table topic questions funny: I Have Something to Say John Bowe, 2020-08-11 A veteran journalist discovers an ancient system of speech techniques for overcoming the fear of public speaking—and reveals how they can profoundly change our lives. In 2010, award-winning journalist John Bowe learned that his cousin Bill, a longtime extreme recluse living in his parents' basement, had, at the age of fifty-nine, overcome a lifetime of shyness and isolation—and gotten happily

married. Bill credited his turnaround to Toastmasters, the world's largest organization devoted to teaching the art of public speaking. Fascinated by the possibility that speech training could foster the kind of psychological well-being more commonly sought through psychiatric treatment, and intrigued by the notion that words can serve as medicine, Bowe set out to discover the origins of speech training—and to learn for himself how to speak better in public. From the birth of democracy in Ancient Greece until two centuries ago, education meant, in addition to reading and writing, years of learning specific, easily taught language techniques for interacting with others. Nowadays, absent such education, the average American speaks 16,000 to 20,000 words every day, but 74 percent of us suffer from speech anxiety. As he joins Toastmasters and learns, step-by-step, to successfully overcome his own speech anxiety, Bowe muses upon our record levels of loneliness, social isolation, and political divisiveness. What would it mean for Americans to learn once again the simple art of talking to one another? Bowe shows that learning to speak in public means more than giving a decent speech without nervousness (or a total meltdown). Learning to connect with others bestows upon us an enhanced sense of freedom, power, and belonging.

The research, conducted with students of Italian in Australia, is situated in the wider L2 context, and compared to studies on students' perceptions of English and French literary texts in countries such as Canada, Italy, Australia, Germany and the Ukraine. The first part of the book takes the debate on the inclusion of literature in language education as a springboard for posing crucial questions about how students, and educators, view literature. The theoretical framework draws from educational, linguistic, philosophical and literary theories, and focuses on the role of awareness in learning and the role of the learner's experience. The second part of the book evaluates an innovative approach to teaching and learning L2 literature, and discusses the application of this to the language classroom. Containing a balance of theoretical and practical concerns, this book will be invaluable reading for researchers of applied linguistics and second language acquisition.
