intended audience for the curriculum is educators at state and local levels concerned with the development of civic education curricula in the schools. Classroom teachers also may find the framework a useful resource and reference book. A six-page executive summary is appended. (DB)
