why learn chinese language: Language Education in the School Curriculum Ken Cruickshank, Stephen Black, Honglin Chen, Linda Tsung, Jan Wright, 2020-05-14 There is widespread concern in all English speaking countries at the rapid decline in study of languages. The promise of 'languages for all' in the UK and North America in the 1970s marked a shift from languages as elite subjects for the privileged few, but this promise has not been fulfilled. This book explores the reasons for and solutions to this decline. More importantly, it looks at how these trends have been reversed in successful school programs and the implications of this for language education policy makers. The study draws on an analysis of data from 600 primary, secondary and community languages schools over six years and from detailed case studies in a representative

sample of 45 successful schools. The book proposes a range of strategies to address the decline: from engaging classroom learning, assessment outcomes and embedding languages as central in school curriculum on the one level, to a mix of incentives and mandation for language study, especially at upper secondary school level. The authors explore the impact of learning languages on the thinking, educational experiences and outcomes of young people across a range of ethnic backgrounds and socioeconomic statuses. They show the importance of having equal access to languages study in a world where young people will have increasingly more diverse working lives and argue that the gap in languages between policy and uptake is really a gap in the thinking of policy makers and government.

why learn chinese language: *Language, Culture and Identity in Two Chinese Community Schools* Sara Ganassin, 2020-04-06 This book investigates the social, political and educational role of community language education in migratory contexts. It draws on an ethnographic study that investigates the significance of Mandarin-Chinese community schooling in Britain as an intercultural space for those involved. To understand the interrelation of 'language', 'culture' and 'identity', the book adopts a 'bricolage' approach that brings together a range of theoretical perspectives. This book challenges homogenous and stereotypical constructions of Chinese language, culture and identity – such as the image of Chinese pupils as conformist and deferent learners – that are often repeated both in the media and in academic discussion.

why learn chinese language: *Critical Perspectives on Global Englishes in Asia* Fan Fang, Handoyo Puji Widodo, 2019-06-05 Although the notion of Global Englishes (GE) has been widely discussed in the literature, few books consider how GE can be translated into educational practice. This book addresses the incorporation of GE into language policy and curriculum, pedagogy and assessment practices, and focuses on a wide range of geographical and language contexts. Incorporating GE into language curriculum, pedagogy and assessment practices calls for a reframing of our pedagogical practices that take into account the use of Englishes in intercultural and multicultural encounters where people have different first languages and cultural backgrounds. This book will be of interest to policymakers, curriculum developers and practitioner-researchers in the area of English language education.

why learn chinese language: *Expanding Ecological Approaches to Language, Culture, and Identity* Jaran Shin, 2023-12-22 This book explores the process of identity (re)construction among mixed-heritage children within the context of globalization through the lens of its intersection with Korean society. The volume illustrates how these multicultural children mediate hybrid social spaces and examines their personal approaches toward translating, resisting, and transforming the entanglements engendered in those spaces. By tracing the trajectories of their identity (re)formations over several years, the book details the paths these youths have taken to navigate diverse contact zones and cope with institutional regulatory mechanisms. It highlights that, in the face of prevailing social stigma, they actively involve themselves in political action in their day-to-day lives: they redefine what it means to be Korean and/or multicultural, challenge simplistic membership boundaries, and develop unique strategies to resist and subsist. These efforts to question the essentialist logic of authenticity demonstrate that these youths, situated at the convergence of globalization, migration, inequality, and political power, represent a challenge to both national and global orders. Arguing that ecological perspectives need to direct greater attention toward the political as well as the posthumanist dimensions of language, culture, and identity, this book is key reading for scholars in applied linguistics, intercultural communication, and Asian studies.

why learn chinese language: *Language Management and Its Impact* Linda Mingfang Li, 2018-10-17 This book provides a comprehensive account of language management and planning at

Confucius Institutes in the UK, implementing an ethnographic approach grounded in language management theory. As a global language promotion organization, Confucius Institutes have previously been discussed in the literature with respect to socio-political issues, but this volume will shed particular light on their role in shaping and informing Chinese language policy, at both the institutional and individual classroom level. The book focuses specifically on Confucius Institutes in the UK, demonstrating how language teaching practice in these organizations is informed and shaped not only by organizational paradigms but local language needs and institutional attitudes of host institutions. In turn, Li highlights these organizations' unique position in a multilingual region such as the UK can offer new insights into language management by illustrating their roles as platforms for both individuals and institutions to become involved in the making and implementation of language policy. This volume will be of particular interest to students and researchers in language policy and planning, language education, applied linguistics, and Chinese linguistics.

