**sylvan lake family practice: Challenges and Solutions** Judith Belle Brown, Tanya Thornton, Moira Stewart, 2017-11-22 The foundation of patient-centered care is the patient-professional relationship. By exploring both the disease and patients' unique experience of illness, healthcare professionals take into consideration their individual needs as well as their emotional and physical concerns. Using narratives to describe experiences of patients and professionals, this book reveals the four interactive components of the patient-centered clinical method: exploring health, disease and illness; understanding the whole person; finding common ground; and enhancing the patient-doctor relationship. The concluding chapters illustrate ways in which all four components interact with and complement each other and can be used in unison to the immeasurable benefit of both patient and professional. The stimulating narratives are all based on recent developments in the theoretical model of patient-centred clinical care. This wide-ranging, thought-provoking text is highly relevant to a wide range of healthcare professionals as well as medical educators and healthcare students. For physicians, narratives provide insight and illumination of what it truly means to be patient-centered. They also help clinicians to examine, in a reflective manner, what it means to be a healer. **sylvan lake family practice: Equals and Partners** Patricia Verge, 2018-03-26 Canada is poised to reconcile its centuries-long fraught history with Indigenous peoples and to establish justice. What fundamental spiritual principles should guide this challenging process and bring together peoples who have been separated for so long? In this part-memoir, part-scholarly work, Patricia Verge records her decades-long friendship with the Stoney Nakoda Nation in southern Alberta. She explores how her spiritual journey has been intimately entwined with service among Indigenous people and confronts her own ignorance of the true history of Canada, taking for her guidance this quote from the writings of the Bahá'í Faith: "a massive dose of truth must be administered to heal." An engaging and timely work, *Equals and Partners* is ultimately a story of love and commitment to the principle of the oneness of humanity.

**sylvan lake family practice: *Dr. Danger*** Dr. Art Schatz, 2025-05-21 Dr. Art Schatz has been deeply involved with animals since he was born. During his childhood in rural Canada, his family had no local veterinarians nearby, so he learned to tend to the farm animals and turned that passion into a career. After veterinary college, Dr. Schatz entered a career primarily with large animals. Life is not a straight path, and Dr. Schatz's is no exception; after developing an insidious illness, he took a side path from his veterinary career into teaching. It was here that he gained his nickname "Dr. Danger" from one of his students for his ability to deal with potentially dangerous large animals. *Dr. Danger* is a memoir about our big animal companions on farms and one of the many people who look after them. Between stories of his life are thoughts about the veterinary profession as it has developed in Canada and a broader examination of food systems, both human and animal.

**sylvan lake family practice: History of Westchester County, New York, Volume 3** Juergen Beck, 2021-03-23 Long before this work, here in an edition containing three volumes, two of them of biographical nature, was first published, the authors cherished the hope that it could be a genuine narrative history of the county and wanted to be personally instrumental in achieving so important a result. Their attention was especially directed to the matter by their observations during their connection with the schools, from which they became convinced of the extremely elementary character of the general knowledge of this county's history, even in relation to the Revolution, whereof, indeed, anything like a well-coordinated understanding is most exceptional among the people, and quite incapable of being taught to the young because of the unsuitability for that purpose of all books heretofore published that bear on the subject. In formulating the plan for the present work they had fundamentally in view a lucid continuous narrative, thorough in its treatment of the outlines of the subject and reasonably attentive to local details without extending to minuteness. These lines have been followed throughout. This is volume three out of three, containing the second part of the biographies of hundreds of important persons.
