The most straightforward translation is "toma tu medicina" when speaking informally to someone you know well, such as a child or family member. Alternatively, the formal command form is "tome su medicina," which is appropriate when addressing patients in a respectful or professional manner. Other variations include "tómate tu medicamento" or "tome su medicamento," where "medicamento" is a synonym for "medicine" or "medication."

## Informal Commands

For informal situations, particularly with children or close acquaintances, the imperative form of the verb "tomar" (to take) is used as "toma" plus the possessive "tu" and the noun "medicina" or "medicamento."

- **Toma tu medicina.** – Take your medicine.

## Formal Commands

When addressing adults formally or in professional healthcare interactions, the formal imperative "tome" is used alongside the possessive "su."

## Pronunciation and Usage Tips

Stress typically falls on the second syllable of "medicina" (/medi'sina/) and "medicamento" (/medi'kamento/). Using the appropriate command form depends on the relationship between the speaker and the listener, as well as the social setting.

## Emphasis in Commands

In Spanish, the use of accent marks in commands is important to indicate stress and differentiate between similar words.
