

taiwan human development index

taiwan human development index represents a critical measure of the country's social and economic progress. As a composite statistic of life expectancy, education, and per capita income indicators, the human development index (HDI) provides a comprehensive overview of Taiwan's development status in comparison to other nations. This article explores Taiwan's HDI in detail, examining its components, historical trends, and factors influencing its ranking. Additionally, it highlights the socio-economic policies and challenges that impact Taiwan's human development outcomes. Readers will gain insight into how Taiwan's development compares regionally and globally, and the implications for future growth and sustainability. The following sections break down the key elements of Taiwan's human development index, providing an in-depth analysis backed by relevant data and context.

- Understanding Taiwan Human Development Index
- Components of Taiwan's Human Development Index
- Historical Trends and Current Status
- Factors Influencing Taiwan's Human Development
- Comparative Analysis with Regional and Global Peers
- Challenges and Future Prospects

Understanding Taiwan Human Development Index

The Taiwan human development index is a vital indicator that reflects the overall well-being and quality of life of its population. The HDI is a standardized composite index devised by the United Nations Development Programme (UNDP) to assess countries' human development levels beyond mere economic output. Taiwan's HDI accounts for three core dimensions: health, education, and standard of living. This multidimensional approach enables a more holistic evaluation of progress, highlighting areas of success and sectors requiring improvement. Taiwan's inclusion in global human development discussions underscores its socio-economic achievements despite unique geopolitical circumstances.

Definition and Purpose of HDI

The human development index is designed to measure and compare countries based on three fundamental capabilities: a long and healthy life, access to knowledge, and a decent standard of living. By aggregating indicators such as life expectancy at birth, mean years of schooling, expected years of schooling, and gross national income per capita, the HDI

provides a single statistic that summarizes key aspects of human development. For Taiwan, the HDI serves not only as a benchmarking tool but also as a guide for policymakers to prioritize social and economic reforms.

Significance of Taiwan's HDI

Taiwan's human development index is significant because it captures a broader perspective of national progress beyond GDP figures. It reflects Taiwan's investments in healthcare, education, and economic stability, which contribute to improved living standards. The HDI also helps in identifying disparities within different regions or demographic groups, aiding targeted policy interventions. Understanding Taiwan's HDI is essential for evaluating its developmental model and for international comparisons.

Components of Taiwan's Human Development Index

The Taiwan human development index is composed of three main components: health, education, and income. Each component plays a crucial role in shaping the overall HDI score and represents a key dimension of human well-being.

Health Dimension

The health dimension of Taiwan's HDI is primarily measured by life expectancy at birth. Taiwan has made significant strides in healthcare, contributing to increased life expectancy and reduced mortality rates. Public health programs, widespread access to medical services, and advancements in medical technology have all played a part in elevating the health standards of the population.

Education Dimension

Education is another critical component of the human development index. Taiwan boasts high literacy rates and strong educational attainment levels, including both mean years of schooling for adults and expected years of schooling for children. The education system emphasizes quality learning, innovation, and accessibility, which collectively enhance human capital and contribute to Taiwan's robust HDI score.

Income Dimension

The income dimension is measured by gross national income (GNI) per capita adjusted for purchasing power parity (PPP). Taiwan's dynamic economy, driven by technology, manufacturing, and exports, ensures a relatively high standard of living. Income growth translates into better living conditions, access to resources, and opportunities for personal development, thus positively influencing the HDI.

Historical Trends and Current Status

Examining the historical trends of Taiwan's human development index reveals a pattern of steady improvement over recent decades. Taiwan's rapid economic growth, combined with social policies focused on health and education, has propelled the nation into the category of very high human development.

Evolution of Taiwan's HDI Scores

Since the latter half of the 20th century, Taiwan has experienced remarkable progress in its HDI metrics. The country transitioned from a primarily agrarian economy to a technology-driven industrial powerhouse, which enhanced income levels and social infrastructure. Life expectancy and educational enrollment rates have also seen consistent upward trends, reflecting improvements in health services and educational access.

