taylor guitars company history: Cool Wooden Box W. Rand Smith, 2023-07-14 "In Cool Wooden Box, Rand Smith has cleverly woven person, social, and musical histories into a compelling narrative. In doing so, Smith has illustrated just how, well, cool the steel string acoustic guitar, its makers, and its players are." —John Thomas, author of *Kalamazoo Gals: A Story of Extraordinary Women* and Gibson's "Banner" Guitars of WWII, and field editor for *The Fretboard Journal* Beginning with a comparison of the American acoustic guitar world in the early 1960s with that of today, then describing iconic performances at storied venues such as The Ark in Ann Arbor while meticulously researching the instrument's top makers, Smith assembles a passion-filled and eye-opening history of that "cool wooden box" from the folk era through the pandemic. The author focuses on both the playing and making of the acoustic guitar, concluding that the instrument has been transformed in both aspects during the last sixty years. On the playing side, Smith examines the influences on, and the impact of, such guitarists as David Bromberg, Elizabeth Cotten, Paul Geremia, and Norman Blake. On the making side, the author takes the reader into the tradition-minded yet dynamic world of lutherie. He traces how the oldest, most revered companies whose reputations are based on legendary breakthroughs in lutherie, Gibson and Martin, have adapted as the new lutherie movement of innovative small-scale producers, exemplified by interviewees such as Michael Gurian, Bill Collings, Richard Hoover, and Dana Bourgeois, arose. Starting small and then growing exponentially, Taylor Guitars is a wholly different "player" in acoustic guitar building, and Smith compellingly tells its story. Finally, Cool Wooden Box considers the effects of globalization on the industry. Clocking thousands of miles and hours of interviews with guitar makers, suppliers, and sellers, W. Rand Smith has created not only a detailed history of the acoustic guitar, but also a lasting tribute to an instrument he so clearly reveres.

taylor guitars company history: Guitar Makers Kathryn Marie Dudley, 2014-11-10 The craft tradition of making string instruments goes back to Stradivarius, the 18th-century luthier whose instruments today are very nearly priceless. Kathryn Dudley here takes us on a quest for the Guitar Heroes of the 21st century, the luthiers whose artisanal skills (as opposed computer numerical control technology) produce exquisite one-of-a-kind instruments. But she tracks industrial guitar-making as well as artisanal, starting with the post-WW II golden era of the Martin and Gibson companies on to a second golden era, a result of new modes of information sharing. She has interviewed 100 luthiers and 50 dealers, collectors, musicians, material suppliers, and guitar festival organizers. We see how the advent of disco caused sales of acoustic guitars to plummet in the 1980s, and meet the key individuals who rescued both the craft and the big companies from almost certain demise. In-depth portraits of guitar-makers illuminate the kinds of emotional and tactile engagement these skilled workers have with the wood they shape into a guitar's unique voice. They talk to wood, and listen to what the piece of wood wants to be, how the grain is going to go, they bring wood to life, treating it not as a passive object but as a collaborator in the production process. Along the way, we meet up with consequences of the 1992 law prohibiting sales of Brazilian rosewood, as well as taking tours of the Martin Company museum and factory, and devour with pleasure her portraits of student and apprentice luthiers as well as masters. The interaction between people and things yields a longing to be in perfect synch with sound and with the human body what Dudley calls acoustic desire. No other book has so perceptively shown us the role of human hands in shaping a guitar's unique voice.
