**tax and business consultants blair:** *The Secret World of Oil* Ken Silverstein, 2015-05-05 The oil industry provides the lifeblood of modern civilization, and bestselling books have been written about the industry and even individual companies in it, like ExxonMobil. But the modern oil industry is an amazingly shady meeting ground of fixers, gangsters, dictators, competing governments, and multinational corporations, and until now, no book has set out to tell the story of this largely hidden world. The global fleet of some 11,000 tankers—that's tripled during the past decade—moves approximately 2 billion metric tons of oil annually. And every stage of the route, from discovery to consumption, is tainted by corruption and violence, even if little of that is visible to the public. Based on trips to New York, Washington, Houston, London, Paris, Geneva, Phnom Penh, Dakar, Lagos, Baku, and Moscow, among other far-flung locals, *The Secret World of Oil* includes up-close portraits of a shadowy Baku-based trader; a high-flying London fixer; and an oil dictator's playboy son who has to choose one of his eleven luxury vehicles when he heads out to party in Los Angeles. Supported by funding from the prestigious Open Society, this is both an entertaining global travelogue and a major work of investigative reporting.

**tax and business consultants blair:** The Consulting Trap Chris Hurl, Leah B. Werner, 2024-05-13T00:00:00Z The Consulting Trap does a deep dive into how governments have become hooked on private consultancy firms with dire consequences for democratic decision-making, public accountability and accessible public services. Hurl and Werner contend that firms like McKinsey, Accenture, KPMG and Deloitte increasingly take responsibility for core public services, trapping governments in cycles of dependency. Through orchestrating tax avoidance for the wealthy while engineering austerity for the rest, these firms have created the foundations for the deepening privatization of the public services, further entrenching their power. Drawing on case studies from Canada and around the world, Hurl and Werner investigate how big consultancies leverage social

networks, institutionalize relationships, mine and commodify data, and establish policy pipelines that facilitate the quick diffusion of ideas across jurisdictions. Drawing from real world examples, The Consulting Trap offers strategies for how these powerful firms can be resisted using people's audits, public consultations, access to information requests, and social network analyses.
