As society wrestles with persistent gender and racial disparities, the stories of black women stand out as both bold and brilliant but stifle their professional opportunities and experiences in academia and education. Despite standing as the most educated demographic nationally and displaying unmatched levels of labor market participation, black women are alarmingly scarce in leadership roles across sectors, also facing significant challenges as educational leaders. Their ascent to higher positions is often impacted by barriers stemming from damaging stereotypes such as the angry black woman or the dangerous transition from being perceived as a work pet to a work threat. Against this backdrop, *Sharing the Legacy and Narrative Leadership Experiences of Black Women in Education* explores black women's challenges, unraveling the narratives that need attention, understanding, and urgent action. *Sharing the Legacy and Narrative Leadership Experiences of Black Women in Education* invites readers to step into the shoes of black women as leaders in academia and education, providing an authentic and raw glimpse into their experiences. taraji p henson education: Mental Health Awareness Laquita D. Wright, This book boldly confronts the reality of black/brown mental pain head on. There is a systematic and racist belief that black/brown people can deal with and ignore pain better than any other race. Speaking from experience in the minority communities of America, there is a negative stigma surrounding mental health. Instead of seeking professional help for conditions such as PTSD, depression and anxiety many resort to self-medication, drug, opioids, alcohol, etc. or isolation in an attempt to solve their problem on their own. Black/brown people are reluctant to discuss mental health issues and seek treatment because of the shame and stigma still associated with such conditions in our communities. As a black person it is not easy expressing emotional pain because we are told not to show those emotions. I am approaching it both from community education and cultural competency. Laquita D. Wright knows that black & brown people are hurting. She knows because she is one of them. "Mental Health Awareness: Black & Brown Pain," shed lights on the need to improve access to mental health treatment within the underrepresented communities. For many centuries, Indigenous people of color have experienced trauma in all aspect of our lives. This book is a must read and a guide to finding relief through mental help.

taraji p henson education: *From Unequal to Unwanted: Reforms Needed to Improve Public K-12 and Higher Education in America* James "Jim" Taylor, 2018-03-13 America's system of education desperately needs reform: the system continues to struggle with engaging and teaching children of color—even as society becomes more diverse. A longtime educator offers a candid and unabashed account of education in America during the past 130 years and what should be done in the future. Dr. James "Jim" Taylor describes the system of "separate and unequal" during the Jim Crow era of history, as seen through his eyes as a black child. That glimpse provides both a personal and professional perspective of the events that shaped the system. But even though strides have been made, many "unwanted" students continue to face discrimination in the nation's K-12 public schools and institutions of higher education. *From Unequal to Unwanted: Reforms Needed to Improve K-12 Public and Higher Education in America* calls for educators and policymakers to confront real issues, offering evidence-based strategies to create real reform. Educators and policymakers must collaborate to develop the full potential of all children—not treat some as second-class citizens—if America expects to take back its place as a world leader in education.

taraji p henson education: *Criminal Justice and Mental Health* Jada Hector, David Khey, 2022-10-08 This textbook provides an overview of the overlap between the criminal justice system and mental health for students of criminology and criminal justice. It provides an accessible overview of basic signs and symptoms of major mental illnesses and size of scope of justice-involved individuals with mental illness. In the United States, the law enforcement and the criminal justice system is often the first public service to be in contact with individuals suffering from mental illness or in mental distress. Those with untreated mental illnesses are often at higher risk for committing criminal acts, and due to a lack of mental health facilities, resources, and pervasive misconceptions about this population, those with mental illness often end up in the corrections system. This timely work covers the roles of each part of the criminal justice system interacting with mentally ill individuals, from law enforcement and first responders, social services, public health services, sentencing and corrections, to release and re-entry. It also addresses the crucial need of mental healthcare for criminal justice professionals, who suffer from high rates of job stress, PTSD, and other mental health issues. With new chapters on stigma, mental illness during and after disaster and crisis, and updates and new supplementary materials throughout, this book will be of interest to students of criminology and criminal justice, sociology, psychology, and public health. It will also be of interest to policy-makers and practitioners already working in the field, interacting with and addressing the needs of mentally ill individuals.
