power school professional development: *A passion for teaching [electronic resource]*

Christopher Day, 2004 This book is a celebration and an acknowledgement of the various forms of intellectual, physical, emotional and passionate endeavours in which teachers at their best engage. Christopher Day demonstrates that teachers with a passion for teaching are those who are committed, enthusiastic and intellectually and emotionally energetic in their work with children, young people and adults alike. Having this passion for helping pupils to learn has recently been identified as one of the four leadership characteristics mentioned in the HayMcBer Report on effective teachers. Day recognises that passionate teachers are aware of the challenge of the broader social contexts in which they teach, have a clear sense of identity and believe they can make a difference to the learning and achievement of all their pupils. Offering a refreshing and positive view, *A Passion for Teaching* is a contribution to understanding and improving the teaching profession and brings new insights to the work and lives of teachers. It is written for all teachers, teacher educators and student teachers who have a passion for education, who love learners, the learning life and the teaching life.

power school professional development: *Out-of-Field Teaching and Education Policy* Anna

Elizabeth Du Plessis, 2020-01-11 This book focuses on the elusive out-of-field teaching phenomenon and its direct effects on quality education globally. Based on the experiences and concerns of teachers and school leaders, it investigates the phenomenon's impact on everyday teaching and school practices, and offers insights into the challenges that out-of-field teachers face in maintaining their role as the "knowledgeable counterpart" in their teaching and learning environments. In this frame, it also highlights the often-overlooked importance of initial teacher education and its preparation of prospective teachers for employment in complex school contexts, subjects or year levels. The book emphasises the need to develop specific policy strategies to effectively address the global implications of out-of-field teaching, and explores the potential of micro-education policies as targeted support resources for teachers in these challenging positions. Through this new policy lens, which renegotiates the discourse of education policy as a quality education improvement framework, the book offers readers a comprehensive understanding of the urgent need for policy to uphold all stakeholders involved in these unique and complex environments. Accordingly, the book is a valuable resource for academic advisors, decision-makers, policy-makers, and educational and school leaders in developing new approaches to improving school outcomes that promote the retention of teachers for a strong and stable teaching workforce.

power school professional development: *School Libraries Matter* Mirah J. Dow, 2013-06-17 As school districts across the United States increasingly question the need for trained librarians, this collection of research-based evidence helps make the case for a state-licensed librarian in every school. While serving on the AASL legislation committee, Mirah Dow recognized the urgent need to utilize research-based evidence to prove school librarians are much more than an educational luxury. This collection is the result. It brings together school library research studies and findings from the past decade and draws connections to how they can be applied to situations and questions that occur in practice. Taken as a whole, the research underscores that state-licensed, school librarians are a necessity for 21st-century students. Chapters center on important research studies from the past decade that examine data and locate school libraries within operational contexts. Methodologies are explained and findings summarized, while notes clarify practical applications for school librarians. Because each chapter includes a connection to broad realms of theoretical influence in the social sciences, the work will also be relevant to educators and public policymakers, arming them to better communicate research-based links between investments in school libraries and student learning outcomes.

Mardis, 2016-12-05 The first in the IASL-Libraries Unlimited partnership series, this book features contributions written by authors from around the world about their effective collaboration experiences. It also features selected brief case studies as well as several original essays on the topic of collaboration between teachers and teacher librarians in curriculum planning. The result of a joint effort between Libraries Unlimited and the International Association of School Librarianship (IASL), this book shows how collaboration with teachers looks in the international arena. It addresses topics such as collaborating for success with student searching, the roles of librarians and teachers in the research process, principal involvement, information literacy, inquiry-based learning, use of digital resources, models of collaboration for diversity, and evaluation of collaboration. Additionally, the current research findings presented will offer readers new insights into their profession.
