tcc family health atlantic: *The Global Seafarer* T. Alderton, Seafarers International Research Centre, International Labour Office, 2004 This volume offers a systematic account of the effects of globalization on the shipping industry and seafarers' lives. The seafarers' labor market is changing rapidly and this study discusses the challenges encountered in recruitment practices, trade unions, and collective bargaining, as well as training, certification, and fraudulent certification. Wages, contracts, and tours of duty are also investigated, and the book includes in-depth treatment of seafarer safety and hazard exposure. Innovations such as automated engine rooms and the global

maritime distress and safety system, the internationalization of ship registrations, multinational crewing and reductions in crewing levels, and the rise in ship management companies have had a profound effect on seafarers' living and working conditions. This perceptive book examines these and future issues for regulation and enforcement.

tcc family health atlantic: The Diabetic Foot Aristidis Veves, John M. Giurini, Marc L. Schermerhorn, 2024-05-30 The fifth addition of this classic text that focuses on the diabetic foot continues the tradition of the previous four editions. More specifically, it includes contributions from a distinguished panel of clinicians and researchers, who have either participated in previous editions or are new, who provide up-to-date information on the pathophysiology and management of diabetic foot ulceration. As with the previous editions, it is divided into three sections: the first part focuses on clinical features and diagnosis; the second on pathophysiology; and the third on the management of diabetic foot problems. The main emphasis of the clinical part is on the multidisciplinary approach that has been mainly developed by the world-renowned Joslin-Beth Israel Deaconess Foot Center, which pioneered the management of diabetic lower extremity problems. Also like previous editions, the author panel includes diabetologists, podiatrists, vascular surgeons, infectious disease specialists, orthotists, plastic and orthopedic surgeons, the majority of whom work at the Joslin-Beth Israel Deaconess Foot Center. In addition, the fifth edition not only describes the state-of-the-art current methods in clinical practice but also includes a thorough update of all research progress during the last five years. This updated edition of this timely text will be of significant value to all physicians and researchers with interest in a comprehensive understanding of the diabetic foot.
