Examples include leveraged buyouts, leveraged recapitalizations, leveraged dividends or other such situations where there may be minimal equity involved. Houlihan has also completed solvency opinions for spin-off transactions in conjunction with capital

restructuring and significant debt refinancing. The Federal Bankruptcy Code defines insolvent as the condition in which the total of a person's debts exceeds the value of its property at a fair valuation. Recent case law suggests that the fair valuation of property is its value on a going-concern basis. A solvency letter expresses an independent expert opinion on a borrower's ability to remain solvent under the burden of additional liability, to pay debts as they mature, and to continue operations as a going-concern in dynamic economic conditions. In connection with a leveraged recapitalization, interested parties such as new secured lenders and sellers will often, due to fraudulent conveyance concerns, seek an independent determination and opinion as to the impact of the acquisition debt on working capital, cash flow, and equity value. Houlihan is highly familiar with the Tests of Capitalization and Solvency and is able to efficiently and cost-effectively provide analysis that provides a layer of comfort to interested parties.
