Program Overview

The Tallahassee Memorial Family Medicine Residency Program is a three-year accredited training program committed to developing well-rounded family medicine practitioners. It is designed to equip residents with the clinical skills, knowledge, and professional attitudes necessary to provide high-quality primary care. The program places strong emphasis on serving the healthcare needs of the Tallahassee community, fostering a patient-centered approach that promotes health and wellness across all ages. Residents are trained to manage both acute and chronic illnesses, emphasizing continuity of care and prevention strategies. The residency aligns with national family medicine standards while tailoring experiences to address local health challenges.

Curriculum and Educational Structure

The curriculum of the Tallahassee Memorial Family Medicine Residency Program

is structured to provide a balanced and comprehensive educational experience. It integrates didactic learning, hands-on clinical practice, and community engagement activities. The program includes regular lectures, case conferences, journal clubs, and workshops that cover a wide range of topics relevant to family medicine. Residents receive training in areas such as pediatrics, obstetrics, geriatrics, behavioral health, and emergency medicine to ensure broad competence.

Core Competencies

The program follows the Accreditation Council for Graduate Medical Education (ACGME) core competencies framework, focusing on patient care, medical knowledge, practice-based learning, communication skills, professionalism, and systems-based practice. This approach ensures that residents develop both clinical expertise and professional skills essential for effective healthcare delivery.

Didactic Sessions and Simulation Training

Regular didactic sessions provide residents with up-to-date medical knowledge and clinical guidelines. Simulation training is incorporated to enhance procedural skills and emergency response capabilities. These educational components are designed to reinforce clinical decision-making and improve patient safety.

Clinical Rotations and Training Sites

Clinical experience is a cornerstone of the Tallahassee Memorial Family Medicine Residency Program. Residents rotate through diverse clinical settings, allowing them to gain extensive hands-on experience in various aspects of family medicine. The program's affiliation with Tallahassee Memorial HealthCare and other community clinics offers a rich clinical environment.

Primary Care Clinics

Residents spend significant time in outpatient primary care clinics where they manage a broad spectrum of patient conditions. This exposure helps develop skills in preventive care, chronic disease management, and patient education.

Inpatient Services

The residency includes rotations in hospital-based inpatient services, including internal medicine and obstetrics. These experiences provide residents with acute care skills and an understanding of hospital systems.

Specialty Rotations

Additional rotations in pediatrics, emergency medicine, geriatrics, and behavioral health broaden residents' knowledge and prepare them to address complex patient needs across the lifespan.

Faculty and Mentorship

The faculty at the Tallahassee Memorial Family Medicine Residency Program consists of experienced family medicine physicians, educators, and healthcare professionals dedicated to resident development. They provide personalized mentorship, fostering a supportive learning environment that encourages professional growth and clinical excellence.

Faculty Expertise

Faculty members bring diverse clinical backgrounds and academic achievements, enabling residents to learn from a wide range of perspectives. They are actively involved in teaching, research, and community health initiatives.

Mentorship and Support

Each resident is paired with a faculty mentor who guides their career development, assists with scholarly activities, and provides feedback on clinical performance. This mentorship model promotes continuous improvement and professional satisfaction.

Community Involvement and Benefits

Community engagement is a vital component of the Tallahassee Memorial Family Medicine Residency Program. Residents participate in outreach programs, health fairs, and public health projects aimed at improving community wellness. This involvement enhances residents' understanding of social determinants of health and the importance of culturally competent care.

Community Health Initiatives

- Preventive health screenings and education
- Chronic disease management programs
- Collaborative efforts with local organizations
- Health promotion in underserved populations
- Advocacy for patient-centered care

Benefits of the Program Location

Being situated in Tallahassee offers residents the advantage of training in a vibrant city with a diverse patient population. The program's proximity to academic institutions and healthcare facilities enriches the educational experience and professional networking opportunities.

Application Process and Eligibility

Prospective applicants to the Tallahassee Memorial Family Medicine Residency Program must meet specific criteria and complete a structured application process. The program seeks candidates who demonstrate a strong commitment to family medicine, community service, and lifelong learning.