Current HDI Ranking

As of the most recent reports, Taiwan's human development index places it among the top-tier countries globally. Taiwan's HDI score is comparable to those of developed nations, indicating a high quality of life and strong human capital development. This status is a testament to sustained policy efforts and economic resilience despite geopolitical challenges.

Factors Influencing Taiwan's Human Development

Several factors contribute to Taiwan's high human development index, encompassing economic, social, and policy-driven elements. Understanding these factors sheds light on the drivers of Taiwan's success and areas that require continued attention.

Economic Growth and Stability

Robust economic growth has been a cornerstone of Taiwan's human development. The country's export-oriented economy, innovation in technology sectors, and stable macroeconomic environment have generated wealth that supports social services and infrastructure development. Economic stability facilitates investments in education and healthcare, thus enhancing human development outcomes.

Government Policies and Social Programs

Government initiatives aimed at expanding healthcare coverage, improving educational quality, and reducing poverty have significantly impacted Taiwan's HDI. Policies such as the National Health Insurance system provide universal access to medical care, while

education reforms promote equal opportunities and lifelong learning. These programs ensure inclusive development and social equity.

Demographic and Social Factors

Demographic trends, including aging population and urbanization, influence Taiwan's human development dynamics. While an aging society poses challenges for healthcare and social services, Taiwan has adapted through innovative care models and social support systems. Social cohesion and community engagement also play roles in maintaining a high standard of living.

Comparative Analysis with Regional and Global Peers

Assessing Taiwan's human development index in comparison with regional neighbors and global counterparts offers perspective on its achievements and challenges.

Comparison within East Asia

Within East Asia, Taiwan ranks favorably alongside countries such as Japan, South Korea, and Singapore. While each nation has unique development pathways, Taiwan's HDI reflects competitive standards in health, education, and income. Differences in political status and international recognition influence data reporting and comparative analysis but do not diminish Taiwan's developmental accomplishments.

Global Rankings and Benchmarks

Globally, Taiwan's human development index places it in the very high human development category, often comparable to OECD countries. This ranking underscores Taiwan's success in achieving balanced development across multiple dimensions. However, continuous efforts are necessary to address emerging challenges and sustain progress.

Challenges and Future Prospects

Despite its impressive human development index, Taiwan faces several challenges that may impact future HDI performance. Addressing these issues is crucial for maintaining and enhancing human well-being.

Addressing Aging Population

One of the primary challenges is Taiwan's rapidly aging population, which increases

demand for healthcare services and social support while potentially reducing the labor force. Strategies to mitigate these effects include promoting healthy aging, enhancing eldercare infrastructure, and encouraging workforce participation among older adults.

Reducing Income Inequality

Income disparity remains a concern that could affect social cohesion and equitable access to opportunities. Policies aimed at inclusive economic growth, social safety nets, and education access are essential to minimizing inequalities and fostering balanced human development.

Environmental Sustainability and Development

Environmental issues such as pollution and climate change pose risks to health and quality of life. Integrating sustainable development goals into national policy frameworks is vital for protecting Taiwan's natural resources and ensuring long-term human development.

Future Outlook

Taiwan's prospects for human development remain strong given its economic dynamism, commitment to education, and healthcare advancements. Continued innovation, social policy adaptation, and international cooperation will be key to sustaining its high HDI and addressing forthcoming demographic and environmental challenges.

- Steady improvements in health, education, and income dimensions
- Strong government support for social services and infrastructure
- Challenges include aging population, income inequality, and environmental sustainability
- Comparative advantage in East Asia and global human development rankings
- Policy focus on inclusive growth and sustainable development for future progress

Frequently Asked Questions

What is the current Human Development Index (HDI) of Taiwan?

