practice test for f endorsement: *The Oldest Rule* Christopher B. Gilbert, 2014 This book could save you \$1 million! OK, maybe not - but some school districts have spent that much defending themselves (and not always successfully) in First Amendment lawsuits brought by students and their parents. First Amendment litigation is on the rise across the nation, and as any principal who has sat through a deposition in one of those cases can tell you, the raw emotions and zealous anger that fuels such disputes can become a massive distraction from your real job of running a school. *The Oldest Rule* is a comprehensive examination of the different First Amendment issues involving students that public school administrators and attorneys are increasingly facing on daily basis. We will look at such topics as school prayer, dress codes, student threats and cyberbullying, the distribution of literature, the use of public facilities by outside groups, the celebration of religious holidays, and the rise of esoteric religions and their impact in the public schools. Written by Chris Gilbert, an attorney with over twenty-one years' experience advising and representing school districts - big and small, urban and rural -- this book combines discussions of the legal standards and key case decisions with practical advice and hypotheticals.

practice test for f endorsement: Ruling Against the Dover Area (PA) School District for Requiring That Intelligent Design be Taught as Part of the Biology Curriculum John E. Jones, 2010-11 On 11/19/04, the Defendant Dover (PA) Area School Dist. announced that teachers would be required to read the following statement to students in the 9th grade biology class: "Because Darwin's Theory is a theory, it continues to be tested as new evidence is discovered. The Theory is not a fact . . . Intelligent Design (ID) is an explanation of the origin of life that differs from Darwin's view." On 1/21/04, Plaintiffs filed a suit challenging the constitutional validity of the resolution. In a ruling, Judge Jones found that the school board did have religious intentions when it added the ID concept to the curriculum, and also that the concept of ID is religion and not science. The verdict is only binding in the Middle dist. of PA but is likely to influence other judges.
