tactics in a sentence: Building Great Sentences Brooks Landon, 2013-06-25 Based on the bestselling series from The Great Courses, *Building Great Sentences* celebrates the sheer joy of language—and will forever change the way you read and write. Great writing begins with the sentence. Whether it's two words ("Jesus wept.") or William Faulkner's 1,287-word sentence in *Absalom! Absalom!*, sentences have the power to captivate, entertain, motivate, educate, and, most importantly, delight. Yet, the sentence-oriented approach to writing is too often overlooked in favor of bland economy. *Building Great Sentences* teaches you to write better sentences by luxuriating in the pleasures of language. Award-winning Professor Brooks Landon draws on examples from masters of long, elegant sentences—including Don DeLillo, Virginia Woolf, Joan Didion, and Samuel Johnson—to reveal the mechanics of how language works on thoughts and emotions, providing the tools to write powerful, more effective sentences.

tactics in a sentence: *Landmark Essays on Writing Across the Curriculum* Charles Bazerman, David Russell, 2020-11-25 Rhetoric, as a general teaching -- while preaching locality of action and guidelines for handling that locality -- has tended from the beginning to serve as a universality. It has offered a generalized techne with only limited categories, appropriate for all discursive situations, at least for those that were not excluded from the realm of rhetoric. Nonetheless, from its beginnings, rhetoric limited its interests to certain activity fields such as law, government, religion, and most important, the educators of leaders in these activity fields. This collection presents landmarks showing where the Writing-Across-the-Curriculum (WAC) and Writing in the Disciplines (WID) movements have gone. They have opened up a number of prospects that were impossible to see when rhetoric and composition confined their gaze to relatively few discursive activities. This suggests that the rhetorical landscape is becoming more complex and interesting, as well as more responsive to life in the complex, differentiated societies that have emerged in the last few centuries. This volume will reveal to scholars and researchers a range of possibilities for the study of disciplinary discourse and its teaching, and suggest to them new prospects for the future -- and for the better.
