**practice makes perfect epub:** What Am I Here For? (ePub) Martin C. Bala, 2024-03-19 We all go through life with similar struggles and desires, but not everyone follows their childhood dreams,

not everyone is successful, or at least feels that way. There are also moments in your life when something unusual happens. An accident, a health problem, or something bigger than your job, your career. In those moments, life loses its meaning and you start to think: Is what I am doing now all there is? Is this what I dreamed of as a child? What am I here for? Similar questions have been on my mind for more than two decades of my life, and I have found answers that I am willing to share with you in this book. People who are truly successful do things differently than most, and it is not too late for you to learn what they know. Without finding your purpose, true success can be very difficult to achieve. It is never too late to change the way you think, to act differently, and to make a difference. Everyone needs to believe in something, even if it is only in their own abilities. I invite you on an exciting journey of self-discovery and the beginning of a new phase of your life. What you will find in this book is a great insight into the psychology of who you are and a different perspective on widely accepted truths. It will teach you how to work on yourself and apply the knowledge you find to your own life. I've turned my life around, and so can you. You already have what you need. Find out how you can live the life of your dreams! The world of subjective contrast and compassion is a false world, built entirely by each person's imagination. Nothing is as it seems..." ~ Zen proverb

The editors, Martin Skov and Marcos Nadal, have compiled a neuroscientific, physiological, and psychological overview of the systems underlying the evaluation of sensory objects and aesthetic appreciation. Covering a variety of art forms mediated by vision, audition, movement, and language, the handbook puts forward a critical review of the current research to explain how and why perceptual and emotional processes are essential for art production. The work also unravels the interaction of art with expectations, experience and knowledge and the modulation of artistic appreciation through social and contextual settings, eventually bringing to light the potential of art to influence mental states, health, and well-being. The concepts are presented through research on the neural processes enabling artistic creativity, artistic expertise, and the evolution of symbolic cognition.