why learn chinese language: *Language Teachers' Stories from their Professional Knowledge Landscapes* Lesley Harbon, Robyn Moloney, 2017-06-23 *Language Teachers' Professional Knowledge Landscapes* is a collection of fourteen narratives from teachers of different languages, at different school levels, in different contexts across Australia. This volume brings together not simply language teacher stories, but also more political stories of the problems associated with school programs and contexts. Highlighted through these stories are some of the major political issues in schools that impact language teachers' work, and their students' success in sustained language study. The book is conceptually framed by the work of Clandinin and Connelly (1996) and their notion of 'levels' of stories told by teachers about their classrooms: the secret, the sacred and the cover stories. The term 'professional knowledge landscape' is used to indicate how teachers can critically situate their work, and thereby understand it better. The collection includes the stories of two outstanding primary language educators, and a story of mixed success in a rural program in teaching the local Aboriginal language (Ngarrabul). There are stories of frustration with policy failures, particularly in supporting the learning of Asian languages. Many of the teacher narrators ask the confronting question: 'What blocks language learning in Australia?' They offer the strategies which they have developed, that they see making a difference. Other narratives offer autoethnographic tracking of careers, for example, as a teacher of Latin and Classics, Japanese, French, Spanish, Russian, and of teachers' ongoing vigour and creativity in advocacy. A number of teachers examine their own identity story for the intercultural learning, which they then offer and extend in student learning. Consistently expressed, there is the need for teachers to take up individual responsibility, while still being strongly supported by their professional community: 'It is us' who make the difference, one teacher concludes. Supported by a strong Foreword by Canadian scholar F. Michael Connelly, this ground-breaking collection of narratives represents a form of social research in providing critical illustrations of the issues needing attention for national language education enhancement. It is the only extended inquiry into language teaching in the context of an active policy initiative environment, and the first volume to address the language education landscape through the voices of active language teachers.

why learn chinese language: *49 Myths about China* Marte Kjær Galtung, Stig Stenslie, 2014-11-13 Communism is dead in China. "China Inc." is buying up the world. China has the United States over a barrel. The Chinese are just copycats. China is an environmental baddie, China is colonizing Africa. Mao was a monster. The end of the Communist regime is near. The 21st century belongs to China. Or does it? Marte Kjær Galtung and Stig Stenslie highlight 49 prevalent myths about China's past, present, and future and weigh their truth or fiction. Leading an enlightening and entertaining tour, the authors debunk widespread "knowledge" about Chinese culture, society, politics, and economy. In some cases, Chinese themselves encourage mistaken impressions. But many of these myths are really about how we Westerners see ourselves, inasmuch as China or the Chinese people are depicted as what we are not. Western perceptions of the empire in the East have for centuries oscillated between sinophilia and sinophobia, influenced by historical changes in the West as much as by events in China. This timely and provocative book offers an engaging and

compelling window on a rising power we often misunderstand.

why learn chinese language: China and Africa in Global Context LI Anshan, 2022-02-23 This book studies the relationship between China and Africa by reviewing this history and current state of interactions, offering a valuable addition to the often heated and contentious debate surrounding China's engagement in Africa from a Chinese angle. Comprising four parts, the book covers a kaleidoscopic range of topics on China-Africa relations based on materials from different languages. Part I looks into early historical contact between China and Africa and the historiography of African Studies in China in recent decades. Part II probes the origins, dynamics, challenges and cultural heritage of China's policies towards Africa. Part III explores the issue of development cooperation from both a theoretical and a practical point of view, with a focus on the case of Chinese medical teams in Africa and China's technology transfer to the continent. Part IV illustrates bilateral migration, discussing the history and life of Chinese immigrants in Africa and the African diaspora in China. The insights in this book, as well as real life case studies, will make this work an indispensable reference for academics, students, policy-makers and general readers who are interested in international issues and area studies, especially China-Africa relations, China's rise and African development.