As of the most recent reports, Taiwan's Human Development Index (HDI) is approximately 0.916, placing it in the very high human development category.

How does Taiwan's HDI compare to other countries in Asia?

Taiwan ranks highly in Asia in terms of HDI, often surpassing many other regional economies due to its advanced healthcare, education system, and income levels.

What factors contribute to Taiwan's high Human Development Index?

Taiwan's high HDI is attributed to its strong healthcare system, high life expectancy, quality education, robust economy, and high standards of living.

Has Taiwan's Human Development Index improved over the past decade?

Yes, Taiwan's HDI has steadily improved over the past decade due to continuous investments in education, healthcare, and economic development.

What challenges does Taiwan face in further improving its HDI?

Challenges include addressing income inequality, aging population, environmental sustainability, and maintaining economic growth amid global uncertainties.

Is Taiwan officially recognized in the United Nations Human Development Reports?

Taiwan is not officially included in UN Human Development Reports due to its political status, but independent studies and local data provide insights into its human development progress.

Additional Resources

1. Taiwan's Human Development Journey: Progress and Challenges

This book provides a comprehensive overview of Taiwan's progress in human development over the past few decades. It examines key indicators such as education, health, and income, highlighting the policies that have driven improvements. The analysis also addresses ongoing challenges and suggests future strategies for sustainable growth.

2. Measuring Well-being: The Human Development Index in Taiwan

Focusing on the application of the Human Development Index (HDI) in Taiwan, this book explores how the index reflects the nation's social and economic conditions. It offers detailed statistical analyses and compares Taiwan's HDI with other developed and developing countries. The book also discusses the limitations and potential enhancements of HDI metrics.

3. Education and Economic Growth in Taiwan: A Human Development Perspective

This volume investigates the critical role of education in Taiwan's human development achievements. It links educational attainment to economic growth and improved living standards. Through case studies and data analysis, the book highlights Taiwan's educational reforms and their impact on human capital.

4. Healthcare Systems and Human Development in Taiwan

Examining Taiwan's healthcare infrastructure, this book shows how universal health coverage and medical innovation have contributed to higher human development. It covers health indicators such as life expectancy and infant mortality rates. The book also discusses policy challenges in maintaining equitable access to healthcare services.

5. Income Inequality and Social Inclusion in Taiwan's Human Development

This book addresses the growing concerns about income disparity in Taiwan despite overall human development gains. It explores the socio-economic factors influencing inequality and evaluates government policies aimed at social inclusion. The discussion provides insights into balancing economic growth with equitable development.

6. Urbanization and Human Development in Taiwan: Opportunities and Risks

Focusing on Taiwan's rapid urbanization, this book analyzes its effects on human development indicators. It considers both the positive impacts, such as improved infrastructure and services, and the negative consequences like environmental degradation and social stratification. The book proposes sustainable urban planning strategies.

7. Gender Equality and Human Development in Taiwan

This book explores the progress and remaining challenges in achieving gender equality in Taiwan. It links gender-related development indices with broader human development outcomes. The analysis includes labor market participation, education, and political representation, underscoring the importance of gender-inclusive policies.

8. Environmental Sustainability and Human Development in Taiwan

Highlighting the relationship between environmental policies and human development, this book discusses Taiwan's efforts to promote sustainable growth. It examines the impact of pollution control, renewable energy adoption, and conservation programs on public health and quality of life. The book advocates for integrating environmental sustainability into human development planning.

