**taking care of business crossword clue:** *A Brain for Business - A Brain for Life* Shane O'Mara, 2017-10-06 Behaviour change is hard, but O'Mara shows that by adopting strategies that are well-founded in the science of brain and behaviour individuals and organisations can adapt to the demands of the modern world. The brain matters in business. The problem is that our brains have many biases, heuristics and predilections that can distort behaviour and decision making. The good news is that we know more about how these work than ever before. O'Mara's starting point is that, as our behaviour arises from the structure and function of our brains, careful examination of a series of brain-based ('neurocognitive') analyses of common aspects of human behaviour relevant to business and management practice reveals lessons that can be used at work. He begins by looking at neuroplasticity and how it enables a shift from a restrictive 'fixed mindset' to an enabling 'growth mindset'. He shows how this changing mindset approach - where the focus is on task and improvements based on effort - is scalable within organisations. Next, as the brain is a living organ like the heart and lungs, O'Mara shows how to keep it physically in the best possible shape before examining how we exercise control over our behaviour, build resilience and create positive brain states. He also considers the implications for business of our brains wiring for status and illustrates how research shows that it is possible to de-bias assumptions about gender and race - and the impact that this has on performance.

**taking care of business crossword clue: 21st Century Robot** Brian David Johnson, Sandy Winkelman, 2014-11-18 When companies develop a new technology, do they ask how it might affect the people who will actually use it? That, more or less, sums up Brian David Johnson’s duties as Intel’s futurist-in-residence. In this fascinating book, Johnson provides a collection of science fiction prototyping stories that attempt to answer the question. These stories focus on the same theme: scientists and thinkers exploring personal robotics as a new form of artificial intelligence. This isn’t fanciful speculation. Johnson’s stories are based on Intel’s futurecasting research, which uses ethnographic field studies, technology research, trend data, and science fiction to develop a pragmatic vision of consumers and computing. 21st Century Robot presents science fiction designed to bring about science fact. Get real insight into technology and the future with this book. It will open your eyes.