why learn chinese language: Crossing Boundaries in Researching, Understanding, and Improving Language Education Dongbo Zhang, Ryan T. Miller, 2023-02-08 This volume brings together original papers from language education scholars from around the world to explore, exemplify, and discuss the multiplicity of boundary crossing in language education. It emphasizes the potential of boundary crossing for expansive learning, and aims to generate new insights, through boundary crossing, into the complexity of language education and approaches to innovative practices. This volume also underscores the important role of expert boundary crossers. In particular, it aims to honor G. Richard Tucker, Paul Mellon University Professor Emeritus of Applied Linguistics at Carnegie Mellon University, celebrating his distinguished scholarship on language education and paying tribute to the inspiration and mentorship he has given to the contributors of this volume to cross boundaries academically and professionally. This volume is organized into four sections, namely, language learning and development; teachers and instructional processes; program innovation, implementation, and evaluation; and language-in-education policy and planning. These sections or themes, which are necessarily cross-cutting, also represent the major areas of scholarship where Prof. Tucker has made distinguished contributions for over half a century.

why learn chinese language: The Learning and Teaching of Cantonese as a Second Language Siu-lun Lee, 2023-07-12 The Learning and Teaching of Cantonese as a Second Language brings together contributions on such issues as Cantonese textbooks, linguistic description, literacy and tone acquisition, supplemented by case studies from the Netherlands and Japan. The learning and teaching of Cantonese as a second language is a subject of considerable interest in the international academic community, and the first international symposium on teaching Cantonese as a second language, held at the Chinese University of Hong Kong in October 2019, brought together leading researchers in this field. This conference provided the inspiration for the current volume, The Learning and Teaching of Cantonese as a Second Language. In the Hong Kong context, historically, the term 'Cantonese' refers to the language varieties of immigrants who came to the territory from various areas in Guangdong province, including Macau, Panyu, Taishan, Xinhui and Zhongshan. From the late nineteenth century onwards, their speech coalesced into the contemporary variety of Cantonese used in Hong Kong today. The term 'Cantonese' is also used to refer to the entire Yue subgroup of Chinese, which includes varieties of Cantonese spoken in southern China, Hong Kong, Macau, Malaysia, Singapore and among overseas Chinese in Australia, Europe and North America. In all, it is estimated that there are about 70 million Cantonese speakers in the world. This volume is of direct relevance to educators, language teachers, linguists and all those concerned with the learning of Cantonese as a second language.

why learn chinese language: Language, Culture, and Identity Among Minority Students in

China Yuxiang Wang, 2013 This book explores Hui (one of the Muslim minority groups in China) students' lived experiences in an elementary school in central P. R. China from the perspectives of philosophical foundations of education and the sociology of education, the impact of their experiences on their identity construction, and what schooling means to Hui students. The book describes a vivid picture of how the Hui construct their own identities in the public school setting, and how the state curricula, teachers, and parents play roles in student identity construction. The objectives of the book are to discover factors that impact Hui students' identity construction and have caused Hui students to know little about their own culture and language; and to explore what should be done to help teachers, administrators, and policy makers appreciate minority culture and include minority culture and knowledge in school curriculum in order to meet the needs of Hui students. The book provides historical, policy, and curricular contexts for readers to understand Hui students' experiences in central China, and discusses the cultural differences between Han and Hui from a philosophical level. The book uses postcolonial theory to critique the assimilative nature of school education, the construction of Hui students' identity from Han ideology, and the cultural hegemony of the mainstream Han group. It also discusses curriculum reconceptualization both in China and globally, and the possibility of multicultural education in China.

why learn chinese language: Silk Road to Belt Road Md. Nazrul Islam, 2018-11-30 This volume approaches China's Belt and Road Initiative as a process of culturalization, one that started with the Silk Road and continued over the millennium. In mainstream literature, the Belt and Road Initiative (BRI) has been portrayed as the geo-economic vision and geo-political ambition of China's current leaders, intended to shape the future of the world. However, this volume argues that although geo-politics and geo-economy may play their part, the BRI more importantly creates a venue for the meeting of cultures by promoting people-to-people interaction and exchange. This volume explores the journey from the Silk-Road to Belt-Road by analyzing topics ranging from history to religion, from language to culture, and from environment to health. As such, scholars, academics, researchers, undergraduate and graduate students from the Humanities, Social Sciences, and Business will find an alternative approach to the Belt and Road Initiative.
