why would i want to become a teacher: The Kids are Smart Enough, So What's the Problem? Richard W. Garrett, 2017-12-06 There is a national crisis in education, and it's not the highly-debated philosophical discussions or heated political arguments we are used to hearing. Survey data establishes the fact that classrooms throughout the nation suffer from the presence of a small percentage of misbehaving students. Teachers are ill-equipped to deal with these disruptive students, resulting in lost classroom time and demoralized educators who are perpetually blamed for the student's bad performance. The root cause of these misbehaving children is not a lack of intellectual ability, but a lack of character and grit; the important noncognitive skills required for success in life. The Kids are Smart Enough is a book of hope with surprisingly practical solutions revealed by listening to teachers, learning from data, and looking for the root cause. This book will help you to discover how struggling students can be reached and teachers encouraged.

why would i want to become a teacher: Making Sense of Education Gert Biesta, 2012-06-05 This volume gives educational theorists the chance to let rip and say what they really want to say. In doing so it sends a blast of fresh air through the dusty halls of academe. The vast majority of the literature in education theory and philosophy follows the conventions of academic writing, and rightly so. Yet its formal, abstract and objective style, which focuses on the careful presentation of theoretical and philosophical arguments, doesn't always give us insights into what motivates and drives the authors—while for academic neophytes it can be dense and arcane. Here, those same theorists and philosophers have been given the chance to expound at length on the topics that most exercise them. What concerns them, what gets them up in the morning, and what really matters most to them? Readers will discover what happens when these thinkers are explicitly invited to go beyond academic conventions and experiment with form, style and content. Featuring collected essays from leading educationalists from Norway, Sweden, Denmark, the USA, Canada, Israel Germany, Belgium and the UK, these essays provide vital insights into their work as well as being a compelling introduction to contemporary attempts to make sense of education through theory and philosophy. All these authors have made key contributions to the field, and their unique 'manifestos' make a fascinating read for any student or practitioner in education.

why would i want to become a teacher: *As You Step Into Teaching* Joenel Dicen Coros, 2025-03-07 *As You Step into Teaching* showcases the importance of having the right perspectives--our way of looking at and understanding things as we take on the teaching role. The book broadens our understanding of our role as a teacher inside and outside the classroom and offers us insights on how we can achieve these perspectives. More so, it allows us to see the meaning of why we do what we do every day. Truly every teacher has a different perspective from one another, but there are three things common to them: First, All teachers desire that their students would love learning. Second, All teachers want the best for their students. Third, All teachers have affected the lives of those they touched in one way or another. These are undebatable. The author has drawn motivation to write this book from his opportunity and experiences in starting over again after eleven years of teaching. Hence, this book is especially helpful for first-year teachers, aspiring teachers, leaders and administrators who support first-year teachers, and seasoned teachers who are looking for insights to support those who are currently immersed in the experience. It is the author's hope that these perspectives guide those who get hold of it in their journey up to the path of their calling.

why would i want to become a teacher: Why We Teach Now Sonia Nieto, 2014-12-01 *Why We Teach Now* dares to challenge current motions of what it means to be a highly qualified teacher a la No Child Left Behind, and demonstrates the depth of commitment and care teachers bring to their work with students, families, and communities. This sequel to Nieto's popular book, *Why We Teach*, features powerful stories of classroom teachers from across the country as they give witness to their hopes and struggles to teach our nation's children. *Why We Teach Now* offers us the voices of teachers like 42-year veteran Mary Ginley, who wonders, Why would anyone with any brains and imagination ever want to be a teacher? Who then answers her own question affirmatively, It's because somehow, even today, even with all the insanity, all the rules all the poorly designed textbooks, all the directives to teach to the test, there are kids out there who need good teachers. At a time when politicians, policymakers, and philanthropists are quick to denigrate teachers' work and arrogantly speak for the profession, *Why We Teach Now* offers teachers the room and respect to speak for themselves. Once again Nieto gives teachers and those who care about education, the inspiration and energy to embrace their role as advocates; a role that is vital not only for the well-being of students but also for the future of the profession and our nation.

why would i want to become a teacher: *Cultivating Social Justice Teachers* Paul C. Gorski, Nana Osei-Kofi, Jeff Sapp, Kristien Zenkov, 2023-07-03 Frustrated by the challenge of opening teacher education students to a genuine understanding of the social justice concepts vital for creating an equitable learning environment? Do your students ever resist accepting that lesbian, gay, bisexual, transgender, or queer people experience bias or oppression, or that their experiences even belong in a conversation about "diversity," "multiculturalism," or "social justice?" Recognizing these are common experiences for teacher educators, the contributors to this book present their struggles and achievements in developing approaches that have successfully guided students to complex understandings of such threshold concepts as White privilege, homophobia, and heteronormativity, overcoming the "bottlenecks" that impede progress toward bigger learning goals and understandings. The authors initiate a conversation - one largely absent in the social justice education literature and the discourse - about the common content- and pedagogy-related challenges that social justice educators face in their work, particularly for those doing this work in relative or literal isolation, where collegial understanding cannot be found down the hall or around the corner. In doing so they hope not only to help individual teachers in their practice, but also strengthen social justice teacher education more systemically. Each contributor identifies a learning

bottleneck related to one or two specific threshold concepts that they have struggled to help their students learn. Each chapter is a narrative about individual efforts toward sometimes profound pedagogical adjustment, about ambiguity and cognitive dissonance and resistance, about trial and error, and about how these educators found ways to facilitate foundational social justice learning among a diversity of education students. Although this is not intended to be a “how-to” manual, or to provide five easy steps to enable straight students to “get” heteronormativity, each chapter does describe practical strategies that teachers might adapt as part of their own practice.

why would i want to become a teacher: Teacher Burnout Turnaround Patricia A. Jennings, 2020-12-08 Selected as a Favorite Book for Educators in 2020 by Greater Good Magazine. Stress and burnout are eroding teachers’ motivation, performance, quality of classroom interactions, and relationships with students, as well as their commitment to the profession. Principals are leaving in droves, and teacher shortages are becoming the new normal. Our teachers are underappreciated and our schools underresourced. But, as the author of *Mindfulness for Teachers* and *The Trauma-Sensitive Classroom* points out, educators themselves have the power to alter this downward spiral. Educational psychologist Tish Jennings presents a matrix of stress-causing factors that lead to burnout, and shows how teachers can tackle the sources of stress at each pressure point. From the development of social and emotional competencies—so important to teachers and students alike—to the achievement of systemic change through collective efficacy, she offers hope and practical remedies for overcoming a toxic trend in education.