Eligibility Requirements

- Graduation from an accredited medical school
- Successful completion of USMLE Step 1 and Step 2 exams
- Eligibility for medical licensure in the state of Florida
- Demonstrated interest in primary care and community health
- Strong interpersonal and communication skills

Application Process

Applicants submit their materials through the Electronic Residency Application Service (ERAS), including a personal statement, letters of recommendation, medical school transcripts, and USMLE scores. Selected candidates are invited for interviews, during which they learn more about the program's culture and expectations. The program values diversity and inclusivity throughout the selection process.

tallahassee memorial family medicine residency program: Family Medicine A.K. David, T.A.Jr. Johnson, D.M. Phillips, J.E. Scherger, Robert B. Taylor, 2013-06-29 Much is new in Family Medicine since the last edition of our textbook. For example, not only is the therapy of human immunodeficiency virus (HIV) disease and the acquired immunodeficiency syndrome (AIDS) much different than a few years ago; the epidemiology of the disease has also changed and more than half of the family physicians in a rural state such as Oregon have already managed patients with HIV disease or AIDS. 1 There are new immunization recommendations for children and new antibiotics for the treatment of bacterial infections. Computers are bringing medical informatics and on-line consultation into office practice. Medicare physician payment reform is underway and the reality of rationing medical care has been recognized. There has been a recent increase in student interest in a family practice career,² coincidental with a Council on Graduate Medical Education (COGME) recommendation that at least 50 percent of all residency graduates³ should enter practice as generalists. Also there is increasing awareness of the need for a⁴ Center for Family Practice and Primary Care at the National Institutes of Health. This all-new fourth edition is intended to present the scientific and practical basis of family medicine with special attention to what's new in family medicine. The emphasis is on how the physician provides continuing and comprehensive care for persons of all ages, with clinical content selected from the perspective of family physicians. The format of the book, like the practice of family medicine, continues to change.

tallahassee memorial family medicine residency program: The Behavioral Health Specialist in Primary Care Mary Ann Burg, Oliver Oyama, 2015-09-10 Patients with chronic conditions often need psychosocial support and brief counseling to help them make the lifestyle and behavioral changes required to prevent disease complications. This innovative text, with contributions from respected clinicians and researchers in all arenas of behavioral health, provides comprehensive training for all health professionals including those in medicine, nursing, social work, mental health, and clinical and health psychology who desire targeted evidence-based training in Behavioral Health skills. Rich case examples drawn from typical patient presentations demonstrate the relationship between physical and psychological health and the complexity of behavior change in chronic illness. This text is a timely, relevant and practical resource for all members of the primary care team. It prepares team members to work in the model of patient-centered integrated care in accordance with the recommendations of the Affordable Health Care Act (ACA) and the National Committee for Quality Assurance (NCQA) medical home standards for identifying patient needs and providing coordinated and comprehensive patient care. It focuses on knowledge and skills needed for working with the most common chronic conditions such as diabetes, obesity, chronic pain, cardiovascular conditions, sleep disorders, geriatric conditions, cancer-related conditions, and substance abuse. It includes chapters on epidemiological trends in chronic illness and systems medicine. Theories of health behavior and behavior change and evidence-based interventions provide a foundation for skill development, followed by detailed coverage of the requirements for behavioral management of specific chronic conditions. Sample referrals and consultation notes provide concrete examples of how the behavioral health specialist might respond to a referral. . Key Features: Provides comprehensive graduate-level training for the role of Behavioral Health Specialist Describes the health promotion and counseling skills needed to function as part of an integrated health team Focuses on proficiencies needed for working with common chronic conditions Addresses the psychosocial components of primary care disorders Includes case examples demonstrating the relationship between physical and psychological health and the complexity of behavior change in chronic illness

tallahassee memorial family medicine residency program: Family Medicine John L. Buckingham, E.P. Donatelle, Thomas A. Jr. Johnson, Joseph E. Scherger, Robert B. Taylor, 2013-11-21 New material in a new format is contained in this third edition of Family Medicine. The comprehensive text nevertheless remains true to the goal of previous editions in offering a scientific approach to health and illness within the context of the family. Using up-to-date clinical material, the book demonstrates how the family physician may provide comprehensive health care to persons of all ages. The first part of Family Medicine discusses such topics as the conceptual basis of family as discipline and specialty, problem differentiation, family-centered health care, longitudinal care, clinical reasoning, and resource management. The second part explores both problems related to organs and systems and problems related to the person, family and community, including: pregnancy, care of infants, children, adolescents, and the elderly; behavioral and psychiatric problems; emergency and critical care; sports medicine; alcoholism and substance misuse; environmental health; and neoplastic and infectious diseases. Family Medicine, with its greatly expanded in-depth coverage of the most commonly encountered clinical core problems and procedures in family medicine, continues to be a textbook written and edited by family physicians for family physicians.