9. Policy Frameworks for Enhancing Human Development in Taiwan

This book reviews the governmental and institutional frameworks that have shaped Taiwan's human development trajectory. It analyzes policy successes and shortcomings across sectors such as education, health, and social welfare. The book offers recommendations for future policy directions to further improve human development outcomes.

taiwan human development index: *The Political Economy of Taiwan's Development into the 21st Century* Gustav Ranis, Sheng-Cheng Hu, Yun-Peng Chu, 1999-02-24 '... a welcome book, of particular use to graduate schools.' - A.J.H. Latham, Asia Pacific Business Review Over the past four decades, Taiwan has achieved remarkable economic growth. In this important book, a distinguished group of contributors employs a comparative perspective to explore the reasons behind and the lessons to be learned from Taiwan's success.

taiwan human development index: Global Human Resource Development Thomas Garavan, Alma McCarthy, Michael Morley, 2016-02-05 Drawing on contributions from leading academics in the field, this volume within the Routledge Series in Human Resource Development specifically focuses on Global Human Resource Development (HRD). Specifically, the volume provides an overview of 17 regions, 85 countries and includes one emerging market grouping, CIVETS. This book examines the role of the state in HRD, the relationship between HRD and the level of economic development in the country or region, the influence of foreign direct investment within the country or region, and firm-level HRD practices within countries or regions. Global Human Resource Development analyzes HRD from institutional and cross-cultural perspectives, making it possible, for the first time, to analyze trends across countries and regions and to draw conclusions about the value of institutional and cross-cultural perspectives in the HRD context. There is currently no book on the market that conceptualizes the discipline of global HRD in this way, making this a definitive book on HRD across the globe of particular interest to researchers and reflective practitioners.

taiwan human development index: Taiwan Army Weapon Systems Handbook Volume 1 Strategic Information and Weapon Systems IBP USA, 2010-07-17 2011 Updated Reprint. Updated Annually. Taiwan Army Weapon Systems Handbook

taiwan human development index: Taiwan, Humanitarianism and Global Governance Alain Guilloux, 2009-03-09 In this unique book, Alain Guilloux uses four major elements of governance - namely norms, actors, processes, and outcomes - to examine Taiwan's national governance as well as its participation in global governance in relation to humanitarian aid. Including case studies on Taiwan's application to become an observer to the WHO, and its foreign-aid policy and practice dealing with disease outbreaks and natural disasters, Guilloux explores the complexities and dilemmas of providing humanitarian aid to people in need and distress. Taking into account Taiwan's unclear status in the global arena, and how in its efforts Taiwan faces both international isolation and opposition from the People's Republic of China at multiple levels. Taiwan, Humanitarianism and Global Governance will be of interest for scholars of Chinese studies, Taiwan Studies, East Asian politics and International Relations, and environmental politics and humanitarian studies.

taiwan human development index: 2014 Annual Provincial And Regional Competitiveness Analysis For Greater China Economies: Development Strategies Under The New Normal Khee Giap Tan, Randong Yuan, Sangiita Wei Cher Yoong, 2015-11-09 After more than three decades of rapid growth, China is now entering into the New Normal Era, which will be characterised by slower but sustainable, quality growth for several decades to come. How China will fare under the New Normal Era matters not only for itself but also for its great impact on global prosperity. While presenting as the second instalment of ACI's annual tracking of the dynamics of competitiveness among 34 Greater China economies, this volume also includes the results of the inaugural regional competitiveness analysis for five regions of Greater China. As regional imbalance in socioeconomic advancement is a serious issue China has to face up to under the New Normal Era, the results of such competitiveness analysis at provincial and regional levels offer insights for policy-makers to help address concerns associated with the regional disparity in development, and facilitate industry

leaders and other stakeholders in identifying challenges and opportunities for sound decision making.

