**why tesla interview question: All In** Robert Bruce Shaw, 2020-07-07 Extraordinary leaders share a passionate commitment to achieving their vision that borders and sometimes crosses the line into obsession. All In shows why obsession, if properly focused and managed, is both necessary and productive. Advances in any endeavor almost always depend on a small group of individuals who are completely consumed by the goal they're pursuing. When these leaders and teams are successful, everyone benefits from their obsessive nature. This book explores the three obsessions underlying the achievements of the greatest leaders: delighting customers, building great products, and creating an enduring company. Author Robert Bruce Shaw takes you inside the success stories of iconic leaders and shows the upside of obsession plus the practices that support it, including Jeff Bezos of Amazon, Elon Musk of Tesla, and Steve Jobs of Apple. In All In, Shaw teaches you why: Amazon's first principle is customer obsession and the behaviors that sustain it as the firm becomes one of the largest in the world. Tesla puts products at the center of everything it does and the leadership approach that created a revolutionary electric car. Steve Jobs' greatest creation was not the Mac or iPhone but Apple the company. ? ? ? ? ? ? Shaw also provides insight into the dark side of obsession and its destructive potential - as vividly illustrated in his case study of Uber's aggressive pursuit of growth during the tenure of CEO Travis Kalanick. Appealing to any reader of entrepreneurial biographies, All In shows individuals, teams and organizations how to manage obsession's downsides while realizing the benefits of relentlessly seeking to create something that truly matters.

**why tesla interview question: Questions Are the Answer** Hal Gregersen, 2018-11-13 2018 Nautilus Book Awards Silver Winner What if you could unlock a better answer to your most vexing problem—in your workplace, community, or home life—just by changing the question? Talk to creative problem-solvers and they will often tell you, the key to their success is asking a different question. Take Debbie Sterling, the social entrepreneur who created GoldieBlox. The idea came when a friend complained about too few women in engineering and Sterling wondered aloud: why are all the great building toys made for boys? Or consider Nobel laureate Richard Thaler, who asked: would it change economic theory if we stopped pretending people were rational? Or listen to Jeff Bezos whose relentless approach to problem solving has fueled Amazon's exponential growth: "Getting the right question is key to getting the right answer." Great questions like these have a catalytic quality—that is, they dissolve barriers to creative thinking and channel the pursuit of solutions into new, accelerated pathways. Often, the moment they are voiced, they have the paradoxical effect of being utterly surprising yet instantly obvious. For innovation and leadership guru Hal Gregersen, the power of questions has always been clear—but it took some years for the follow-on question to hit him: If so much depends on fresh questions, shouldn't we know more about how to arrive at them? That sent him on a research quest ultimately including over two hundred interviews with creative thinkers. Questions Are the Answer delivers the insights Gregersen gained about the conditions that give rise to catalytic questions—and breakthrough insights—and how anyone can create them.

**why tesla interview question:** Tesla Marko Perko, Stephen M Stahl, 2022-05-01 The enigmatic Nikola Tesla—stalked by his ever-present inner demons—invents the modern world. His astonishing story is that of a new-age god, a genius, a Zeus, a wonderful Wizard, yet a deeply troubled one. He tames the mysterious force called "electricity;" he dazzles the world with his endless inventions and discoveries; he blazes new paths in science that profoundly impact our daily lives; he turns fantasies into realities; his thought experiments disrupt scientific norms; he gives us many of the indispensable tools we use today; and famous actresses and chanteuses clamor for his attention as powerful men desire to be his friend . . . all before an astonished world. Yet all the while he keeps his own counsel, as he simultaneously struggles with the challenging consequences of bipolar disorder: flights of manic energy alternating with depressive depths of great despair. He shuns the clichés of a quotidian life, while forever seeking to "lift the burdens from the shoulders of mankind." It would become his lifelong leitmotif, but at what cost to him? The authors Marko Perko and Stephen M. Stahl, M.D., Ph.D., D.Sc., propose a "new- style biography" entitled T E S L A: His Tremendous and Troubled Life. They will examine Nikola Tesla in a manner that has yet to be accomplished in publishing history—asking and answering the seminal question: Who was the real man with an extremely complex psyche/personality, who lived with obsessive compulsive disorder (OCD) and a hyperthymic temperament spilling over at times into high flying bipolar mania and then crashing into devastating depression—and not simply the iconoclastic scientist who invented the modern world?

**why tesla interview question:** Addicted to the Sun Captain Leo Walton, 2021-03-24 As a direct result of an accidental electrocution while working on the 220 AC shore power system aboard his boat, Captain Leo Walton had an event which changed his life forever. Not only did the powerful electricity catapult him physically threw the air twelve feet, it entered his left hand using his own nerves as a conduit to enter his brain causing a severe traumatic brain injury. In less than a second, he fell into unconsciousness and began a journey that he did not choose or volunteer. For a period of three weeks, alone, he cycled in and out of consciousness, not realizing that the damage to his brain and the left side of his body would demand of him to relearn how to speak, to walk, to read, to feel, and literally to be lost struggling to find himself. As he recovered, having been a successful marine forensics investigator, he became obsessed with his own recovery. Learning quickly how fast it is today in the factory of medicine that exists in America, he found himself on six prescription medications, some psychotic in nature to replace the chemical compounds his crippled pineal and pituitary glands could no longer provide. Suffering the losses of business, marriage, and the ability to care and provide for himself, he fell into cycles of anger and despair to the point of a well-planned and luckily uncompleted suicide. Having developed significant physical, emotional, and psychological symptoms, he learned of a renegade bio-electric energy known by the ancients as a sudden Kundalini awakening that he determined was the cause of his suffering. Without any great success with modern western medicine, he became an explorer of alternative methods and found himself investigating many ancient methods of healing such as yoga, reiki, qi gong, and meditation, which in time, sungazing became his primary focus. This volume details three experiments taken from Captain Leo's personal and detailed journals about his two sungazing experiments requiring nineteen months and three hundred forty-four days, totaling an incredible a hundred fifty-three hours of staring naked-eyed at the sun, gaining the superhuman ability to stare at the sun for

forty-five minutes duration. Now convinced his theories were correct, as a result of his sunbathing experiments and information he learned from a thorough investigation of Nikola Tesla's life and habits, this led him to duplicate Tesla's habits and participate once more in an experiment to see how long he could go without eating food and remain alive and healthy. This led to a tenacious ninety days living as a breatharian to prove his beliefs. Learn why Captain Leo affectionately named this The Book of Miracles.
