initiatives help their organizations by developing employees who assist their organizations in not only surviving, but thriving in our increasingly global world. Today's best practice or benchmarked organizations and their HRD professionals continue to recognize the importance of employee learning, knowledge, skills and motivation to organizational success. This book takes the position that HRD can demonstrate how their initiatives help to develop a superior workforce so that the organization and its individual employees can accomplish their strategic and operational goals in service to their clients or customers. This book is written with the belief that HRD professionals have many opportunities to learn, change and find ways both in and outside of the workplace to contribute to the development of learning organizations as we move further into the 21st century. A major point of this book is that HRD will continue to become more and more important to organizational success when one considers the increased responsibilities HRD professionals have taken on during and post- the COVID pandemic. The primary audience for this book is practicing HRM and HRD professionals, and other organizational leaders. The book provides proven ideas important to demonstrating the value of HRD. From a practical viewpoint, it is based on actual experience, a strong research base, and accepted practices presented in an easy to read form.