taiwan human development index: Indonesia-Taiwan Relations Prof. Dr. Tirta Nugraha Mursitama, Ph.D., Dr. Shidarta, M.Hum., Dr. Yi Ying, M.Lit., M.Pd., 2021-05-17 [This book is written in Dual Language: English & Mandarin] This book is a collection of researches from the Taiwan Studies Project research team of Bina Nusantara University. This book consists of three parts. First, the relationship between Indonesia and Taiwan in the context of the New Southbound Policy. This part describes the collaboration scheme of the Taiwanese government, industry and high school in Indonesia to improve human resource competencies by providing scholarships for economically disadvantaged Indonesian students to study in Taiwan. It also illustrates the obstacles faced in implementing the New Southbound Policy in Indonesia due to the language and culture constraints of Taiwan and Indonesia. Second part discusses about cross culture. Through cultural acculturation research, it is hoped that Indonesia and Taiwan will better acknowledge each other's culture and realize the similarities in culture, especially in the Potehi puppet show, which is still performed in Taiwan today by using Hokkien. Whereas, the Potehi puppet show in Indonesia already uses Indonesian regional languages besides Hokkien. Also, the influence of Chinese culture on Betawi Bridal Dress. This closeness in history and culture is expected to be the glue of Taiwan and Indonesia relations. Last, the third part illustrates the BINUS University lecturers' visitation to Taiwan. They visit several places and Indonesian young people who obtained a scholarship from university in Taiwan. From this visitation, readers will better understand the good intentions of the Taiwanese government to help the development of the Indonesian economy by providing opportunities for young Indonesians to become educated and trained personnel when they graduate from higher institutions.

taiwan human development index: The International Relations of Northeast Asia Samuel S. Kim, 2004 Written by a team of leading scholars, this volume presents a variety of theoretical perspectives and case studies to offer a comprehensive analysis of the pressures that shape the policy choices of China, Russia, Japan, the United States, North and South Korea, and Taiwan.

taiwan human development index: Taiwan's Political Re-Alignment and Diplomatic Challenges Wei-chin Lee, 2018-05-09 This edited volume investigates and evaluates the context, causes, and consequences of various essential issues in Taiwanese domestic politics and external relations before and after the regime change in 2016. It offers theoretical interpretation and temporal delineation of recent electoral shifts, party realignment, identity reformulation, and subsequent foreign policy adaptation in the 2010s. Contributors address these issues in three sections—"Democracy and New Political Landscape," "The China Factor and Cross-Strait Dilemma," and "Taiwan's International Way-out"—to advance conclusions about Taiwan's political transformation from both comparative and international perspectives.

taiwan human development index: The Work-Family Interface in Global Context Karen Korabik, Zeynep Aycan, Roya Ayman, 2017-04-07 Based on a sweeping, ten country study, The Work-Family Interface in Global Context comprises the most comprehensive and rigorous cross-cultural study of the work-family interface to date. Just as work-family conflict is associated with negative consequences for workers, organizations, and societies, so too can the work and family domains interact positively to enhance or enrich one another. Drawing on qualitative, quantitative, and policy-based data, chapters in this collection explore the influence of culture on the work-family interface in order to help researchers and managers understand the applicability of work-family models in a variety of contexts and further conceptualize work-family interactions through the development of a more universal knowledge. Members of the Project 3535 Team: Karen Korabik, University of Guelph, Canada. Zeynep Aycan, Koç University, Turkey. Roya Ayman, Illinois Institute

of Technology, USA. Artiawati, University of Surabaya, Indonesia. Anne Bardoel, Monash University, Australia. Anat Drach-Zahavy, University of Haifa, Israel. Leslie B. Hammer, Portland State University, USA. Ting-Pang Huang, Soochow University, Taiwan. Donna S. Lero, University of Guelph, Canada. Tripti Pande-Desai, New Delhi Institute of Management, India. Steven Poelmans, EADA Business School, Spain. Ujvala Rajadhyaksha, Governors State University, USA. Anit Somech, University of Haifa, Israel. Li Zhang, Harbin Institute of Technology, China.

