We all have emotions, but our intelligence is at different level. Chandra (Moon) represents the mind. It signifies the thoughts and emotions, and the complex psychological faculty that takes input from the senses and tells the body how to respond. The Moon is the single most important planet in Jyotish because the state of mind is responsible for all the emotional responses to life, and therefore defines the subjective perception of life. taurus moon woman physical appearance: Planet SUN Secrets Saket Shah, 2020-01-05 The Sun god has two arms, he is seated on the pedestal of lotus; both of his hands are embellished with lotus flowers. There is a beautiful golden crown, on his head and a garland of gems around his neck. His radiance is just like the interior part of a lotus flower and he is mounted on the chariot pulled by seven horses. The Sun god is also known as 'Savita', which means - one who creates, 'SAVITA SARVASYA PRASAVITA' (Nirukta -10/31). According to the Rigveda the Sun god situated at the centre of the solar system is an inspirer of all, pervader of the internal parts and an embodiment of almighty god. According to the 'Markandeya Puran' Sun is the embodiment of Brahma, the world originates from the Sun and is established in it. The Sun is the appearance of all the matters and elements and is the eternal almighty. This very God 'Bhaskar' creates nurtures and annihilates the world respectively in the form of lord Brahma, Lord Vishnu & Lord Shiva. Sun is the supreme deity amongst all the nine planets. When Brahma manifested himself by breaking the egg, then he pronounced 'OM'. This Omkar itself is the supreme soul and the very physique of Sun god. The four Vedas emerged from all the four mouths of lord Brahma, which were glowing by their own radiance. The powerful radiance emanating from the 'Omkar' covered the radiance of the Vedas and ultimately all of them unified. This very Vedic appearance of 'Omkar' is the sun god. This radiant sun was the first manifested during the times of creation, hence it was called 'Aditya'. Once the demons, the titans and the monsters unitedly fought with the deities and snatched their power and authority after defeating them. 'Aditi' - the mother of the deities did worship of sun god to get protection from this calamity. Being pleased with her the sun god took incarnation as her son and established the eternal path of the Veda after defeating the enemies of the deities. He is called Aditya also for this reason. The complexion of Sun god is red. His vehicle is a chariot. There is only one wheel in his chariot which is called 'Samvatsar'. The wheel of his chariot has 12 spokes, which symbolise the twelve months. The wheel has six circumferences, which symbolize the six seasons, and three 'Naves' which symbolise of the three four-months. The sages (rishi) and all the celestial supernatural beings like 'Gandharva', 'Apsara', 'Nag' yaksha and the deities' move along with him doing his worship. The wheel, power, a loop and a hook are the weapons of sun god. His great-phase (Mahadasha) last for six years. The Sun is considered as a high planet, till the tenth degree, in the zodiac of Aries. Lord Shiva is considered to be the deity of the Sun. To get his blessings and for his pacification, performance of 'Arghya' (pouring water facing the sun in the morning should be done and also the text of Harivansh purana should be listened to. Ruby should be worn on the body and donation of wheat, cow along with a calf, raw-sugar (gur), copper, gold and red-clothes should be made to the brahmins

Tonietti, 2014-05-16 We bring into full light some excerpts on musical subjects which were until now scattered throughout the most famous scientific texts. The main scientific and musical cultures outside of Europe are also taken into consideration. The first and most important property to underline in the scientific texts examined here is the language they are written in. This means that our multicultural history of the sciences necessarily also becomes a review of the various dominant languages used in the different historical contexts. In this volume, the history of the development of the sciences is told as it happened in real contexts, not in an alienated ideal world.

taurus moon woman physical appearance: *The Principles of Astrology* Charles Ernest Owen Carter, 1971 The present work is designed to give a clear and concise presentation of the essential facts of modern Astrology. A good deal of experience in teaching the average beginner has convinced me that, while there are several text-books suitable for the use of the more advanced student or of a novice who has the advantage of personal tuition, the majority are either too prolix or too condensed for one who is compelled to be his own instructor. Moreover, Astrology is now to some extent in the melting-pot: on the one hand, many new ideas are being introduced; on the other, statistical research, such as earlier astrologers could not carry out for lack of sufficient data, has cast considerable doubt on the validity of portions of the rather incoherent mass of tradition that till recent years represented astrological science. The beginner does not wish to be confronted with controversial matters, however attractive he may find them later. He requires, firstly, a statement of what may be regarded as known astrological facts; and secondly, an explanation as to how these facts affect human life. It is this that I have aimed at giving him. An endeavour is made not to neglect the theoretical aspects of Astrology, for the modern student dislikes what appear to him as isolated statements, and looks for a logical and synthetic aspect to our teaching, without, of course, wishing to plunge at the outset into metaphysical speculation. I trust that the Index will be of considerable use in practice, since it should enable the student to find readily those passages that deal with any matter that may trouble him. Finally, I would express my sincere hope that this book may be of some value in assisting its readers to grasp something of the true nature and worth of astrological science, both in the commonest and the most sublime aspects of human life. Those who have realized what this may mean to the individual are reluctant to set any bounds to their estimate of the beneficial effects that its universal recognition, in a proper form, would mean to the human race.
