tbo and dan interview: Labor in the Time of Trump Jasmine Kerrissey, Eve Weinbaum, Clare Hammonds, Tom Juravich, Dan Clawson, 2020-01-15 Labor in the Time of Trump critically analyzes the right-wing attack on workers and unions and offers strategies to build a working-class movement. While President Trump's election in 2016 may have been a wakeup call for labor and the Left, the underlying processes behind this shift to the right have been building for at least forty years. The contributors show that only by analyzing the vulnerabilities in the right-wing strategy can the labor movement develop an effective response. Essays in the volume examine the conservative upsurge, explore key challenges the labor movement faces today, and draw lessons from recent activist successes. tbo and dan interview: Het Nieuwe Theaterleren C. Dieleman, 2009-12-24 Summary: Sinds de introductie in 1999 van het schoolvak Culturele Kunstzinnige Vorming (ckv) maken de theatrale podiumkunsten een belangrijk onderdeel uit van cultuureducatie in de bovenbouw van het voortgezet onderwijs. Omdat binnen ckv de receptieve cultuureducatie centraal staat, trekken leerlingen er massaal op uit om culturele activiteiten te ondernemen. Theaterbezoek is vanaf het begin populair. Hierdoor kregen aan de ene kant docenten te maken met een voor het onderwijs tamelijk nieuwe kunstdiscipline; aan de andere kant kregen theaters en theatergezelschappen er een publieksgroep bij, die nog niet zo goed in het Nederlandse theaterwereldje was ingevoerd. In deze studie wordt het veld waar theater en onderwijs elkaar in het kader van CKV ontmoeten, onder de loep genomen.

tbo and dan interview: In Women's Words Hannah Loney, 2018-06-27 Drawing primarily upon oral history interviews, this study presents a woman-centred history of the Indonesian occupation. It reveals the pervasiveness of violence as well as its gendered and gendering dynamics within the social and cultural everyday of life in occupied East Timor. The violence experienced by East Timorese women ranged from torture, rape, and interrogation, to various forms of surveillance and social control, and the structural imposition of particular feminine ideals upon their lives and bodies. Through women, East Timorese familial culture was also targeted via programmes to develop and modernise the territory by transforming the feminine and the domestic sphere. Women experienced the occupation differently to men, not just because they were vulnerable to sexual violence, but also because they endured proxy violence as the military's means of targeting male relatives and the resistance at large. In Womens Words tells a story of survival and perseverance by highlighting the strength, initiative, and negotiating skills of East Timorese women. Many women lived in circumstances of constant negotiation and attempts to maintain order and normality, as well as to provide for themselves and their families, in a society where everyday life was characterised by

violence and uncertainty. This study demonstrates the capacity of people to survive, to endure, and to resist, even amid the most difficult of circumstances. It provides insights into the social and cultural elements of territorial control, as well as the locally-grounded strategies that are often used for negotiating and resisting an occupying power.