taiwan human development index: *Post-Conflict Development in East Asia* Brendan M. Howe, 2016-04-08 East Asia is a region deeply affected by conflict. Colonial, ideological, and national wars have left their scars and legacies on regional, international, and national governance. Yet East Asian post-conflict development experiences have been viewed as remarkably successful. The three largest economies of East Asia, Japan, China, and South Korea, have all experienced dramatic growth but immediately prior to their periods of expansion, all experienced the devastating impacts of international conflicts and/or civil upheaval. These post-conflict development 'success' stories do not, however, tell the whole tale. Other states in East Asia and in particular certain regions within some of these states, while apparently emerging from similar conflictual backgrounds, have experienced far less positive transitions. This volume critically assesses measurements of success in East Asian post-conflict development from a human-centered perspective. This involves a major re-evaluation of accepted accounts of domestic governance and international relations in East Asia from both a comparative and inter-disciplinary viewpoint. Case study rich, this volume provides policy prescriptions for East Asian donors and actors in an effort to provide Asian solutions for Asian problems.

taiwan human development index: Taiwan Immigration Laws and Regulations Handbook - Strategic Information and Basic Laws IBP, Inc., 2013-04-04 Taiwan Immigration Laws and Regulations Handbook - Strategic Information and Basic Laws

taiwan human development index: *Access to Asia* Sharon Schweitzer, 2015-04-07 Create meaningful relationships that translate to better business Access to Asia presents a deeply insightful framework for today's global business leaders and managers, whether traveling from Toronto to Taipei, Baltimore to Bangalore, or San Francisco to Shanghai. Drawing from her extensive experience and global connections, author Sharon Schweitzer suggests that irrespective of their industry, everyone is essentially in the relationship business. Within Asia, building trust and inspiring respect are vital steps in developing business relationships that transcend basic contractual obligations. Readers will find in-the-trenches advice and stories from 80 regional experts in 10 countries, including China, Hong Kong, India, Japan, and Korea. Discover the unique eight-question framework that provides rich interview material and insight from respected cultural experts Track cultural progress over time and highlight areas in need of improvement with the Self-Awareness Profile Learn the little-known facts, reports, and resources that help establish and strengthen Asian business relationships Effective cross-cultural communication is mandatory for today's successful global business leaders. For companies and individuals looking to engage more successfully with their counterparts in Asia, Access to Asia showcases the critical people skills that drive global business success.

taiwan human development index: *Business Groups and Financial Markets* Sandro Segre, 2017-07-12 This work builds on the classical sociological contributions of Weber, Simmel, and Toennies, and makes the case for different and alternative ideal-typical models of business relations, which the author calls English and German. The English model of business relations is characterized by free competition between firms. They abide by the ethical rules of fair business and the moral economy in market exchanges. Their relations are accordingly based on mutual trust. As a rule, they do not cultivate privileged relations with political authorities. By contrast, the German model involves hierarchical relations between a group's major firm and its smaller units. There is no moral community binding together the different groups, and therefore no mutual trust between them. Business groups maintain close relations, based on reciprocal favours, with authorities. The author compares the London and New York Stock Exchanges in the late nineteenth century, finding the

former better approximates the English model, and shows this model's superior performance. English model countries such as Taiwan have been shown to be more competitive in market exchanges than countries such as South Korea, which approximate the German model. A new epilogue makes use of more recent information and confirms Segre's arguments.

taiwan human development index: Japan's Quest Warren S. Hunsberger, 1996-12-23 An international team of ten specialists in Japanese and American foreign relations address the crucial question: what role should Japan play in international affairs? This question has not found a fully satisfactory answer since the forced opening to foreign contacts in the mid-nineteenth century. Having copied foreign models and achieved a series of stunning successes -- and some failures -- in many aspects of private and public life, Japan today stands at a pinnacle of economic power and affluence. Despite this, both economics and politics are undergoing major strains and changes during the 1990s, and the quest for true internationalization is fraught with problems and only partially fulfilled. This book is a joint project of the American University in Washington and Ritsumeikan University in Kyoto.

