synonyms of body language: *A Thesaurus of English Word Roots* Horace Gerald Danner, 2014-03-27 Horace G. Danner's *A Thesaurus of English Word Roots* is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odynacusis.. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English

language.

synonyms of body language: *The Meaning and Interpretation of Desire in the Bible* Samo Skralovnik, 2022-08-23 The term desire in the Hebrew Bible covers a wide range of human longings, emotions, and cravings. The direct and explicit term of desire is nevertheless limited to only two roots found in the Decalogue—the verb forms of the lexical roots ??? and ???, which reflect not only the dynamics of desire occurring in human beings, but also in God. With an comprehensive semantic analysis and an overview of the synonyms and antonyms, the author shows that the verb form of the lexical root ??? denotes a variety of needs related to human existence including aspiration for God while the verb form of the lexical root ??? denotes the desire to acquire material

wealth and possessions beyond basic needs. All the findings are compared on two levels—in relation to human beings (objects and people) and in relation to God—and ultimately serve for the interpretation of the roots in both versions of the Decalogue (Exod 20:17 and Deut 5:21) to resolve questions concerning the meaning of the desire in Tenth Commandment and substantiate whether the answers to life's questions provided by the Bible correspond to modern society.

synonyms of body language: The Deep Ecology of Rhetoric in Mencius and Aristotle Douglas Robinson, 2016-05-09 <i>Discusses philosophers Mencius and Aristotle as socio-ecological thinkers.</i>

 Mencius (385–303/302 BCE) and Aristotle (384–322 BCE) were contemporaries, but are often understood to represent opposite ends of the philosophical spectrum. Mencius is associated with the ecological, emergent, flowing, and connected; Aristotle with the rational, static, abstract, and binary. Douglas Robinson argues that in their conceptions of rhetoric, at least, Mencius and Aristotle are much more similar than different: both are powerfully socio-ecological, espousing and exploring collectivist thinking about the circulation of energy and social value through groups. The agent performing the actions of <i>pistis</i>, “persuading-and-being-persuaded,” in Aristotle and <i>zhi</i>, “governing-and-being-governed,” in Mencius is, Robinson demonstrates, not so much the rhetor as an individual as it is the whole group. Robinson tracks this collectivistic thinking through a series of comparative considerations using a theory that draws impetus from Arne Naess's “ecosophical” deep ecology and from work on rhetoric powered by affective ecologies, but with details of the theory drawn equally from Mencius and Aristotle.