taiwan human development index: Civility and Its Development David C. Schak, 2018-09-04 This is the first book-length study of the development of civility in Chinese societies. Although some social scientists and political philosophers have discussed civility, none has defined it as an analytical tool to systematically measure attitudes and behavior, and few have applied it to a non-Western society. By comparing the development of civility in mainland China and Taiwan, *Civility and Its Development: The Experiences of China and Taiwan* analyzes the social conditions needed for civility to become established in a society. Schak argues that the attempts to impose civility top-down from the state are ineffective. Civility appeared in Taiwan only after state efforts to impose it ceased at the end of the 1980s when Taiwan began to democratize, and the PRC government civility campaigns have so far had only limited success. The book concludes with an examination of various differences between Taiwan and the PRC relevant to Taiwan's having become a society with civility while the PRC still encounters difficulties in doing so. The essential factor in developing civility in Taiwan, Schak contends, was its evolution from a place composed of myriad small, inward-looking communities to a society in which everyone shares a strong identity and civic consciousness, and people consider others as fellow members, not anonymous strangers. "This book represents the most thorough review of what social scientists once called 'the civilizing process' in Chinese society. David C. Schak builds on the earlier studies on this issue and goes well beyond the established literature." —James Watson, Fairbank Professor of Chinese Society and Professor of Anthropology, Emeritus, Harvard University "This is a topic that people talk about all the time, and David C. Schak draws a lot of material together in a systematic and comprehensive way that can stimulate important discussions beyond the academy." —Thomas Gold, Professor of Sociology, University of California, Berkeley

taiwan human development index: World Regional Geography (with Subregions) Lydia Mihelic Pulsipher, Alex Pulsipher, 2007-09-14 Shows how individuals are affected by, and respond to, economic, social, and political forces at all levels of scale: global, regional and local. It offers an inclusive picture of people in a globalizing world - men, women, children, both mainstream and marginalized citizens - not as seen from a western perspective, but as they see themselves. Core topics of physical, economic, cultural, and political geography are examined from a contemporary perspective, based on authoritative insights from recent geographic theory and examples from countries from around the world.

taiwan human development index: Welfare Reform in East Asia Chak Kwan Chan, Kinglun Ngok, 2012-11-12 In many Western countries, social welfare payments are increasingly being made conditional on recipients doing voluntary work or attending job training courses, a system known as welfare-to-work or workfare. Although social welfare in Asia is very different to the West, with much smaller social welfare budgets, a strong self-reliance and a much higher dependency on family networks to provide support, the workfare approach is also being adopted in many Asian countries. This is the first book to provide a comprehensive overview of how welfare reform around work is

implemented in leading East Asian. Based on the experiences of seven East Asian economies - including China, Japan, South Korea, Taiwan, Singapore, Hong Kong and Macau - this book critically analyses current trends; the social, economic and political factors which lead to the implementation of workfare; compares the similarities and differences of workfare in the different polities and assesses their effectiveness.

taiwan human development index: Japan's Quest: The Search for International Recognition, Status and Role Warren Hunsberger, 2016-09-16 An international team of ten specialists in Japanese and American foreign relations address the crucial question: what role should Japan play in international affairs? They try to find a satisfactory answer to a concern which was first raised in the mid-19th century.

taiwan human development index: The Awkward Embrace Hermann Giliomee, Charles Simkins, 2005-08-08 Democracies derive their resilience and vitality from the fact that the rule of a particular majority is usually only of a temporary nature. By looking at four case-studies, *The Awkward Embrace* studies democracies of a different kind; rule by a dominant party which is virtually immune from defeat. Such systems have been called Regnant or Uncommon Democracies. They are characterized by distinctive features: the staging of unfree or corrupt elections; the blurring of the lines between government, the ruling party and the state; the introduction of a national project which is seen to be above politics; and the erosion of civil society. This book addresses major issues such as why one such democracy, namely Taiwan, has been moving in the direction of a more competitive system; how economic crises such as the present one in Mexico can transform the system; how government-business relations in Malaysia are affecting the base of the dominant party; and whether South Africa will become a one-party dominant system.
